Ward, 1995-03-16 This two volume book contains selected papers from the international conference Groups 1993 Galway St Andrews which was held at University College Galway in August 1993 The wealth and diversity of group theory is represented in these two volumes As with the Proceedings of the earlier Groups St Andrews conferences it is hoped that the articles in these Proceedings will with their many references prove valuable both to experienced researchers and also to new postgraduates interested in group theory

Groups St Andrews 2009 in Bath: Volume 2 C. M. Campbell, M. R. Quick, E. F. Robertson, C. M. Roney-Dougall, G. C. Smith, G. Traustason, 2011-06-16 Groups St Andrews 2009 was held in the University of Bath in August 2009 and this second volume of a two volume book contains selected papers from the international conference Five main lecture courses were given at the conference and articles based on their lectures form a substantial part of the proceedings This volume contains the contributions by Eamonn O'Brien Auckland Mark Sapir Vanderbilt and Dan Segal Oxford Apart from the main speakers refereed survey and research articles were contributed by other conference participants Arranged in alphabetical order these articles cover a wide spectrum of modern group theory The regular proceedings of Groups St Andrews conferences have provided snapshots of the state of research in group theory throughout the past 30 years Earlier volumes have had a major impact on the development of group theory and it is anticipated that this volume will be equally important

Groups, Modules, and Model Theory - Surveys and Recent Developments Manfred Droste, László Fuchs, Brendan Goldsmith, Lutz Strüngmann, 2017-06-02 This volume focuses on group theory and model theory with a particular emphasis on the interplay of the two areas The survey papers provide an overview of the developments across group module and model theory while the research papers present the most recent study in those same areas With introductory sections that make the topics easily accessible to students the papers in this volume will appeal to beginning graduate students and experienced researchers alike As a whole this book offers a cross section view of the

areas in group module and model theory covering topics such as DP minimal groups Abelian groups countable 1 transitive trees and module approximations The papers in this book are the proceedings of the conference New Pathways between Group Theory and Model Theory which took place February 1 4 2016 in M lheim an der Ruhr Germany in honor of the editors colleague R diger G bel This publication is dedicated to Professor G bel who passed away in 2014 He was one of the leading experts in Abelian group theory

Groups St Andrews 1989: Volume 1 C. M. Campbell, E. F. Robertson, 1991-03-21 Selected papers presented at the international conference on group theory held at St Andrews in 1989 are combined in two volumes The themes of the conference were combinatorial and computational group theory

Groups '93 Galway/St Andrews: Volume 1 T. C. Hurley, E. F. Robertson, S. J. Tobin, J. Ward, 1995-03-16 Representing the wealth and diversity of group theory for experienced researchers as well as new postgraduates this two volume book contains selected papers from the international conference which was held at University College Galway in August 1993

The Q-Schur Algebra Stephen Donkin, 1998-12-10 This book focuses on the representation theory of q Schur algebras and connections with the representation theory of Hecke algebras and quantum general linear groups The aim is to present from a unified point of view quantum analogs of certain results known already in the classical case The approach is largely homological based on Kempf's vanishing theorem for quantum groups and the quasi hereditary structure of the q Schur algebras Beginning with an introductory chapter dealing with the relationship between the ordinary general linear groups and their quantum analogies the text goes on to discuss the Schur Functor and the 0 Schur algebra The next chapter considers Steinberg's tensor product and infinitesimal theory Later sections of the book discuss tilting modules the Ringel dual of the q Schur algebra Specht modules for Hecke algebras and the global dimension of the q Schur algebras An appendix gives a self contained account of the theory of quasi hereditary algebras and their associated tilting modules This volume will be primarily of interest to researchers in algebra and related topics in pure mathematics

Surveys in Combinatorics, 1997 Rosemary Bailey, R. A. Bailey, 1997-07-31 This volume contains the invited lectures given at the Sixteenth British Combinatorial Conference held in July 1997 at Queen Mary and Westfield College University of London This biennial conference is a well established international event with speakers from all over the world Contained here is a survey of some of the most important work ever in graph theory with related papers that will be essential background reading to anyone doing research in this field Also included is an illustration of how recent developments in group theory lead to advances in graph theory and an exciting new construction of one of the Mathieu groups Other articles show how to construct a block design and how to use finite geometries An account is given of the computational complexity of counting The book provides a valuable survey of the present state of knowledge in combinatorics It will be useful to research workers and advanced graduate students primarily in mathematics but also in computer science statistics and engineering

The Descriptive Set Theory of Polish Group Actions Howard Becker, A. S. Kechris, 1996-12-05 In this book the authors present their research into the foundations of the

theory of Polish groups and the associated orbit equivalence relations The particular case of locally compact groups has long been studied in many areas of mathematics Non locally compact Polish groups occur naturally as groups of symmetries in such areas as logic especially model theory ergodic theory group representations and operator algebras Some of the topics covered here are topological realizations of Borel measurable actions universal actions applications to invariant measures actions of the infinite symmetric group in connection with model theory logic actions dichotomies for orbit spaces including Silver Glimm Effros type dichotomies and the topological Vaught conjecture descriptive complexity of orbit equivalence relations definable cardinality of orbit spaces **Geometric Galois Actions** Leila Schneps, Pierre Lochak, 1997 Volume 1

The James Forest Helga Fetter, Berta Gamboa de Buen, 1997-06-05 Everything that you ever wanted to know about pathological Banach spaces **Geometry, Combinatorial Designs and Related Structures** J. W. P. Hirschfeld, S. S. Magliveras, M. J. de Resmini, 1997-08-14 This volume examines state of the art research in finite geometries and designs

Quantum Groups and Lie Theory Andrew Pressley, 2002-01-17 Since its genesis in the early 1980s the subject of quantum groups has grown rapidly By the late 1990s most of the foundational issues had been resolved and many of the outstanding problems clearly formulated To take stock and to discuss the most fruitful directions for future research many of the world's leading figures in this area met at the Durham Symposium on Quantum Groups in the summer of 1999 and this volume provides an excellent overview of the material presented there It includes important surveys of both cyclotomic Hecke algebras and the dynamical Yang Baxter equation Plus contributions which treat the construction and classification of quantum groups or the associated solutions of the quantum Yang Baxter equation The representation theory of quantum groups is discussed as is the function algebra approach to quantum groups and there is a new look at the origins of quantum groups in the theory of integrable systems *Groups St Andrews 2005: Volume 2* C. M. Campbell, 2007-01-04 Selected papers from Groups St Andrews 2005 cover a wide spectrum of modern group theory *Groups St Andrews 1997 in Bath: Volume 2* C. M. Campbell, 1999-02-18 This two volume book contains selected papers from the international conference Groups St Andrews 1997 in Bath The articles are arranged in roughly alphabetical order and cover a wide spectrum of modern group theory There are articles based on lecture courses given by five main speakers together with refereed survey and research articles contributed by other conference participants Proceedings of earlier Groups St Andrews conferences have had a major impact on the development of group theory and these volumes should be equally important **Groups** T. W. Müller, 2004-04-08 In 1999 a number of eminent mathematicians were invited to Bielefeld to present lectures at a conference on topological combinatorial and arithmetic aspects of infinite groups The present volume consists of survey and research articles invited from participants in this conference Topics covered include topological finiteness properties of groups Kac Moody groups the theory of Euler characteristics the connection between groups formal languages and automata the Magnus Nielsen method for one relator groups atomic and just infinite groups topology in permutation groups
