partnerships **Greening Cities** Puay Yok Tan, Chi Yung Jim, 2017-03-29 This book offers an overview of recent scientific and professional literature on urban greening and urban ecology focusing on diverse disciplines such as landscape architecture geography urban ecology urban climatology biodiversity conservation urban governance architecture and urban hydrology It includes contributions in which academics public policy experts and practitioners share their considerable knowledge on the multi faceted aspects of greening cities The greening of cities has witnessed a global resurgence over the past two decades and has made a significant contribution to urban liveability and sustainability as well as increasing resilience As urban greening efforts continue to expand it is useful to promote recent advances in our understanding of various aspects of planning design and management of urban greenery but at the same time it is also important to realize that there are important gaps in our knowledge and that further research is needed The book is organized in three main parts concepts functions and forms of urban greening The first part examines the historical roots of greening cities and how the burgeoning field of urban ecology can contribute useful principles and strategies to guide the planning design and management of urban greening The second part shifts the focus to the diverse range of services the functions provided by urban greening such as those related to urban climate urban biodiversity human health and community building The final part explores conventional often neglected but important forms of urban greenery such as urban woodlands and urban farms as well as relatively recent forms of urban greenery like those integrated with buildings and waterways It offers a ready reference resource for researchers practitioners and policy makers to grasp the critical issues and trigger further studies and applications in the quest for high performance green cities *Cities at Risk* Pierre Filion, Gary Sands, 2016-03-03 As levels of urbanization increase around the world the growing concentrations of population and economic activity increases vulnerability to natural disasters Interdependencies among urban populations mean that damage to the built environment including water sewer and energy infrastructure can affect millions Even if there is no change in the rate of occurrence of natural disasters an unlikely prospect in the face of ongoing climate change the potential for human and economic loss will continue to increase along with the time required to recover How do cities prepare for and recover from natural disasters In this book the authors provide a broad overview of the issues related to the impacts of disasters on cities around the world from assessing risks to accounting for damages The comparative approach across different types of disasters in a range of urban locations is useful in identifying opportunities for policy transfer While there is no one size fits all solution to hazard mitigation valuable lessons can be learned from the experiences of others The chapters emphasize different modes for assessing hazard risk as well as strategies for increasing the resiliency of vulnerable populations **The Routledge Handbook on the Influence of Built Environments on Diverse Childhoods** Kate Bishop, Katina Dimoulis, 2024-07-01 Children and young people are often discussed as if they are homogenous groups The reality is of course very different with an enormous variation within each of these groups and in any domain of experience pertaining to childhood or adolescence

Driven by personal sociocultural geographic or economic circumstances many children and young people worldwide are experiencing a totally different reality to those who fit with more mainstream patterns of childhood This has substantial implications for their sociophysical environmental experience and our understanding of their physical environmental needs The aim of this book is to draw attention to these alternate realities for a number of these groups of children and young people highlighting the unique and different considerations associated with their particular circumstances in each instance and identifying the repercussions for their physical environmental needs Ultimately this book creates an evidence based discussion which can be used by designers planners and policy makers and those delivering services and programs to children and young people as a basis to make informed decisions on how to work with the groups of children and young people in our book for better environmental provision
