where even the most critical business systems can run on them For most organizations SAP is the key business system If SAP
is unavailable for any reason then potentially your business stops Because of this it is understandable that you will be
concerned whether such a critical system can run in the public cloud However the days when you truly ran your IT system on
premises have long since gone Most organizations have been getting rid of their own data centers and increasingly moving to
co location facilities In this context the public cloud is nothing more than an additional virtual data center connected to your
existing network There are typically two main reasons why you may consider migrating SAP to Azure You need to replace the
infrastructure that is currently running SAP or you want to migrate SAP to a new database Depending on your goal SAP
offers different migration paths You can decide either to migrate the current workload to Azure as is or to combine it with
changing the database and execute both activities as a single step SAP on Azure Implementation Guide covers the main
