average homeowner is usually well informed about which products and concepts are considered green but they seem to have less of an understanding of how they compare and which things work the best for the lowest investment Did you know that 40 percent of the average home power bill is dedicated to air conditioning in warm climates Further energy is spent on cooking hot water clothes dryers and such Did you know that solar hydronic panels are way more efficient than solar voltaic panels How about instantaneous water heaters Are they good Homeowners need to make dozens of decisions about which products or services they need in order to make their home the most efficient it can be for the given budget Do you have mold or humidity problems If you want to learn about things like the home envelope HVAC hot water and electrical systems this book is for you It is written in plain English and covers all the bases Also given are tips on saving the environment from an engineer s perspective The author is a big fan of the environment but does not like greenwashing The generic definition of greenwashing is the practice of making an unsubstantiated or misleading claim about the environmental benefits of a product service or technology Pros and cons of various green products are discussed so that the homeowner can understand the smartest purchases and practices One of the things you will learn is that the envelope of the home is just as important as the HVAC You have to understand both to be successful The envelope is thoroughly discussed as well as HVAC plumbing electrical and the various green technologies

Computer Science and Health Engineering in Health Services José Antonio Marmolejo-Saucedo, Pandian Vasant, Igor Litvinchev, Roman Rodriguez-Aguilar, Felix Martinez-Rios, 2021-02-24 This book constitutes the refereed post conference proceedings of the 4th International Conference on Computer Science and Health Engineering in Health Services Due to COVID 19 pandemic the conference was held virtually The 16 full papers presented were carefully reviewed and selected from 39 submissions The papers highlight the latest research innovations and applications of algorithms designed for optimization applications within the fields of science computer science engineering information technology economics and health systems

Prefabulous for Everyone Sheri Koonen, 2023-04-18 Prefabricated housing is a practical solution since it is faster to build less expensive than site built houses and potentially more energy efficient all aspects that are attractive to homeowners According to manufacturers they are seeing the trend for house size coming down but with higher quality amenities Sheri Koonen has authored a series of five prefabulous books this one is her sixth She includes a variety of prefab homes from small to large including modular SIPS structural insulated panels panelized and kit built The houses are from a range of locations across the United States and Canada Koonen includes luxurious expensive houses as well as some modest lower cost homes She includes two houses that replaced homes that burned down in the California fires There are several ADUs accessory dwelling units The prefab manufacturers have changed in many cases since she wrote her last Prefabulous book in 2016 Although this book includes some of the best older companies it also includes houses built by new up and coming manufacturers
