The Handbook of Greener Synthesis of Nanomaterials and Compounds provides a comprehensive review of developments in this field, combining foundational green and nano chemistry with the key information researchers need to assess, select and apply the most appropriate green synthesis approaches to their own work. Volume 1: Fundamental Principles and Methods provides a clear introduction to the fundamentals of green synthesis that places synthesis in the context of green chemistry. Beginning with a discussion of key greener physical and chemical methods for synthesis, including ultrasound, microwave and mechanochemistry methods, the book goes on to explore biological methods, including biosynthesis, green nanoformation and virus-assisted methods. Discusses synthesis in the context of the principles of green chemistry. Highlights both traditional and innovative technologies for the synthesis of nanomaterials and related composites under green chemistry conditions. Reflects on the current and potential applications of natural products chemistry in synthesis.

Heterogeneous Catalysis in Sustainable Synthesis Bela Torok, Christian Schaefer, Anne Kokel, 2021-09-17 Heterogeneous Catalysis in Sustainable Synthesis is a practical guide to the use of solid catalysts in synthetic chemistry that focuses on environmentally benign applications. Collating essential information on solid catalysts into a single volume, it reveals how the efficient use of heterogeneous catalysts in synthetic chemistry can support sustainable applications. Beginning with a review of the fundamentals of heterogeneous catalytic synthesis, the book then explores the basic concepts of heterogeneous catalytic reactions, from adsorption to catalyst poisons, the use of non-traditional activation methods, recommended solvents, the major types of both metal and non-metal solid catalysts and applications of these catalysts in sustainable synthesis. Based on the extensive experience of its expert author, this book aims to encourage and support synthetic chemists in using solid catalysts in their own work while also highlighting the important link between heterogeneous catalysis and sustainability to all those interested. Combines foundational knowledge with a focus on practical applications. Organizes information by reaction type, allowing readers to easily find examples of how to carry out specific reaction types with solid catalysts.
