*JEmbedAll manual* Dan-Marius Sabau, 2017-01-29 JEmbedAll is a Joomla component and plugin that you can purchase from <http://www.goldengravel.eu> something you can add to your website and start embedding videos, images and more other features to your site. The role of the component is mainly to configure the data you are embedding using the plugin but it also offers support for downloading files and generating ebooks. The package is easy to configure and to work with. Some features have to be configured there is a configuration section just for that in the backend in order to be embedded and used properly in the frontend other features are integrated and you just use them as they are. Even so you may set some details right using the CSS attached to the predefined or user defined strings used for embed code on your Joomla site. Purchase it and download the package for your Joomla version then install it in order to have a powerful tool to embed videos from YouTube, Google, Vimeo, Metacafe, Veoh, Dailymotion, RedTube and others documents, images and Google forms used for quiz. You can also embed Facebook pages, plugins, images and videos. Community Builder advanced searches, Prezi and Scribd documents. Starting with the 1.3 version you can configure and embed any number of conditional forms and you can configure the Open Graph protocol and Twitter cards data with all the data and thumbnails ready for Facebook and all the sites. The online manual and the generated ebook based on it are very detailed about each feature but you can always ask questions when you don't understand something or they are not clear enough. The only condition to embed the videos and files is that they have to be online upload your videos on YouTube or Vimeo for example and upload your files the documents can be Portable Document Format PDFs, Word docs, Power Point, SpreadSheets and any other documents recognized by Google Docs on your server or Google servers and embed them into your sites. The path of the document does not have to be some on docs.google.com but that works fine it works as well they are on any other website but you have to enter the full path of the file. You can define, configure and embed any number of jQuery images, sliders into your site. You can define and use any number of Popups on your Joomla site. You can embed Google maps and directions into your site. You can define and configure file packages they can contain any number of files the visitors can download for free or for money. Paypal payment included. You can define, configure and embed Community Builder advanced searches this component works with any CB version. Since JEmbedAll version 1.3 the search results can open in the same window in a different window or in a modal window. Beyond that you can give every user several powerful tools they can save the search forms and search results they can embed those saved search results as users lists they can use CB privacy a tool that restricts access to some fields or even the users on searches. You can embed Facebook pages, posts, videos and images depending on the Facebook privacy in many cases all this have to be public for everyone to see but you can also embed some plugins Facebook activity, comments, facepile, likebox and recommendations. Starting with the 1.5 version you can generate and download e-books based on your website content. The Paypal payment was modified and extended you can create shopping carts for files you want to sell and the generated e-books.
