Handbook Of Feminist Research Theory And Praxis:

Handbook of Feminist Research Sharlene Nagy Hesse-Biber, 2007 The topic feminist research has too often been neglected in standard research methods books The Handbook of Feminist Research represents the establishment of a new tradition or paradigm in viewing how the research process is implemented Feminist researchers bring unique epistemological and methodological perspectives to the research process Feminists approach to methodology allows for new types of questions about women's lives and those of other marginalized groups to be addressed within their respective fields of research This Handbook stresses the interconnections between epistemology methodology and methods They are not de-linked from each other but work together in dynamic ways to produce new knowledge and this openness itself is also characteristic of how feminist researchers approach their work Feminists engage synergistically with all three aspects of the research process epistemology methodology and method Through a synergistic connection between these elements of research epistemology methodology and method we find that feminist research often shapes new research endeavors that are greater than the sum of their parts In other words while traditional research employs these components of research the synergistic engagement of these components in feminist research questions the status quo aiming to raise our consciousness about how we do research Looking at the selections provided in this Handbook we are able to look at feminist research its implementation of synergistic use of epistemology methodology and method and the resulting qualities of feminist research in practice

Women Fielding Danger Martha K. Huggins, Marie-Louise Glebbeek, 2009-01-16 In a compelling exploration of an oft hidden aspect of qualitative field research *Women Fielding Danger* shows how identity performances can facilitate or block field research outcomes. The book asks questions that are crucial for all women engaged in field research. Do researchers enter their field site with a totally neutral identity? Can a researcher's own identity be at odds with how interviewees see her? Could a researcher be of the wrong gender, sexuality, nationality or religion for those being studied? Must some of a researcher's identities be subsumed in certain research settings? How much identity disguise is possible before a researcher violates research ethics or loses herself? Together these questions inform the book's themes of the centrality of gender, social and political danger, the negotiation of identities and on site ethics. Focusing on ethnographic research across a wide range of disciplines and world regions, this deeply informed book presents practical to dos and technical research strategies. In addition it offers unique illustrations of how the political, geographic and organizational realities of field sites shape identity negotiations and research outcomes. Understanding these dynamics the authors show is key to surviving the ethnographic field.

Cooksey, 2024-07-15 This book is about the choices that researchers can make when building knowledge in social and behavioural spaces Knowledge is the unity we seek and given that social and behavioural research is a human endeavour focusing on human lives and experiences there are diverse and ever evolving pathways towards achieving that unity Any one pathway will only ever yield partial glimpses into human life and diversity of potential choices serves to enrich expand and enlarge those glimpses in pursuit of more complete understanding The book shows that researchers and the researched are far more connected than disconnected in this world and those connections are spread out through a network of interlinked complex systems The book argues that pluralist systemic thinking provides the means by which a researcher s methodological choices for navigating the Data Triangle comprising data source data gathering and data analysis strategies and the learning they provide can be fully and robustly contextualised with respect to those systems and the expectations and influences that emerge from them Such contextualisations facilitate the refinement augmentation and or narrowing of those choices during the researcher s journey Anticipating choices downstream may have implications for more immediate choices and more immediate choices may create a cascade of necessary downstream choices An essential part of contextualisation involves making choices about patterns of guiding assumptions modes of knowledge building and research frames Researchers must develop the capacity to be flexible and adapt to unanticipated emergent events obstacles and political influences making trade offs where necessary throughout their research journey always with an eye on both feasibility and quality Importantly research has no meaning unless the researcher can ensure that it connects with intended audiences via specific research outcomes especially since the ultimate judgments about the convincingness meaningfulness quality and utility of the research are vested in those audiences Throughout the book special attention is devoted to the role s that stakeholders and gatekeepers play in shaping the researcher s journey as well as to what can be learned from Indigenous First Nations perspectives on social and behavioural research **Narrating a Psychology of Resistance** Shelly Grabe, 2017 Narrating a Psychology of Resistance analyzes first hand testimony from the Movimiento Autonomo de Mujeres in
