Mergent International Manual, 2009 Sustainable Energy And Environmental Technologies - Proceedings Of The Third Asia Pacific Conference Xijun Hu, Po Lock Yue, 2000-11-28 With the rapid expansion of the Asia Pacific economy in the last decade and the recovery after the recent crisis severe demands will be placed on energy services and the environment. Coping with the volatile oil prices that persist in the market introduces an additional factor into the energy supply and demand equation not just for countries in this region but also worldwide. Inevitably there will be implications for environmental issues too. The future will see a continuing challenge to balance growth with sustainability in the economic, social and environmental sectors. This conference, a sequel to the immensely successful APCSEET conferences held in Singapore and Australia, is aimed at meeting that challenge by addressing the pertinent issues related to sustainable energy and environmental protection. It provides a forum for participants from academia, industry and government agencies to interact, report on research in progress and identify opportunities in the fields of sustainable energy and environmental technologies. The presentations include not only technical issues such as air pollution control, wastewater treatment, solid waste management, renewable energy and cleaner production but also education and policy issues.

In addition, important topics such as ethics, privacy and security are considered in a reality where all data is shared and saved remotely. The collection of contributions serve a very broad audience working in the fields of science and engineering, chemical engineering, materials science, nanotechnology, energy, environment, green chemistry, sustainability, electrical and electronic engineering, solid state physics, surface science, aerosol technology, chemistry, colloid science, device engineering and computer technology.
