Governing Work And Welfare In A New Economy European And American Experiments:

Governing Work and Welfare in a New Economy Jonathan Zeitlin, David M. Trubek, 2003 Social Rights and Market Freedom in the European Constitution Stefano Giubboni, 2006-01-12 This is an account of the development of European labour and social security law as it interrelates with the evolution of market integration in the European Union Giubboni presents from a labour law perspective a case study of the changes the European Community European Union has undergone from its origins to the present day and of the ways these changes have affected the regulation of European Welfare States at national level Drawing on the idea of embedded liberalism Giubboni analyses the infiltration of EC competition and market law into national systems of labour and social security law and provides a normative framework for conceptualising the transformation of regulatory techniques implemented at the EU level This important interdisciplinary contribution to research in EU social law illustrates how the vision of social protection and solidarity is changing **The Open Method of Co-ordination in Action** Lars Magnusson, 2005 The contributors in this volume examine the practical operations at national and subnational levels of the European Employment and Social Inclusion Strategies which are the most important examples of the Open Method of Co ordination as a new instrument of EU governance **State Territoriality and European Integration** Michael Burgess, Hans Vollaard, 2006-09-27 The European nation state is now placed between the interconnected processes of globalization and European integration This new book examines these evolving relationships showing how the conventional territorial basis of the state is being reappraised Bringing together leading thinkers on the nation state this volume tackles key questions about how we should conceptualize and discuss the political significance of territory in today s world For example does the era of Europeanization and globalization herald the end of citizens traditional attachment to their national territories Do our conceptions of the state no longer correspond to contemporary political realities These questions are approached from a range of positions that illuminate the debates now taking place across the world This book delivers a clear set of key concepts indicators and theoretical notions to carry out a historically and empirically grounded examination Drawing upon case studies from across Europe the lessons and conclusions detailed have a fascinating international scope and can be applied to our understanding of globalization which is intimately connected with European integration This is an invaluable book for all students of European integration political science and international relations United in Diversity? Jens Alber, Neil Gilbert, 2010 This is the first volume in the International Policy Exchange Series edited by Douglas J Besharov and Neil Gilbert *The Theory and Practice of Local Governance and Economic Development* M. Considine, S. Giguere, 2008-02-14 This book provides a comparative study of the use of partnerships and new forms of governance to achieve policy goals that promote economic and social development In addition to a consideration of the theoretical challenges posed by these institutional developments the book reviews recent experiences in Asia Pacific Europe and North America After the Financial Crisis Pablo Iglesias-Rodriguez, Anna

Triandafyllidou, Ruby Gropas, 2016-10-14 This international collection studies how the financial crisis of 2007 and the ensuing economic and political crises in Europe and North America have triggered a process of change in the field of economics law and politics Contributors to this book argue that both elites and citizens have had to rethink the nature of the market the role of the state as a market regulator and as a provider of welfare the role of political parties in representing society's main political and social cleavages the role of civil society in voicing the concerns of citizens and the role of the citizen as the ultimate source of power in a democracy but also as a fundamentally powerless subject in a global economy The book studies the actors the areas and the processes that have carried forward the change and proposes the notion of incomplete paradigm shift to analyse this change Its authors explore the multiple dimensions of paradigm shifts and their differentiated evolution arguing that today we witness an incomplete paradigm shift of financial regulations economic models and welfare systems but a stillbirth of a new political and economic paradigm

The Oxford Handbook of Comparative Institutional Analysis Glenn Morgan, John Campbell, Colin Crouch, Ove Kaj Pedersen, Richard Whitley, 2010-04-08 It is increasingly accepted that institutions matter for economic organization and outcomes The last decade has seen significant expansion in research examining how institutional contexts affect the nature and behaviour of firms the operation of markets and economic outcomes Yet institutions conceal a multitude of issues and perspectives Much of this research has been comparative and followed different models such as varieties of capitalism national business systems and social systems of production This Handbook explores these issues perspectives and models with the leading scholars in the area contributing chapters to provide a central reference point for academics scholars and students

The Future of Labour Law B. A. Hepple, 2004-10 This book by an internationally distinguished group of scholars examines the future of labour law from a wide variety of perspectives

Local Players in Global Games Peer Hull Kristensen, Jonathan Zeitlin, 2005 What happens when previously autonomous firms from different countries each with their own identities routines and capabilities come together inside a single multinational corporation This book tackles this question through an empirical study of the strategic constitution of a multinational

A European Social Citizenship? Lars Magnusson, Bo Stråth, 2004 The aim of this book is to explore and reflect upon preconditions of a specific European social dimension or more specifically of a European social citizenship Welfare and social policies in Europe are deeply entrenched in state histories the success of the welfare state stems from its ability during a fairly long historical period to unify social citizenship full employment mass education and a functional industrial relations system The historical connection between welfare regimes built upon the nation state and popular democracy founded in party voting makes the deepening and widening of a common European project a highly risky undertaking and an open process with a radically uncertain outcome The dilemma in the form of uneasy relationships among national welfare regimes and the evolutionary process of increased market integration driven both by market forces globalisation and the European Union as a political project is well known and has been demonstrated by different

commentators Every step of deepening market integration in Europe tends to threaten and put pressure on the existing national welfare regimes As their own populations generally support them the legitimacy of the EU is at risk The book analyses the prospects of a coordinated social dimension at the European level matching the market integration and what role the concept of citizenship can play in such a scenario

Rescaling Social Policies towards Multilevel Governance in Europe Yuri Kazepov, 2017-10-24 The workings of multi level governance institutional choices concerning centralisation decentralisation and subsidiarity are widely debated within European public policy but few systematic studies assessing the effects of changing divisions of power for policy making have been carried out This volume offers an assessment of the workings of multi level governance in terms of social welfare policy across different clusters of European states Nordic Southern European Central and East European This book reports on a major comparative study at the European Centre for Social Welfare policy and Research which included partners from universities in Finland France Italy Norway Sweden Poland Spain and Switzerland It reports on three particular policy areas social assistance and local policies against poverty activation and labour market policies and care for the elderly The authors describe different starting points strategies and solutions in European countries which are facing similar challenges and could thus learn from each other They explore the differences between European welfare regimes in terms of territorial responsibilities the changes that have taken place over the past few years and their effects The book is distinctive in highlighting comparative transversal and transnational issues of multi level governance in social welfare policies rather than presenting country reports

Law and Globalization from Below Boaventura de Sousa Santos, César A. Rodríguez-Garavito, 2005-09-08 This book is an unprecedented attempt to analyze the role of the law in the global movement for social justice Case studies in the book are written by leading scholars from both the global South and the global North and combine empirical research on the ground with innovative sociolegal theory to shed new light on a wide array of topics Among the issues examined are the role of law and politics in the World Social Forum the struggle of the anti sweatshop movement for the protection of international labour rights and the challenge to neoliberal globalization and liberal human rights raised by grassroots movements in India and indigenous peoples around the world These and other cases the editors argue signal the emergence of a subaltern cosmopolitan law and politics that calls for new social and legal theories capable of capturing the potential and tensions of counter hegemonic globalization

Capitalist Diversity and Change Colin Crouch, 2005-10-06 Over the last decade the neo institutionalist literature on comparative capitalism has developed into an influential body of work In this book Colin Crouch assesses this literature and proposes a major reorientation of the field Crouch critiques many aspects of this work and finds a way of modelling how creative actors trying to achieve change institutional entrepreneurs tackle these constraints Central to the account is the concept of governance as it

is by recombining governance mechanisms that these entrepreneurs must achieve their goals In seeking how to analyse the spaces in which they operate Crouch criticises and deconstructs some dominant approaches in socio political analysis to typologies to elective affinity and complementarity to path dependence He develops a theory of governance modes which includes potentially decomposing them into their core components Finally he proposes a reorientation of the neo institutionalist research programme to take more account of detailed diversity and potentiality for change The book is primarily theoretical but it makes liberal use of examples particularly from studies of local economic development and politics

The Political and Social Construction of Poverty Serena Romano, 2014-01-01 This book is the first to examine the social and political construction of anti poverty programs in Central and Eastern Europe which has faced serious hardships as it has transitioned from communist rule to capitalism beset by economic crisis It explores a range of different attitudes held about poverty stricken people and illustrates how the distinction between deserving and undeserving poor has evolved over the years effected by external pressures from groups like the European Union and World Bank By examining poverty policies against the commonly held attitudes about the poor that have influenced them Serena Romano offers a new understanding of the many ways that different post communist welfare states have dealt with and understood citizens facing economic hardship
