Newton, Elena

Cantarello, 2014-08-13 The green economy is widely seen as a potential solution to current global economic and environmental crises and a potential mechanism by which sustainable development might be achieved in practice Considerable investments are now being made into the development of green technology renewable energy biodiversity conservation resource efficiency recycling of materials and green infrastructure This textbook provides a comprehensive introduction to the green economy using a strongly interdisciplinary approach based on environmental science rather than treating it as a sub set of economics The scientific principles of sustainability are presented which provide the foundations of the green economy with a particular focus on systems based approaches Examples of real world case studies are used to

illustrate how the green economy can be achieved in practice In this way the authors provide a thorough overview of both the principles and practice of the green economy drawing from a wide range of disciplines including ecology geography social science psychology sustainability science environmental science law and economics The emphasis is on presenting results of the latest research derived from leading scientific journals Rather than focusing on a single definition of what constitutes a green economy the book introduces readers to the diversity of opinion that exists and engages them in what is an active on going debate This reflects the fact that many aspects of the green economy and sustainable development more generally are currently contested In particular the book will help readers to strengthen their ability to critically evaluate the evidence for and against the views presented and to actively contribute to the future development of the green economy

The Oxford Handbook of Environmental Political Theory Teena Gabrielson, Cheryl Hall, John M. Meyer, David Schlosberg, 2016-01-07 Set at the intersection of political theory and environmental politics yet with broad engagement across the environmental social sciences and humanities The Oxford Handbook of Environmental Political Theory defines illustrates and challenges the field of environmental political theory EPT Featuring contributions from distinguished political scientists working in this field this volume addresses canonical theorists and contemporary environmental problems with a diversity of theoretical approaches The initial volume focuses on EPT as a field of inquiry engaging both traditions of political thought and the academy In the second section the handbook explores conceptualizations of nature and the environment as well as the nature of political subjects communities and boundaries within our environments A third section addresses the values that motivate environmental theorists including justice responsibility rights limits and flourishing and the potential conflicts that can emerge within between and against these ideals The final section examines the primary structures that constrain or enable the achievement of environmental ends as well as theorizations of environmental movements citizenship and the potential for on going environmental action and change

The Bioregional Economy Molly Scott Cato,2013 In a world of climate change and declining oil supplies what is the plan for the provisioning of resources Green economists suggest a need to replace the globalised economy and its extended supply chains with a more local economy But what does this mean in more concrete terms How large is a local economy how self reliant can it be and what resources will still need to be imported The concept of the bioregion developed and popularised within the disciplines of earth sciences biosciences and planning may facilitate the reconceptualisation of the global economy as a system of largely self sufficient local economies A bioregional approach to economics assumes a different system of values to that which dominates neoclassical economics The global economy is driven by growth and the consumption ethic that matches this is one of expansion in range and quantity Goods are defined as scarce and access to them is a process based on competition The bioregional approach challenges every aspect of that value system It seeks a new ethic of consumption that prioritises locality accountability and conviviality in the place of expansion and profit it proposes a shift in the focus of the economy away from profits and towards provisioning and it assumes a radical reorientation of work from employment towards livelihood This book by leading green economist Molly Scott Cato sets out a visionary and yet rigorous account of what a bioregional approach to the economy would mean and how to get there from here

[How Compassion can Transform our Politics, Economy, and Society](#) Matt Hawkins,Jennifer Nadel,2021-11-29 How Compassion can Transform our Politics Economy and Society draws together experts across disciplines ranging from psychology to climate science philosophy to economics history to business to explore the power of compassion to transform politics our society and our economy The book shows that compassion can be used as the basis of a new political economic and social philosophy as well as a practical tool to address climate breakdown inequality homelessness and more Crucially it also provides a detailed plan for its execution It marks the first time that the study of compassion has been applied across multiple disciplines The book provides a template for the study of compassion on an interdisciplinary basis and will appeal to academics professionals and the general reader searching for a fresh and inspiring approach to the seemingly intractable problems facing the world

Developing Leadership Christopher Mabey,Wolfgang Mayrhofer,2015-06-18 What kind of a leader do you want to become The role of business schools in developing future managers and leaders has long been scrutinised and critiqued This has been exacerbated by the recent financial crisis and many books have been written that condemn business schools for producing leaders who graduate without the ability to respond to the changing world around them innovate or act in a responsible way By way of remedy this provocative book takes the critique and debate further

proposing a number of ethical and spiritual resources including Heiggarian philosophy classical Greek philosophy and the Maori notion of wairua It explores existing teaching practices and suggests ways that business schools can Encourage a greater understanding of different world views Introduce different perspectives such as the arts philosophy and spirituality Encourage the practice of responsible and ethical leadership Nurture innovation and creativity Developing Leadership is accompanied by filmed seminars exploring the central debates and interviews with the expert team of contributors A rare thing this book gives more than the label promises The title is about questions yet each chapter gives us answers to why important issues are not addressed in business schools and what to do about it This is a manifesto for reform and the next big question is what will you reader do about it Professor Jonathan Gosling Director Centre for Leadership Studies University of Exeter UK and Distinguished Visiting Professor of Leadership Development INSEAD France
