Key Topics In Second Language Acquisition Mm Textbooks:

Key Topics in Second Language Acquisition Vivian Cook, David Singleton, 2014-04-02 This textbook offers an introductory overview of eight hotly debated topics in second language acquisition research. It offers a glimpse of how SLA researchers have tried to answer common questions about second language acquisition rather than being a comprehensive introduction to SLA research. Each chapter comprises an introductory discussion of the issues involved and suggestions for further reading and study. The reader is asked to consider the issues based on their own experiences thus allowing them to compare their own intuitions and experiences with established research findings and gain an understanding of methodology. The topics are treated independently so that they can be read in any order that interests the reader. The topics in question are how different languages connect in the mind, whether there is a best age for learning a second language, the importance of grammar in acquiring and using a second language, how the words of a second language are acquired, how people learn to write in a second language, how attitude and motivation help in learning a second language, the usefulness of second language acquisition research for language teaching, the goals of language teaching.

Learning and Teaching for Teachers Pradeep Kumar Misra, 2021-10-18 This book provides a comprehensive and balanced description of learning and teaching by connecting it to secondary and higher education teachers' experiences and practices in day to day life. Woven around research conducted by educationists, psychologists and practitioners around the globe, this book presents key concepts and addresses significant discussions and concerns with regard to learning and teaching in the present age. Seeking to help teachers understand learners' learning needs, preferences and styles and manage their teaching plans, priorities and practices accordingly, it details the main ideas and emerging practices related to learning and teaching in a very easy to read, understand and practice way. The first five chapters approach learning from different perspectives while the next six explain in detail how to practice teaching to maximize learning outcomes. Combining the traditional textbook style approach of content description with a self-learning approach based on various real world situations and activities related to both learning and teaching, this textbook is particularly valuable for teachers in school education, higher education and teacher education. This book is also an essential resource for fulfilling teachers' continuing professional development requirements.

Although intended for teachers worldwide the book especially helps teachers in South Asian countries to improve learning outcomes in their classrooms and subsequently the quality of their education systems
