**Librarianship and Human Rights** Toni Samek, 2014-07-21 In this book the reader will encounter a myriad of urgent library and information voices reflecting contemporary local national and transnational calls to action on conflicts generated by failures to acknowledge human rights by struggles for recognition and representation by social exclusion and the library institution's role therein These voices infuse library and information work worldwide into social movements and the global discourse of human rights they depict library and information workers as political actors they offer some new possibilities for strategies of resistance and they challenge networks of control This book's approach to library and information work is grounded in practical critical and emancipatory terms social action is a central pattern This book is conceived as a direct challenge to the notion of library neutrality especially in the present context of war revolution and social change This book for example locates library and information workers as participants and interventionists in social conflicts The strategies for social action worldwide documented in this book were selected because of their connection to elements of the Universal Declaration of Human Rights 1948 that relate particularly to core library values information ethics and global information justice The first monograph of its kind Locates librarianship front and centre in knowledge societies Mainstreams critical librarianship

*Beyond Article 19* Julie Biando Edwards, Stephan P. Edwards, 2010 *Beyond Article 19* Libraries and Social and Cultural Rights addresses the subject of libraries and cultural rights a topic that has received relatively little attention in the past but which librarians and others concerned with human rights are beginning to recognize and talk about Librarians have long been concerned with individual rights and have worked tirelessly indeed making it a basic tenet of the profession to protect and preserve those rights Little has been written about the role that libraries can play in protecting and promoting group rights specifically cultural rights This book examines this shortfall by exploring the relationship between libraries cultural rights and community life and identity Library + Information Update, 2007 Educating for Human Rights and Global Citizenship Ali A. Abdi, Lynette Shultz, 2009-01-01 Nearly sixty years after the Universal Declaration of Human Rights in spite of progress on some fronts we are in many cases as far away as ever from achieving an inclusive citizenship and human rights for all While human rights violations continue to affect millions across the world there are also ongoing contestations regarding citizenship In response to these and related issues the contributors to this book critique both historical and current practices and suggest several pragmatic options highlighting the role of education in attaining these noble yet unachieved objectives This book represents a welcome addition to the human rights and global citizenship literature and provides ideas

for new platforms that are human rights friendly and expansively attuned toward global citizenship      Libraries and Society Wendy Evans, David Baker, 2011-04-30 This book reviews both the historical and future roles that public private academic and special libraries have in supporting and shaping society at local regional national and international levels Globalisation economic turmoil political and ethnic tensions rapid technology development global warming and other key environmental factors are all combining in myriad and complex ways to affect everyone both individually and collectively Fundamental questions are being asked about the future of society and the bedrock organisations that underpin it Libraries and Society considers the key aspects of library provision and the major challenges that libraries however defined managed developed and provided now face and will continue to face in the future It also focuses on the emerging chapter in cultural economic and social history and the library's role in serving diverse communities within this new era Looks at all types of library in a period of major and discontinuous change tackling the fundamental questions of the future of libraries in the context of major societal political and environmental issues Poses important questions for the profession and policy development Fills a major gap in literature recent discourse and debate on the future of democracy for example the library is rarely included

just about information in context or about libraries and their mission. Importantly it also covers the required competencies of professional librarians laying a firm foundation for future courses. In this second edition each chapter has been revised and updated to take into account current thinking and references. As with the first edition the book is organized around the foundations of the profession and key functional areas. Questions such as how to think like a librarian and how to facilitate community development are specifically and explicitly addressed. In compiling the book the editors sought out the leading thinkers, educators and practitioners in each core area as chapter authors. Each of the contributors provides an introduction to the knowledge, skills and abilities associated with their respective area of expertise, discusses current and emerging applications and explores trends and issues.

**Ethics and Values in Librarianship** Wallace Koehler, 2015-09-01. *Ethics and Values in Librarianship: A History* addresses the processes of development of library and information sciences largely but not exclusively in a western context. It focuses on the field's ethics and values. Here Wallace Koehler, a leading researcher in the area of information ethics, debunks the prevailing notion that library and information science concepts and ethics have and remain constant. He demonstrates that in almost all areas of practice this is simply not so. Instead of staying the same, our professional ethics and standards have evolved or shifted in their application as well as in the recognition of those standards by practitioners and users. Some of these changes are of very recent etiology. Topics covered include the freedom of expression, intellectual freedom, libraries and democracy, intellectual property, copyright and fair use, and professional qualifications and credentialing. Koehler examines the development of and changes to library and information science through practice and the writings of library and information theorists and practitioners from Varro during the reign of Julius Caesar to the present. He documents technological and social changes that have had foundational implications for the information professions and argues that ethical standards may be redefined overtime and new standards may emerge. Older precepts and newer ones coexist. Not only a history, this is also one of the few contemporary books suitable for use in foundational courses and courses covering information and library ethics.

**Humanizing LIS Education and Practice** Keren Dali, Nadia Caidi, 2020-10-29. *Humanizing LIS Education and Practice: Diversity by Design* demonstrates that diversity concerns are relevant to all and need to be approached in a systematic way. Developing the Diversity by Design concept articulated by Dali and Caidi in 2017, the book promotes the notion of the diversity mindset. Grouped into three parts, the chapters within this volume have been written by an international team of seasoned academics and practitioners who make

diversity integral to their professional and scholarly activities Building on the Diversity by Design approach the book presents case studies with practice models for two primary audiences LIS educators and LIS practitioners Chapters cover a range of issues including but not limited to academic promotion and tenure the decolonization of LIS education engaging Indigenous and multicultural communities librarians professional development in diversity and social justice and the decolonization of library access practices and policies As a collection the book illustrates a systems thinking approach to fostering diversity and inclusion in LIS integrating it by design into the LIS curriculum and professional practice Calling on individuals organizations policymakers and LIS educators to make diversity integral to their daily activities and curriculum Humanizing LIS Education and Practice Diversity by Design will be of interest to anyone engaged in research and professional practice in Library and Information Science
