environmental conservation Mountain Area Research and Management Martin F. Price, 2013-06-17 This book brings together scientists and practitioners from five continents to present their experience in undertaking activities that contribute to our understanding and informed management of mountain areas. In particular they address the challenges of working in interdisciplinary teams and of effectively involving stakeholders. The result is a powerful book that integrates research from different disciplines in the natural and social sciences and in some cases indigenous knowledge to address the question of how knowledge is gained about mountain areas and how can it be integrated and used in effective management. A comprehensive introduction covers the challenges in mountain area research and management and the need for integrated approaches. This is followed by chapters that look at key areas of mountain research and management over the past 25 years covering inter and trans disciplinary research subsistence cultures and sustainable development innovations in watershed management and biodiversity conservation. Subsequent chapters cover key areas of research and management on five continents with a focus on comparison of common challenges and solutions across regions. The concluding chapter brings these experiences together. Published with Parks Canada **Mountains of Northern Europe** Scottish Natural Heritage, Centre for Mountain Studies, 2005-10-03 This publication contains the proceedings of an international conference held in Pitlochry, Scotland, in November 2002 to mark the UN International Year of Mountains 2002. The conference participants discussed the state of current knowledge about the mountains of Northern Europe and considered issues arising from the interactions between people and nature and the conservation and sustainable development activities needed to benefit the natural heritage of mountain regions in the UK, Norway and Sweden, Finland and Iceland Mountain Geography Martin F. Price, 2013-08-24 Mountain Geography is a comprehensive resource that gives readers an in-depth understanding of the geographical processes that occur in the world's mountains and the impact of these regions on culture and society. The volume begins with an introduction that defines mountains followed by a comprehensive treatment of their physical geography including origins, climatology, snow and ice, landforms and geomorphic processes, soils, vegetation and wildlife. The concluding chapters discuss the human geography of mountains and our attitudes toward them, populations in the mountain regions and their livelihoods and interactions within dynamic environments, the diversity of mountain agriculture and the challenges of sustainable mountain development. Book Jacket **Mount Baker-Snoqualmie National Forest (N.F.), Crystal Mountain Master Development Plan**, 2004 *Nature, Tourism and Ethnicity as Drivers of (De)Marginalization* Stanko Pelc, Miha Koderman, 2017-08-01 This book considers de-marginalization, attesting that marginal regions have the potential for de-marginalization and are anchored in developmental terms on the following core themes: nature, tourism, ethnicity and general factors including migration. Adding to the discussion on marginality and sustainability, this book contributes a number of case studies on a diverse selection of topics and regions in which these crucial issues connect. It delivers a reflection of de-marginalizing processes in today's globalized world where an increasing number of people groups

societies and regions are marginalized and vulnerable not only from social and economic factors but also from natural causes such as natural hazards This book addresses the unsustainable practices in the past that have often generated difficult conditions for sustainable development in the future Marginal regions that have not been developed are given much needed consideration as they may now enjoy the benefits of having not been exploited in the past to their present day developmental advantage The overview offered by this book is significant in that marginal regions with relatively unspoiled and attractive natural and cultural landscapes have a great potential for sustainable tourism Contributions include the de marginalization of ethnic groups the role of education and migration in the process and different economic and political perspectives Considering the topics covered the book should be appreciated by all those involved in creation of social policies urban and regional planning coordinating economic with spatial and social development and by those studying in the fields where competencies for such activities are important part of the study program
