Comparative Higher Education Politics Jens Jungblut, Martin Maltais, Erik C. Ness, Deanna Rexe, 2023-05-12 This volume provides an overview of the state of the art of research on the politics of higher education policy in Canada the US and Western Europe Each thematic chapter combines an extensive literature review with original empirical work that further advances our understanding of policymaking dynamics in higher education The book covers five key aspects of policymaking namely the politics of governance as well as funding reforms the role of interest groups policy diffusion and policy framing These aspects are explored using a unique comparative design that combines comparisons within as well as between regions and among the five key aspects of policymaking The conceptual framework is anchored in approaches from institutional theory namely sociological and historical institutionalism This rare book coherently focuses on the same critical challenges that higher education faces in a changing global and national environment These include vital governance and finance issues and how these are framed and contested by different organizations and interest groups as well as state actors Within a broad institutionalist framework that reflects the tensions between historical university and national legacies on the one hand and regional and global influences on the other the authors focus on policymaking in Western Europe Canada and the US This is an engaging and creative endeavor a must read for scholars and policymakers alike Francisco O Ramirez Graduate School of Education Stanford University This is a real achievement that will contribute to the development of research in politics of higher education policy finance and economic development It is timely in an era when higher learning is increasingly salient to national policy interest groups and supranational bodies such as the EU The focus on Canada the US and Europe frames a comparative approach to a competitive higher educational policy arena that has not received systematic study Sheila Slaughter Louise McBee Institute of Higher Education University of Georgia This fills a gaping hole in research on the politics of higher education In bringing together research perspectives from governance studies with comparative public policy as well as scholars from Europe and Northern America this volume will serve as an important reference point for a rapidly growing research field The exceptionally high quality of editorship is documented by the fact that the chapters are convincingly subsumed under five sub themes In short A must read for any researcher and student interested in understanding the political foundations of higher education Marius R Busemeyer Department of Politics and Public Administration University of Konstanz

The Globalisation of Intercultural Education Christina Hajisoteriou, Panayiotis Angelides, 2016-06-14 This book examines the intersection of globalisation and intercultural education by focusing on the trajectory of education policy from development to adoption and implementation The centrality of the nation state has been constrained by a wide range of new socio cultural political and economic phenomena over the past decade such as globalisation Europeanisation modernisation and global recession The main implications of these developments have only just

begun to unfold and continue to be debated by policy makers academics and educators However it is widely accepted that global socio political and economic developments have allowed supranational institutions functioning across nation states rather than within them to perform many state functions with regards to education policy development and implementation Yet much remains unknown and under researched about the impact of these still nascent developments on the trajectory of intercultural education This book sets out to fill in this gap by examining the intersection of globalisation and intercultural education through macro micro integration After all for modern societies to establish social cohesion education research should examine issues of citizenship democracy and intercultural education under the lens of globalisation

Far-Right Parties and the Politics of Education in Europe Anja Giudici, Oliver Gruber, Philipp Schnell, 2025-06-30 This edited volume explores the highly topical yet academically neglected relationship between far right parties and education policy in Europe Although far right parties have been the subject of much research in recent years their approach to education has often been overlooked The book challenges the idea that education is a low priority issue for these parties It shows that they do pay attention to education and that the issue plays a significant role in defining their socio cultural strategy in particular In seven case studies from Austria Denmark France Italy Hungary Poland and Slovakia the authors of this volume illustrate how far right parties frame education primarily as a means of promoting conservative and nativist values rather than as a tool for economic redistribution Integrating insights from education studies and political science this volume provides a comprehensive understanding of far right educational approaches as a broader European phenomenon It sheds light on the strategies of these influential political actors and their implications for the future of education and society in Europe Essential reading for scholars and policymakers this book offers valuable insights into the evolving partisan dynamics shaping the future of European education and societies This volume will be of interest to scholars and students in the fields of political science education studies and European politics as well as policymakers concerned with the intersection of far right parties populist movements and educational policy The chapters in this book were originally published as a special issue of the Journal of Contemporary European Studies

The Oxford Companion to Comparative Politics Joel Krieger, 2013 The two volume Oxford Companion to Comparative Politics fills a gap in scholarship on an increasingly important field within Political Science Comparative Politics the discipline devoted to the politics of other countries or peoples has been steadily gaining prominence as a field of study allowing politics to be viewed from a wider foundation than a concentration on domestic affairs would permit Comparativists apply various theories and concepts to analyze the similarities and differences between political units using the results of their research to develop causalities and generalizations Each of these theories and outcomes are thoroughly defined in the Companion as are major resultant conclusions those comparativists who have influenced the field in significant ways and politicians whose administrations have shaped the evaluation of contrasting governments Approximately 200 revised and updated articles from the Oxford Companion to Politics of the World would serve as a foundation for the set while over 100 new entries would thoroughly examine the field in a lasting more theoretical than current event based way New entries cover such topics as failed states Grand Strategies and Soft Power important updates include such countries as China and Afghanistan and issues like Capital Punishment Gender and Politics and Totalitarianism Country entries include the most significant nations to permit a focus on non time sensitive analysis In

addition 25 1 000 word interpretive essays by notable figures analyze the discipline its issues and accomplishments Collectively entries promote deeper understanding of a field that is often elusive to non specialists **Global Perspectives on Education Research, Vol. II** Liesel Ebersöhn, Ingrid Gogolin, 2023-05-31 Presenting a wide range of new research from World Education Research Association WERA affiliated scholars pertaining to democracy and education this volume including topics such as school readiness in Mongolia high stakes teacher evaluation policy in Japan and family and community involvement in global educational advocacy This collection arrives at a time of extreme global challenges leaving researchers teachers students families and policymakers without a baseline of how to act react and be proactive to stem the chronic flow of disruption to global education systems These challenges require researchers worldwide to consider how evidence can support individuals and systems to buffer against extreme global health distress and conflict whilst simultaneously supporting the continued functioning of education systems and processes Such processes must allow students teachers leaders administrators and members of the educational communities to retain positive self esteem and maintain supportive relationships and systems that provide the appropriate conditions for such processes Global Perspectives on Education Research pulls together contributions from different contexts and cultures to distil vistas and research results that can enlighten a worldwide community of researchers education professionals and practitioners as well as policymakers and local national or supra national decision makers This text is also the ideal companion for educators and leaders alike as they navigate the uncertainty within global health and social justice Educational Leadership for Ethics and Social Justice Anthony H. Normore, Jeffrey S. Brooks, 2014-01-01 The purpose of this book is to examine and learn lessons from the way leadership for social justice is conceptualized in several disciplines and to consider how these lessons might improve the preparation and practice of school leaders In particular we examine philosophy anthropology sociology economics political science public policy and psychology Our contention is that the field of educational leadership might consider taking a step backward in order to take several forward That is educational leadership researchers might re examine social justice both in terms of social and individual dynamics and as disciplinary specific multidisciplinary and interdisciplinary phenomenon By adopting this approach we can connect and extend long established lines of conceptual and empirical inquiry and thereby gain insights that may otherwise be overlooked or assumed This holds great promise for generating refining and testing theories of social justice in educational leadership and will help strengthen already vibrant lines of inquiry That is rather than citing a single or a few works out of their disciplinary context it might be more fruitful to situate educational leadership for social justice research in their respective traditions This could be carried out by extending extant lines of inquiry in educational leadership research and then incorporating lessons gleaned from this work into innovative practice For example why not more clearly establish lines of educational leadership and justice research into the Philosophy of Social Justice Economics of Social Justice Political Studies of Social Justice Sociology of Social Justice Anthropology of Social Justice and

the Public Policy of Social Justice as focused and discrete areas of inquiry Once this new orientation toward the knowledge base of social justice and educational leadership is laid we might then seek to explore some of the natural connections between traditions before ultimately investigating justice in educational leadership through a free association of ideas as the worlds of practice and research co construct a new language they can use to discuss educational leadership Such an endeavor may demand reconceptualization of both the processes and products of collaborative research and the communication of findings but it will demand a breaking down of methodological and epistemological biases and a more meaningful level and type of engagement between primary and applied knowledge bases

Politics and Policy-making in Israel's Education System Hayim Gazi'el, 1996 The first comprehensive book in English to describe and analyse the structure of Israel's educational system from a political and policy making perspective
