PREAMBLE

The American Physical Therapy Association (APTA) is committed to meeting the physical therapy needs of society, to meeting the needs and interests of its members, and to developing and improving the art and science of physical therapy, including practice, education and research. To help meet these responsibilities, APTA's Board of Directors has approved the following guidelines for physical therapy documentation. It is recognized that these guidelines do not reflect all of the unique documentation requirements associated with the many specialty areas within the physical therapy profession. Applicable for both hand written and electronic documentation systems, these guidelines are intended to be used as a foundation for the development of more specific documentation guidelines in clinical areas, while at the same time providing guidance for the physical therapy profession across all practice settings. Documentation may also need to address additional regulatory or payer requirements.

Finally, be aware that these guidelines are intended to address documentation of patient/client management, not to describe the provision of physical therapy services. Other APTA documents, including APTA Standards of Practice for Physical Therapy, Code of Ethics and Guide for Professional Conduct, and the Guide to Physical Therapist Practice, address provision of physical therapy services and patient/client management.

APTA POSITION ON DOCUMENTATION

Documentation Authority For Physical Therapy Services

Physical therapy examination, evaluation, diagnosis, prognosis, and plan of care (including interventions) shall be documented, dated, and authenticated by the physical therapist who performs the service. Interventions provided by the physical therapist or selected interventions provided by the physical therapist assistant under the direction and supervision of the physical therapist are documented, dated, and authenticated by the physical therapist or, when permissible by law, the physical therapist assistant.

Other notations or flow charts are considered a component of the documented record but do not meet the requirements of documentation in or of themselves.

Students in physical therapist or physical therapist assistant programs may document when the record is additionally authenticated by the physical therapist or, when permissible by law, documentation by physical therapist assistant students may be authenticated by a physical therapist assistant.
