Going Local Decentralization Democratization And The Promise Of Good Governance:

Going Local Merilee Serrill Grindle, 2007 Publisher description **Going Local** Merilee S. Grindle, 2009-03-09 Many developing countries have a history of highly centralized governments Since the late 1980s a large number of these governments have introduced decentralization to increase democracy and improve services especially in small communities far from capital cities In *Going Local* an unprecedented study of the effects of decentralization on thirty Mexican municipalities Merilee Grindle describes how local governments respond when they are assigned new responsibilities and resources under decentralization policies She explains why decentralization leads to better local governments in some cases and why it fails to in others Combining quantitative and qualitative methods Grindle examines data based on a random sample of Mexican municipalities and ventures into town halls to follow public officials as they seek to manage a variety of tasks amid conflicting pressures and new expectations Decentralization she discovers is a double edged sword While it allows public leaders to make significant reforms quickly institutional weaknesses undermine the durability of change and legacies of the past continue to affect how public problems are addressed Citizens participate but they are more successful at extracting resources from government than in holding local officials and agencies accountable for their actions The benefits of decentralization regularly predicted by economists political scientists and management specialists are not inevitable she argues Rather they are strongly influenced by the quality of local leadership and politics **Going Local:**

Decentralization, Democratization, and Informal Power in Mexico Andrew Selee, 2015-10-20 In the last two decades of the twentieth century many countries in Latin America freed themselves from the burden of their authoritarian pasts and developed democratic political systems At the same time they began a process of shifting many governmental responsibilities from the national to the state and local levels Much has been written about how decentralization has fostered democratization but informal power relationships inherited from the past have complicated the ways in which citizens voice their concerns and have undermined the accountability of elected officials In this book Andrew Selee seeks to illuminate the complex linkages between informal and formal power by comparing how they worked in three Mexican cities The process of decentralization is shown to have been intermediated by existing spheres of political influence which in turn helped determine how much the institution of multiparty democracy in the country could succeed in bringing democracy closer to home **The Idea of Good Governance and the Politics of the Global South** Haroon A. Khan, 2015-08-11 One of the major objectives of good governance is human development Many worry that without good governance many developing countries may become failed states Using one of the worst industrial disasters in Bangladesh to date Haroon A Khan helps

further our understanding of the importance of bureaucratic capacity for achieving good governance and offers a new paradigm for a merit system to improve governance In doing so he introduces the reader to the concept of good governance and its importance by investigating its relationship with failed states globalization bureaucratic effectiveness and human development The Idea of Good Governance and the Politics of the Global South will be useful for the students interested in political science public administration and international relations

Rural Policy Implementation in Contemporary China Anna Ahlers, 2014-01-10 At the turn of the millennium the disparities between rural and urban livelihoods underdevelopment and administrative shortcomings in the Chinese countryside were increasingly seen as posing a manifest threat to social harmony and economic and political stability At that time the term three rural problems sannong wenti was coined which defined the main issues of rural life that needed to be targeted by government action agriculture nongye villages nongcun and farmers nongmin In turn with the launch of the 11th Five Year Plan in 2006 a pledge was made to shift the focus of developmental efforts to the long neglected countryside which is still

home to half of the Chinese population This book presents an analysis of adaptive local policy implementation in China in the context of the Building of a New Socialist Countryside BNSC policy framework Based on intensive field work in four counties in Fujian Jiangxi Shaanxi and Zhejiang Provinces between 2008 and 2011 it offers detailed analyses of the form and impact of county governments strategic agency at certain stages and within certain fields of the implementation process for example the design of local BNSC programs the steering of project funding implementation and evaluation the establishment of model villages and the management of public participation Further this study illustrates that BNSC is far more than the empty slogan described by many observers when it was launched in 2005 2006 Instead it has already brought about considerable shifts in terms of the process and outcomes of rural policy implementation Altogether the results of this research challenge existing paradigms by showing how against the background of contemporary approaches to rural development and recent reforms initiated by the central state local bureaucracies strategic agency can actually push forward effective albeit not necessarily optimal policy implementation to some extent which serves the interests of central authorities local implementors and rural residents By tying into the larger debates on China s state capacity and authoritarian adaptability this book enriches our understanding of the inner workings of the Chinese political system As such it will prove invaluable to students and scholars of Chinese politics public policy and development studies more generally

complete explanation takes much earlier democratizing changes in civil society into account Her book explores how largely rural protest movements laid the groundwork for liberalization of the electoral arena and the consolidation of support for two opposition parties the PAN on the right and the PRD on the left that eventually mounted a serious challenge to the PRI She shows how youth radicalized by the 1968 showdown between the state and students in Mexico City joined forces with peasant militants in nonviolent rural protest to help bring about needed reform in the political system In response to this political effervescence in the countryside agribusinessmen organized in peak associations that functioned like a radical social movement Their countermovement formulated the ideology of neoliberalism and they were ultimately successful in mobilizing support for the PAN Together social movements and the opposition parties nurtured by them contributed to Mexico's transformation from a one party state into a real electoral democracy nearly a hundred years after the Revolution

Natural Hazards and Disaster Risk Reduction Carina Fearnley, Emily Wilkinson, Catherine J. Tillyard, Stephen J. Edwards, 2016-04-08 Building upon presentations given during the conference on Disaster Risk Reduction for Natural Hazards Putting Research into Practice held at University College London in November 2009 the articles collected in this book examine how natural hazards research is accessed and used by practitioners and decision makers and conversely how policy and practice inform research As with the conference this book successfully brings together views from humanitarian and development agencies academia business government and funding bodies It is rare to engage such a wide range of sectors in a discussion relating to the issues of disaster risk reduction from a natural hazards perspective and the book captures this interaction and the resultant exchange of ideas thus providing an insight into how stakeholders respectively undertake or engage with natural hazards research Collectively the articles highlight the need for greater dialogue understanding and collaboration between all these sectors if research is to be made relevant and generate significant impact on risk reduction policy and practice There is an urgent requirement to better understand the respective needs ways of working project timescales and funding mechanisms for disaster risk reduction as well as the challenges posed by institutional and organizational structures and functions These issues must be overcome to ensure that ultimately and most significantly discussions turn into positive practical actions so that research on natural hazards is relevant and applicable The book represents a step in that journey This book was published as a special issue of Environmental Hazards

The Conundrum of Corruption Michael Johnston, Scott Fritzen, 2020-12-30 This book argues that it is time to step back and reassess the anti corruption movement which despite its many opportunities and great resources has ended up with a track record that is indifferent at best Drawing on many years of experience and research the authors critique many of the major strategies and tactics employed by anti corruption actors arguing that they have made the mistake of holding on to problematical assumptions ideas and strategies rather than addressing the power imbalances that enable and sustain corruption The book argues that progress against corruption is still possible but requires a focus on justice and fairness

considerable tolerance for political contention and a willingness to stick with the reform cause over a very long process of thoroughgoing sometimes discontinuous political change Ultimately the purpose of the book is not to tell people that they are doing things all wrong Instead the authors present new ways of thinking about familiar dilemmas of corruption politics contention and reform These valuable insights from two of the top thinkers in the field will be useful for policymakers reform groups grant awarding bodies academic researchers NGO officers and students
