Confronting Climate Change Irving M. Mintzer,1992-06-11

Confronting Climate Change is a guide to the risks dilemmas and opportunities of the emerging political era in which the impacts of a global warming could affect all regional public and even individual decisions Written by a renowned group of scientists political analysts and economists all with direct experience in climate change related deliberations Confronting Climate Change is a survey of the best available answers to three vital questions What do we know so far about the foreseeable dangers of climate change How reliable is our knowledge What are the most rewarding ways to respond The book begins by exploring the key linkages and feedbacks that connect the risks of rapid climate change to other important environmental economic and political problems of our time Recognizing persistent uncertainties in the scientific understanding of climate change the book draws attention to those areas of research which may reveal surprises which could change the sense of political urgency surrounding the climate problem as did the discovery of the Antarctic ozone hole It explores the geological record of climate change over the Earth s history seeking a better understanding of how the climate has changed rapidly in countries while minimizing the long term environmental damages which otherwise will result from continuing the current patterns of energy supply and use The book is written to cross discipline boundaries so that policy makers economists scientists risk assessors environmentalists and development advocates may understand each other s concerns It shows how the international debate on managing the risks of rapid climate change may be re shaped for the benefit of people in every nation on the planet **Complete Guide for MAT and other MBA Entrance Exams 4th Edition**
