Pharmacognosy Fundamentals Applications and Strategies explores a basic understanding of the anatomy and physiology of plants and animals, their constituents and metabolites. This book also provides an in-depth look at natural sources from which medicines are derived, their pharmacological and chemical properties, safety aspects and how they interact with humans. The book is vital for future research planning, helping readers understand the makeup, function and metabolites of plants in a way where the history of their usage can be linked to current drug development research including in vitro, in vivo and clinical research data. By focusing on basic principles, current research and global trends, this book provides a critical resource for students and researchers in the areas of pharmacognosy, pharmacy, botany, medicine.

biotechnology biochemistry and chemistry Covers the differences between animal and plant cells to facilitate an easier transition to how the body interacts with these entities Contains practice questions at the end of every chapter to test learning and retention Provides a single source that covers fundamental topics and future strategies with the goal of enabling further research that will contribute to the overall health and well being of mankind **Essentials of Medicinal and**

Aromatic Crops Muhammad Zia-Ul-Haq,Arwa Abdulkreem AL-Huqail,Muhammad Riaz,Umar Farooq Gohar,2023-10-09

Medicinal and aromatic crops MACs are high value crops since the natural products obtained from them are low volume high value commodities that have numerous applications in various sectors such as the food beverage food supplement flavor and fragrance perfumery and cosmetics pharmaceutical and aromatherapy industries In addition the plant biomass is used in the production of teas and medical applications in traditional and also modern medicines MACs are important mainly because they contain plant secondary metabolites such as essential oils alkaloids glycosides saponins tannins vitamins and other bioactives Plant secondary metabolites are differentiated from plant primary metabolites of photosynthesis and respiration since they are directly involved in growth and development of plants Some MACs are used as spices and culinary herbs since they contain mainly essential oils and are used as tonic to the digestive system appetite modification and other systems and may facilitate nutrient uptake and utilization from various foods A significant amount of MACs and their natural products have also demonstrated antimicrobial antifungal and bactericidal activity and significant antioxidant capacity In the past MACs and their natural products have been used as a source for various medicines in food and beverage production and in aroma products Essentials of Medicinal and Aromatic Crops summarizes the current knowledge on medicinal and aromatic crops including the agronomical practices of important MACs and their products their beneficial effects and utilization of MAP and their products The chapters provide a comprehensive guide to the most important and used medicinal and aromatic crops and their use in functional foods nutraceuticals and as bioactives against various ailments providing researchers teachers chemists food scientists agronomists and agroecologists in academia industry and government a fully up to date singular source on this important topic **Medicinal and Aromatic Plants** Lakhan Kumar,Navneeta Bharadvaja,Ram

Singh,Raksha Anand,2024-06-29 Due to complex phytochemical components and associated beneficial properties numerous medicinal and aromatic plants in whole or parts have been used for nutritional purposes or the treatment of various diseases and disorders in humans and animals Essential oils from medicinal and aromatic plants MAPs have been exploited for product formulations of pharmaceuticals cosmetics food and beverage colorants biopesticides and several other utility chemicals of industrial importance There is scientific evidence of many medicinal plant extracts possessing immunomodulatory immunostimulatory antidiabetic anticarcinogenic antimicrobial and antioxidant properties thus demonstrating their traditional use in popular medicine With the advent of modern technology the exploitation of natural resources has exponentially increased in order to fulfill the demand of an increased human population with improved quality

of life The traditional agriculture and production based supply of commodities is inadequate to meet the current demand Biotechnological approaches are gaining importance to bridge the gaps in demand and supply In the proposed book medicinal and aromatic plant based secondary metabolites have been discussed in terms of their therapeutic potential and industrial relevance To discuss the qualitative and quantitative analysis of a range of medicinal and aromatic plants based secondary metabolites SMs bioprocess development for their extraction and bioseparation a brief overview of their industrial relevance various tissue culturing strategies biotechnological approaches to enhance production scale up strategies management of residual biomass post extraction of target SMs is central to the idea of the proposed book A section will explore the verticals mentioned above In the next section the book addresses the approaches for conserving and improving medicinal and aromatic plant genetic resources In the third section approaches to managing the post harvest crop residue and secondary metabolites extracted plant biomass will be thoroughly discussed The recent integration of artificial intelligence to improve medicinal and aromatic plant research at several levels including the development and employment of computational approaches to enhance secondary metabolite production tissue culture drug design and discovery and disease treatment will be included in the fourth section The book summarizes current research status gaps in knowledge agro industrial potential waste or residual plant biomass management conservation strategies and computational approaches in the area of medicinal and aromatic plants with an aim to translate biotechnological interventions into reality

Nanotechnology Applications in Food Alexandru Grumezescu, Alexandra Elena Oprea, 2017-02-22 Nanotechnology Applications in Food Flavor Stability Nutrition and Safety is an up to date practical applications based reference that discusses the advantages and disadvantages of each application to help researchers scientists and bioengineers know what and what not to do to improve and facilitate the production of food ingredients and monitor food safety The book offers a broad spectrum of topics trending in the food industry such as pharmaceutical biomedical and antimicrobial approaches in food highlighting current concerns regarding safety regulations and the restricted use of nanomaterials Includes how nanobiosensors are useful for the detection of foodborne pathogens Discusses applications of nanotechnology from flavor and nutrition to stability and safety in packaging Includes nano and microencapsulation nanoemulsions nanosensors and nano delivery systems Identifies practical applications of nanoscience for use in industry today Essential Oils Rajendra Chandra Padalia, Dakeshwar Kumar Verma, Charu Arora, Pramod Kumar Mahish, 2023-02-20 Essential oils are simply the volatile oils of plants These are concentrated liquids contain many terpenes alkaloids and alcohols etc Various compounds of essential oils have bioactive properties such as antimicrobial anti cancer anti diabetic anti viral and anti fungal etc This book describes the sources of essential oils extraction and production method characterizing tools bioactivity and various applications in the field of industries daily usage agriculture health and food Role of Essential Oils in the Management of COVID-19 Ahmed Al-Harrasi, Saurabh Bhatia, Tapan Behl, Deepak Kaushik, Md.
