The New Urban Paradigm Joe R. Feagin, 1998 His assessment of the historical conditions and institutions that protect class and racial privileges makes it clear why people in cities rebel and why social scientists should focus future research on large scale urban transformation

The Social Production of Urban Space M. Gottdiener, 2010-07-22 From reviews of the first edition This is perhaps the best theoretically oriented book by a United States urban sociologist since the work of Firey Hawley and Sjoberg in the 1940s and 1950s Gottdiener is on the cutting

edge of urban theoretical work today Joe R Feagin Contemporary Sociology Since its first publication in 1985 The Social Production of Urban Space has become a landmark work in urban studies In this second edition M Gottdiener assesses important new theoretical models of urban space and their shortcomings including the global perspective the flexible accumulation school postmodernism the new international division of labor and the growth machine perspective Going beyond the limitations of these and older theories Gottdiener proposes a model of urban growth that accounts for the deconcentration away from the central city that began in the United States in the 1920s and continues today Sociologists political scientists economists geographers and urban planners will find his interdisciplinary approach to urban science invaluable as it is currently the most comprehensive treatment of European and American work in these related fields

Research Handbook on Urban Sociology Miguel A. Martínez, 2024-04-12 Emphasising the social critical and situated dimensions of the urban this comprehensive Research Handbook presents a unique collection of theoretical and empirical perspectives on urban sociology Bringing together expert contributors from across the world it provides a rich overview and research agenda for contemporary urban sociological scholarship **Encyclopedia of Urban Studies** Ray Hutchison, 2010 An encyclopedia about various topics relating to urban studies *Encyclopedia of Urban Studies: N-Z; index* Ray Hutchison, 2010 Covers all aspects of cities their suburbs and other urban areas Includes urban economics urban planning urban architecture urban ecology urban transportation systems urban politics and urban social relations **The New Urban Sociology** Gottdiener, **The Sociology of Community Connections** John G. Bruhn, 2011-07-18 Many of our current social problems have been attributed to the breakdown or loss of community as a place and to the fragmentation of connections due to an extreme value of individualism in the Western world particularly in the United States Not all scholars and researchers agree that individualism and technology are the primary culprits in the loss of community as it existed in the middle decade of the 20th century Nonetheless people exist in groups and connections are vital to their existence and in the daily performance of activities The second edition of the Sociology of Community Connections will identify and help students understand community connectedness in the present and future Space and Social Theory Andrzej J L Zieleniec, 2007-10-29 The importance of the spatial dimension of the structure organization and experience of social relations is fundamental for sociological analysis and understanding Space and Social Theory is an essential primer on the theories of space and inherent spatiality guiding readers through the contributions of key and influential theorists Marx Simmel Lefebvre Harvey and Foucault Giving an essential and accessible overview of social theories of space this books shows why it matters to understand these theorists spatially It will be of interest to upper level students and researchers of social theory urban sociology urban studies human geography and urban politics An Analysis of Jane Jacobs's The Death and Life of Great American Cities Martin Fuller, Ryan Moore, 2017-07-05 Despite having no formal training in urban planning Jane Jacobs deftly explores the strengths and weaknesses of policy arguments put forward by American urban planners in the era after

World War II They believed that the efficient movement of cars was of more value in the development of US cities than the everyday lives of the people living there By carefully examining their relevance in her 1961 book *The Death and Life of Great American Cities* Jacobs dismantles these arguments by highlighting their shortsightedness She evaluates the information to hand and comes to a very different conclusion that urban planners ruin great cities because they don't understand that it is a city's social interaction that makes it great Proposals and policies that are drawn from planning theory do not consider the social dynamics of city life They are in thrall to futuristic fantasies of a modern way of living that bears no relation to reality or to the desires of real people living in real spaces Professionals lobby for separation and standardization splitting commercial residential industrial and cultural spaces But a truly visionary approach to urban planning should incorporate spaces with mixed uses together with short walkable blocks large concentrations of people and a mix of new and old buildings This creates true urban vitality

Gentrification and Diversity Lidia Katia C. Manzo, 2023-07-20 This book examines lived experiences of making inhabiting and appropriating space in relation to the upscale commercial gentrification of the Milan Chinatown It inquires about the significance of diverse neighborhoods as emerging multicultural spaces Are we talking about neighborhood entrepreneurs providing services and entertainment to create local urban culture or are we talking about political economic forces in the commodification of ethnic and cultural diversity Starting from these questions this book uses innovative visual ethnography and critical urban research to understand the relationship between community based entrepreneurs local politics residents sense of belonging and patterns of city branding strategies in Milan the fashion capital of Italy This book is intended for researchers and students in the fields of sociology anthropology urban studies geography and urban planning Additionally it is appropriate for practitioners in the fields of urban planning housing policies and community development
