God The Multiverse And Everything Modern Cosmology And The Argument From Design:

God, the Multiverse, and Everything Rodney D. Holder, 2017-03-02 Modern cosmology tells us that the universe is remarkably fine tuned for life. If the constants of physics or the initial conditions at the Big Bang were different by the smallest of margins then the universe would have been dull and lifeless. Why should the universe be so accommodating to life? Many cosmologists believe that the existence of many universes can explain why ours is so special. In this book Rodney Holder subjects this multiverse hypothesis to rigorous philosophical critique. A multitude of problems is exposed. Going substantially further than existing treatments, Holder argues that divine design is the best explanation for cosmic fine tuning, specifically that design by God is a superior explanation in terms of both initial plausibility and explanatory power and is therefore the most rational position to take on the basis of the cosmological data.

Ramified Natural Theology in Science and Religion Rodney Holder, 2020-10-15 This book offers a rationale for a new ramified natural theology that is in dialogue with both science and historical critical study of the Bible. Traditionally, knowledge of God has been seen to come from two sources: nature and revelation. However, a rigid separation between these sources cannot be maintained since what purports to be revelation cannot be accepted without qualification. Rational argument is needed to infer both the existence of God from nature and the particular truth claims of the Christian faith from the Bible. Hence, the distinction between bare natural theology and ramified natural theology. The book begins with bare natural theology as background to its main focus on ramified natural theology. Bayesian confirmation theory is utilised to evaluate competing hypotheses in both cases in a similar manner to that by which

competing hypotheses in science can be evaluated on the basis of empirical data In this way a case is built up for the rationality of a Christian theist worldview Addressing issues of science theology and revelation in a new framework this book will be of keen interest to scholars working in Religion and Science Natural Theology Philosophy of Religion Biblical Studies Systematic Theology and Science and Culture **T&T Clark Handbook of the Doctrine of Creation** ,2024-03-07 The T how the doctrine of creation informs and is informed by various dogmatic commitments and how the doctrine of creation relates to a range of human concerns and activities The Handbook represents a celebration of fascination with bewilderment at lament about and hope for all that is and serves as a scholarly innovative and constructive reference for those interested in attending to what Christian belief has to contribute to thinking about and living with the mysterious existence named creation *A Faithful Guide to Philosophy* Peter S. The Heavens Declare Rodney Holder, 2012-02-01 One of the central themes of inquiry for Karl Barth the twentieth century Protestant theologian was the notion of revelation Although he was suspicious of natural theology i.e. the seeking of evidence for God's existence in the ordered structure of the world recent scientific advances notably in physics and cosmology and the flourishing modern dialogue between science and religion offer compelling reasons to revisit Barth's thinking on the concept We must again ask whether and how it might be possible to hold together the notion of revelation whilst employing reason and scientific evidence in the justification of belief In *The Heavens Declare* author Rodney Holder re-examines Barth's natural theology argument and then explores how it has been critiqued and responded to by others starting with Dietrich Bonhoeffer and Wolfhart Pannenberg Holder then considers the contributions of two notable British participants in the science religion dialogue Thomas Torrance and Alister McGrath who despite their repudiation of natural theology in the traditional sense also provide many positive lessons The book concludes by defending an overall position which takes into account the ideas of the aforementioned theologians as well as others who are currently engaged positively in natural theology such as John Polkinghorne and Richard Swinburne Holder's new study is sure to be of interest to theologians philosophers of religion and all scholars interested in the science religion dialogue especially those interested in natural theology as an enterprise in itself

Evolutionary Debunking Arguments Diego E. Machuca, 2022-09-09 Recent years have seen an explosion of interest in evolutionary debunking arguments directed against certain types of belief particularly moral and religious beliefs According to those arguments the evolutionary origins of the cognitive mechanisms that produce the targeted beliefs render these beliefs epistemically unjustified The reason is that natural selection cares for reproduction and survival rather than truth and false beliefs can in principle be as evolutionarily advantageous as true beliefs The present volume brings together fourteen essays that examine evolutionary debunking arguments not only in ethics and philosophy of religion but also in philosophy of mathematics metaphysics and epistemology The essays move forward research on those arguments by shedding fresh light on old problems and proposing new lines of inquiry The book will appeal to scholars and graduate students interested in the possible skeptical implications of evolutionary theory in any of the above domains
