Key Themes In Media Theory:

Key Themes In Media Theory Laughey, Dan, 2007-10-01 Key Themes is a critical introduction to key theories of media for undergraduate students The 21st Century Media (r)evolution Jim Macnamara, 2010 The emergence of new media and social media is widely discussed in contemporary society However media and public communication are mostly analyzed within particular theoretical frameworks and within specific disciplinary fields Such approaches have created polarized views on media and communication and fail to create an understanding of the interdependencies between these fields This book expertly synthesizes competing theories and disciplinary viewpoints integrates scholarly and cutting edge research and examines international data from fast growing markets including China to provide a comprehensive holistic view of the twenty first century r evolution in media and public communication The book identifies how the changes are located in practices rather than technologies and that these practices are emergent in highly significant ways Engaging and accessible the book is essential reading for media scholars and communication professionals and a valuable text for courses in media studies journalism advertising public relations and organisational and political communication **McQuail's Mass Communication Theory** Denis McQuail, 2010-03-12 McQuail s Mass Communication Theory has been the benchmark for studying mass communication theory for more than 25 years It remains the most authoritative and comprehensive introduction to the field and still offers unmatched coverage of the research literature Fully up to date this new edition includes New boxed case studies on key research publications familiarizing students with the critical research texts in the field A new streamlined structure for better navigation More definitions examples and illustrations throughout to bring abstract concepts to life Major updates on new media globalization work and economy McQuail s Mass Communication Theory is the indispensable resource no student of media studies can afford to be without Reading Media Theory Brett Mills, David M. Barlow, 2014-06-11 What does the Frankfurt School have to say about the creative industries Does the spread of Google prove we now live in an information society How is Madonna an example of postmodernism How new is new media Does the power of Facebook mean we re all media makers now This groundbreaking volume part reader part textbook helps you to engage thoroughly with some of the major voices that have come to define the landscape of theory in media studies from the public sphere to postmodernism from mass communication theory to media effects from production to reception and beyond But much more than this by providing assistance and questions directly alongside the readings it crucially helps you develop the skills necessary to become a critical informed and analytical reader Each reading is supported on the facing page by author annotations which provide comments dissect the arguments explain key ideas and terminology make references to other relevant material and pose questions that emerge from the text Key features Opening chapters What is theory and What is reading bring alive the importance of both as key parts of media scholarship Pre reading substantial Introductory sections set each text and its author in context and show the relevance of the reading to contemporary culture Post reading

Reflection sections summarise each reading's key points and suggest further areas to explore and think about. 4 types of annotations help you engage with the reading context, content, structure and writing style as well as questions to provoke further thought. Split into 4 sections: Reading theory, Key thinkers and schools, Approaches and Media Theory in context. New to the second edition: New chapters on New Media and Audiences as Producers. Reading Media Theory will assist you in developing close reading and analytic skills. It will also increase your ability to outline key theories and debates, assess different case studies, critically link theoretical approaches to a particular historical context and to structure and present an argument. As such, it will be essential reading for undergraduate and postgraduate students of media studies, cultural studies, communication studies, the sociology of the media, popular culture and other related subjects.

Media Studies 2.0 William Merrin, 2014-03-21. Media Studies 2.0 offers an exploration of the digital revolution and its consequences for media and communication studies, arguing that the new era requires an upgraded discipline. Media studies 2.0: The book traces the history of mass media and computing, exploring their merger at the end of the twenty century and the material, ecological, cultural and personal elements of this digital transformation. It considers the history of media and communication studies, arguing that the academic discipline was a product of the analogue broadcast era emerging in the early twentieth century as a response to the success of newspapers, radio and cinema, and reflecting that era back in its organisation, themes and concepts. Digitalisation, however, takes us beyond this analogue era. Media studies 1.0 into a new post broadcast era. Merrin argues that the digital era demands an upgraded academic discipline, one reflecting the real media life of its students and teaching the key skills needed by the twenty first century user. Media 2.0 demands a media studies 2.0. This original and critical overview of contemporary developments within media studies is ideal for general students of media and communication as well as those specifically studying new and digital media.

Media/Theory Shaun Moores, 2007-05-07. From an established author with a growing international profile in media studies, Media Theory is an accessible yet challenging guide to ways of thinking about media and communications in modern life. Shaun Moores draws on ideas from a range of disciplines in the humanities and social sciences and expertly connects the analysis of media and communications with key themes in contemporary social theory. Examining core issues of time and space, Moores also examines matters of interactions, signification and identity and argues that media studies is bound up in the wider processes of the modern world and not just about studying the media. This book makes a distinctive contribution towards rethinking the shape and direction of media studies today and for students at advanced undergraduate or postgraduate level.
