Government Employees Relations Report ,1979 *Not Working* Alejandra Marchevsky,Jeanne Theoharis,2006-04-10 Not Working chronicles the devastating effects of the 1996 welfare reform legislation that ended welfare as we know it For those who now receive public assistance work means pleading with supervisors for full time hours juggling ever changing work schedules and shuffling between dead end jobs that leave one physically and psychically exhausted Through vivid story telling and pointed analysis Not Working profiles the day to day struggles of Mexican immigrant women in the Los Angeles area showing the increased vulnerability they face in the welfare office and labor market The new work first policies now enacted impose time limits and mandate work requirements for those receiving public assistance yet fail to offer real job training or needed childcare options ultimately causing many families to fall deeper below the poverty line Not Working shows that the new welfare to work regime has produced tremendous instability and insecurity for these women and their children Moreover the authors argue that the new politics of welfare enable greater infringements of rights and liberty for many of America s most vulnerable and constitute a crucial component of the broader assault on American citizenship In short the new welfare is not working *Homelessness* Marjorie J. Man in Adaptation Yehudi A. Cohen, 2017-07-12 How do specific activities and institutions in which people are involved fit into the overall adaptive strategy of their society? What are the particular pressures leading to change in each of these spheres when the group's strategy of adaptation changes? What are the human demands made by a hunting-gathering strategy that lead to the development of particular family systems, modes of social control, religious beliefs and practices, values and ideologies, and personality structures? What are the new human demands that lead to the reorganization of these aspects of life as the group moves from one level of development to another?

Man in Adaptation: The Institutional Framework introduces the institutional, psychological, and ideological dimensions of the strategies of adaptation that have characterized human societies from the earliest known forms of social life to the present. Cohen includes topics that are of principal anthropological concern, notably marriage, law, and social control, religion and magic, value systems, personality, and art. There are no studies that deal with cultural change as such in this book. Where possible, Cohen includes articles that deal with changes in particular spheres of activity, such as family organization, law, religion, and value systems. He argues that change is not a special situation. Instead, culture is change and change is culture, and it is unrealistic to study change outside the specific social and technological organization of a given society. This volume unifies the subject matter of anthropology within a single and powerful explanatory framework and incorporates the work of the most renowned anthropological experts on man.
