Handbook of Management Accounting Research Christopher S. Chapman, 2006 *Handbook of Management Accounting Research*, *Handbook of Management Accounting Research* Christopher S. Chapman, Anthony G. Hopwood, Michael D. Shields, 2011-09-14 Volume two of the Handbooks of Management Accounting Research consists of two groups of chapters. The first draw together research that has focussed on particular management accounting practices. The second set synthesise contributions to the literature that have been focussed within particular organisational contexts. Volume two concludes with a review of research on how management accounting practice and research varies around the world. Special pricing available if purchased as a set with Volume 1. Documents the scholarly management accounting literature. Publishing both in print and online through Science Direct International in scope. **Handbook of Management Accounting Research** Christopher S. Chapman, Anthony G. Hopwood, Michael D. Shields, 2007 Handbook of Management Accounting Research Christopher S. Chapman, Anthony G. Hopwood, Michael D. Shields, 2009 This third volume features contributions from some of the most influential researchers in various areas of management accounting research, consolidates the content of volumes one and two and concludes with examples of management accounting research from around the world. *The Routledge Handbook of Behavioural Accounting Research* Theresa Libby, Linda Thorne, 2025-04-29 The Routledge Handbook of Behavioural Accounting Research covers a full range of theoretical, methodological and statistical approaches relied upon by behavioural accounting researchers, giving the reader a good grounding in both theoretical perspectives and practical applications. Behavioural research is broadly defined as research focused at the individual or small group level, drawing mainly on theories from psychology. It is well established in the social sciences and has flourished in the field of accounting in recent decades. This updated edition maintains the structure of the original handbook and includes all the original chapters, which have been revised to reflect the current and evolving emphasis on the theories and tools employed in behavioural research and applied to the research in the accounting domain. In addition to the updated original chapters, eight new chapters have been included, reflecting the expansion of the topics, theories and methodologies and presenting developmental advice for behavioural accounting researchers. The new topics and theory chapters include chapters outlining our progress in research on the accounting for sustainability, language effects in financial disclosures, advances in policy-related research in financial accounting, the impact of algorithms and artificial intelligence, and the role of data analytics and data visualization on decision making in accounting and auditing. Two additional method chapters include a primer on Hayes PROCESS models in mediation and moderation, as well as a new chapter outlining best practices in the design and implementation of experiential questionnaires. Finally, a chapter has been added providing guidance and advice on responding to reviewers' comments to complement the first edition chapter on preparing a review. This book is a vital introduction for advanced doctoral students in behavioural accounting research, as well as a valuable

resource for established behavioural accounting researchers providing a comprehensive guide to the development and implementation of a behavioural accounting research project

The Routledge Handbook of Accounting Information

Systems Erik Strauss, Martin Quinn, 2022-11-25 The Routledge Handbook of Accounting Information Systems is a prestige reference work offering a comprehensive overview of the state of current knowledge and emerging scholarship in the discipline of AIS. The pace of technological driven change is rapid and this revised edition provides a deeper focus on the technical underpinnings and organisational consequences of accounting information systems. It has been updated to capture the changes in technology since the previous edition. It now includes chapters and scholarly thought on artificial intelligence, predictive analytics and data visualisation among others. Contributions from an international cast of authors provide a balanced overview of established and developing themes, identifying issues and discussing relevant debates. The chapters are analytical and engaging. Many chapters include cases or examples and some provide additional resources for readers. The chapters also provide a reflection on where the research agenda is likely to advance in the future. This is a complete and indispensable guide for students and researchers in accounting and accounting information systems, academics and students seeking convenient access to an unfamiliar area as well as established researchers seeking a single repository on the current debates and literature in the field. *Research Handbook on Accounting and Ethics* Marion Brivot, Charles H.

Cho, 2023-03-02 This invigorating Research Handbook focuses on collective ethical issues facing the accounting profession as a whole as well as the users of the services provided by accountants. Providing an overview of contemporary accounting and ethics issues around the world, it discusses the ethical considerations involved in accounting, including external and internal auditing, tax, forensic accounting and governance as well as new areas of research relating to accounting and ethics through cross fertilization with other disciplines and presenting multiple innovative perspectives. *Accounting in Emerging Economies* Mathew Tsamenyi, Shahzad Uddin, 2009-11-19 Accounting research in emerging economies has grown over the years. This title includes articles that contribute to our understanding of how accounting functions in emerging economies.

Management Scholarship and Organisational Change Miriam Green, 2019-01-08 Change is a crucial and inescapable process for many organisations It remains a constant challenge for managers and many change management initiatives fail Burns and Stalker's seminal text on managing change The Management of Innovation has often been used as a basis for research in mainstream management journals and has been represented as an important theory in popular and long established management textbooks The issues raised in that book are still being grappled with by academics and practitioners today Miriam Green provides a critical analysis of the mainstream construction of knowledge on change management through an examination of representations of that text The main thesis of her book is that this literature though valuable does not provide a full picture

Its objectivist approach ignores the role of other factors raised in the original study. These factors include the effects of power, politics, resistance, and employee influence on the outcomes of managerial change strategies and on other organisational processes with important consequences for the understanding of change initiatives by both academics and practitioners. This is part of an ongoing debate in management studies and more widely in the social sciences about theoretical approaches and research methods. The originality of this book lies in its in-depth comparison of an entire monograph on organisations facing technological and commercial change with an equally in-depth analysis of the ways this work has been represented and used as a basis for teaching and research. It highlights the limitations of the exclusive use of one approach to explain the complications arising from organisational change. It challenges the scientific justification offered for that approach and supports arguments for more inclusive and sustainable scholarship of greater relevance to academics, managers, and other organisational stakeholders.
