Mattering Victoria Pitts-Taylor, 2016-08-30 Feminists today are re imagining nature biology and matter in feminist thought and critically addressing new developments in biology physics neuroscience epigenetics and other scientific disciplines Mattering edited by noted feminist scholar Victoria Pitts Taylor presents contemporary feminist perspectives on the materialist or naturalizing turn in feminist theory and also represents the newest wave of feminist engagement with science The volume addresses the relationship between human corporeality and subjectivity questions and redefines the boundaries of human non human and nature culture elaborates on the entanglements of matter knowledge and practice and addresses biological materialization as

a complex and open process This volume insists that feminist theory can take matter and biology seriously while also accounting for power taking materialism as a point of departure to rethink key feminist issues The contributors an international group of feminist theorists scientists and scholars apply concepts in contemporary materialist feminism to examine an array of topics in science biotechnology biopolitics and bioethics These include neuralplasticity and the brain machine interface the use of biometrical identification technologies for transnational border control epigenetics and the intergenerational transmission of the health effects of social stigma ADHD and neuropharmacology and randomized controlled trials of HIV drugs A unique and interdisciplinary collection Mattering presents in grounded concrete terms the need for rethinking disciplinary boundaries and research methodologies in light of the shifts in feminist theorizing and transformations in the sciences

Gendered Bodies and New Technologies Amanda du Preez, 2009-10-02 In this era of ubiquitous information flow heightened mobility and limitless consumer convenience human interaction with new technologies has become increasingly seamless In the process the human body is effectively and steadily reduced to just another interface or a second life so to speak What is easily forgotten during this translucent transaction is that being human also necessarily implies being embodied In other words to constitute a body in its non negotiable physicality is still what it entails to be human amongst other things To live daily in and through the complicated and dynamic intersection between mind and body psychology and physiology also known as embodiment is what makes us human

Frankenstein's Daughters Jane L. Donawerth, 1997-04-01 Women Science fiction authors past and present are united by the problems they face in attempting to write in this genre an overwhelmingly male dominated field Science fiction has been defined by male centered scientific discourse that describes women as alien others rather than rational beings This perspective has defined the boundaries of science fiction resulting in women writers being excluded as equal participants in the genre Frankenstein's Daughters explores the different strategies women have used to negotiate the minefields of their chosen career they have created a unique utopian science formulated by and for women with women characters taking center stage and actively confronting oppressors This type of depiction is a radical departure from the condition where women are relegated to marginal roles within the narratives Donawerth takes a comprehensive look at the field and explores the works of authors such as Mary Shelley Marion Zimmer Bradley Ursula K Le Guin and Anne McCaffrey

Hermeneutic Philosophies of Social Science Babette Babich, 2017-10-23 Hermeneutic philosophies of social science offer an approach to the philosophy of social science foregrounding the human subject and including attention to history as well as a methodological reflection on the notion of reflection including the intrusions of distortions and prejudice Hermeneutic philosophies of social science offer an explicit orientation to and concern with the subject of the human and social sciences Hermeneutic philosophies of the social science represented in the present collection of essays draw inspiration from Gadamer's work as well as from Paul Ricoeur in addition to Michel de Certeau and Michel Foucault among others Special attention is given to Wilhelm Dilthey in addition to

the broader phenomenological traditions of Edmund Husserl and Martin Heidegger as well as the history of philosophy in Plato and Descartes The volume is indispensable reading for students and scholars interested in epistemology philosophy of science social studies of knowledge as well as social studies of technology

Investigating Cultures of Equality

Dorota Golańska,Aleksandra M. Różalska,Suzanne Clisby,2022-05-09 This volume explores the processes of investigating cultures of equality and sets out an epistemological framework for generating a more just and response able knowledge It offers a tapestry of inventive self reflexive collective and situated praxis of conducting politically informed research Such efforts contest or occasionally reinvent the social and cultural worlds that we currently inhabit in an attempt at building cultures of equality across different locations and contexts The book engages with the idea of producing knowledge with others indicating the political potential of scientific practice and offering a view of knowledge as a collective affective intellectual effort It provides an inventory of creative engagements with concepts and methodologies enabling production of socially responsible knowledges By critically exploring new possibilities of scientific inquiry the contributors reflect on how knowledge can be generated to serve the political agenda of movements for equality and social justice The chapters also elucidate different conceptualisations of and approaches to who the researcher is and how they interact with cultural and social worlds

Ghost Stories for Darwin

Banu Subramaniam,2014-10-15 In a stimulating interchange between feminist studies and biology Banu Subramaniam explores how her dissertation on flower color variation in morning glories launched her on an intellectual odyssey that engaged the feminist studies of sciences in the experimental practices of science by tracing the central and critical idea of variation in biology Subramaniam reveals the histories of eugenics and genetics and their impact on the metaphorical understandings of difference and diversity that permeate common understandings of differences among people exist in contexts that seem distant from the so called objective hard sciences Journeying into interdisciplinary areas that range from the social history of plants to speculative fiction Subramaniam uncovers key relationships between the life sciences women s studies evolutionary and invasive biology and the history of ecology and how ideas of diversity and difference emerged and persist in each field

For Better or For Worse? Collaborative

Couples in the Sciences Annette Lykknes,Donald L. Opitz,Brigitte Van Tiggelen,2012-06-05 In this volume a distinguished set

of international scholars examine the nature of collaboration between life partners in the sciences with particular attention to the ways in which personal and professional dynamics can foster or inhibit scientific practice Breaking from traditional gender analyses which focus on divisions of labor and the assignment of credit the studies scrutinize collaboration as a variable process between partners living in the nineteenth and twentieth centuries who were married and divorced heterosexual and homosexual aristocratic and working class and politically right and left The contributors analyze cases shaped by their particular geographical locations ranging from retreat settings like the English countryside and Woods Hole Massachusetts to university laboratories and urban centers in Berlin Stockholm Geneva and London The volume demonstrates how the terms and meanings of collaboration variably shaped by disciplinary imperatives cultural mores and the agency of the collaborators themselves illuminate critical intellectual and institutional developments in the modern sciences

The New Brain Sciences Dai Rees, Steven Rose, 2004-10-21 The last 20 years have seen an explosion of research and development in the neurosciences Indeed some have called this first decade of the 21st century the decade of the mind An all encompassing term the neurosciences cover such fields as biology psychology neurology psychiatry and philosophy and include anatomy physiology molecular biology genetics and behaviour It is now a major industry with billions of dollars of funding invested from both public and private sectors Huge progress has been made in our understanding of the brain and its functions However with progress comes controversy responsibility and dilemma The New Brain Sciences Perils and Prospects examines the implications of recent discoveries in terms of our sense of individual responsibility and personhood With contributing chapters from respected and influential names in neuroscience law psychology philosophy and sociology The New Brain Sciences should kick start a discussion of where neuroscience is headed

Columbia Companion to Twentieth-Century Philosophies Constantin V. Boundas, 2007 Columbia Companion to Twentieth Century Philosophies is the first guide to cover both the Anglo American analytic and European continental traditions Organized thematically the volume thoroughly discusses the major movements and fields of each tradition and features the contributions of highly distinguished specialists in their fields This book is divided into three sections The first is devoted to highlighting the multidimensional work of philosophers identified with the analytic tradition with Nicholas Rescher writing on neoidealism Josephine Donovan commenting on feminist philosophy Tyler Burge discussing the philosophy of language and mind and Robert Hanna reflecting on Kant's legacy The second section presents the thought of those who identified themselves with the continental tradition featuring Jean Grondin on hermeneutics Leonard Lawlor on phenomenology Charles Scott on postmodernism and Babette Babich on the philosophy of science This volume also covers logical positivism naturalism pragmatism aesthetics existentialism Marxism the Frankfurt School structuralism psychoanalysis political philosophy ethics and the philosophy of religion The final section addresses concurrent trends in Indian Chinese Japanese and African philosophy and a comprehensive introduction by the editor not only provides a thorough outline of the problems and issues of

the analytic and continental traditions but also boldly challenges the conviction that the two approaches must be rivals

collect responses to issues arising from high profile cases such as the legitimacy of war in Iraq to physician related suicide. The volume will provide a valuable resource for practitioners and academics with an interest in ethics across a range of disciplines.

Transforming the Disciplines Renee P Prys, Mary Jane Cherry, Susan Popham, Elizabeth L Macnabb, 2013-10-31

A jargon free non technical and easily accessible introduction to women's studies. All too many students enter academia with the hazy idea that the field of women's studies is restricted to housework, birth control, and Susan B Anthony. Their first encounter with a women's studies textbook is likely to focus on the history and sociology of women's lives. While these topics are important, the emphasis on them has led to neglect of equally important issues.

Transforming the Disciplines: A Women's Studies Primer is one of the first women's studies textbooks to show feminist scholarship as an active force changing the way we study such diverse fields as architecture, bioethics, history, mathematics, religion, and sports studies. Although this text was designed as an introduction to women's studies, it is also rewarding for upper level or graduate students who want to understand the pervasive effects of feminist theory. Most chapters provide a bibliography or list of further reading of significant works. Its clear jargon free prose makes feminist thought accessible to general readers without sacrificing the revolutionary power of its ideas.

In almost thirty essays covering a broad range of subjects from anthropology to chemistry to rhetoric, **Transforming the Disciplines** exemplifies the changes achieved by feminist thought. **Transforming the Disciplines** combines a high standard of writing and scholarship with personal insight, includes both traditional academic arguments and alternative non agonistic forms of discussion, embraces an international scope, challenges traditional assumptions, models and methodologies, offers an inter and multidisciplinary approach, strengthens readers' understanding of the big picture not only for women but for all disempowered groups, critiques feminism as well as patriarchal society. Feminist theory is grounded in a questioning of traditional assumptions about what is right, natural, and self evident, not just about the roles and nature of men and women but about how we think, what we teach, whose experience matters, and what is important. **Transforming the Disciplines** is the first textbook to show the consequences of those questions, not the answers themselves, but the consequences of the willingness to ask and the transformations that have occurred when the right answers changed.

Eventually, you will definitely discover a additional experience and exploit by spending more cash. nevertheless when? complete you take on that you require to get those every needs like having significantly cash?
