during transport A number of conclusions can be drawn from the proceedings 1 Much knowledge is available from both scientific observations and practical experience which could be used to improve the transport of livestock Methods of loading the construction of vehicles ships crates and aircraft could benefit from the application of existing knowledge It is less clear whether it is best to concentrate on disseminating existing knowledge by education and advice or to contemplate more regulations 2 Losses by down grading at slaughter can largely be attributed to the ways in which animals are transported and handled
