Kuhn,1986 The dramatic story of how upstart General Motors got ahead of pioneer Ford and has stayed ahead is told here along with an explanation of GM s success This book argues that GM won the race by designing a successful performance control system in harmony with cybernetic principles and systems theory under the leadership of Alfred Sloan and his expert team Henry Ford the passionate individualist meanwhile established a losing tradition described by the author as anti team anti expert and anti system GM s recent difficulties according to Dr Kuhn are a result of its lapse from early policies In 1921 Ford held the largest share of a market ever attained by a single manufacturer 59% while GM had slipped from about 20% to 15% Starting in 1924 GM climbed to over 40% of the market a share it has held ever since while Ford fell to about 10% GM has outperformed Ford even more sharply in return to shareholders The author however does not gloss over GM s weaknesses especially its laggard performance in consumer safety and its tunnel vision in product development Although the concepts of steersmanship and inquiring systems were not set forth theoretically until after 1938 GM s leaders applied these concepts organizationally during the boom and bust 1920s and 1930s Most of the book describes the affinities and clashes of personality leading to GM s adoption and Ford s rejection of a performance control system The final chapters describe GM s generally superior performance but show why GM in spite of that has had difficulties in meeting recent challenges Here is exciting history with a compelling message Hearings, Reports and Prints of the Senate Select Committee on Small Business United States.
