En el año 2020 todo el mundo que nos rodea es digital. Puede que no seamos conscientes o por lo menos no plenamente conscientes de ello pero si nos paramos a pensar unos minutos en nuestro entorno diario nos daremos cuenta de la gran cantidad de tecnología que envuelve nuestras vidas. Los grandes avances que hemos experimentado en los últimos años tanto en los dispositivos como en las comunicaciones han conseguido transformar no solo la tecnología sino todo lo que hacemos. El modo en el que trabajamos, nos comunicamos, nos relacionamos, jugamos, aprendemos cualquier aspecto de nuestra vida estaba de una manera u otra por el mundo digital. Las ventajas que esta nueva revolución ha aportado a nuestro día a día son evidentes pero no podemos perder de vista las nuevas amenazas que han surgido hacia nuestra seguridad. Si la tecnología modifica el mundo el crimen no podrá dejar pasar la oportunidad de aprovecharse de ella para aumentar sus beneficios disminuyendo sus propios riesgos. Ante este nuevo escenario es de vital importancia que tanto las Fuerzas y Cuerpos de seguridad del Estado que deben luchar contra la delincuencia como los responsables de seguridad de los sistemas estén suficientemente preparados para prevenir y hacer frente a los ataques que se vayan a producir a través de estos medios. Y para conseguirlo el primer paso que se debe dar es conocer la forma en la que estos cibercriminales actúan y las herramientas que tenemos en nuestra mano para mantenernos a salvo en otras palabras convertirse en un hacker. The Art of Hacking Anto.Y,2012-03 Hacker is a person who uses his creativity and knowledge to overcome limitations often in technological contexts Introduction About Hacking If you ask a random person on the street what a hacker is they might recall ever seeing the word in connection to some criminal who

hacked some website and stole for example credit card data This is the common image the media sketches of the hacker The somewhat more informed person might think that a hacker is not really a criminal but somebody with a lot of knowledge about computers and security Of course this second definition is a lot better than the first one but I still don t think it catches the essence of what makes one a hacker First of all hacking hasn t necessarily got to do with computers There have been hackers in the Medieval Ages and maybe even in the Stone Ages The fact that they used other means to express their skills and knowledge doesn t make them less than any hacker in the modern ages We are just blessed with the fact that at this moment we are all surrounded by technology a lot of people even are dependent of it *El libro del Hacker.
