

The background of the book cover is composed of several interlocking puzzle pieces. The top half features a dark blue piece, while the bottom half is a bright yellow piece. On the left side, there are two more pieces: a light blue one and a medium blue one, both of which are partially visible and appear to be floating or overlapping the other pieces. The pieces have a 3D effect with shadows, giving them a sense of depth.

Economics John B. Davis,2024-02-01 Mainstream economics assumes economic agents act and make decisions to maximize their utility This model of economic behavior based on rational choice theory has come under increasing attack in economics because it does not accurately reflect the way people behave and reason The shift towards a more realistic account of economic agents has been mostly associated with the rise of behavioral economics which views individuals through the lens of bounded rationality Identity Capabilities and Changing Economics goes further and uses identity analysis to build on this critique of the utility conception of individuals arguing it should be replaced by a conception of economic agents in an uncertain world as socially embedded and identified with their capabilities Written by one of the world s leading philosophers of economics the book develops a new approach to economics theory of the individual explaining individuals as adaptive and reflexive rather than utility maximizing *Journal of Economic Literature* ,2014 *Preparing for the Next Financial Crisis*
