Historical Dictionary of Gothic Literature William Hughes, 2013 Literary fashions come and go but some hang around longer than others like Gothic literature which has existed ever since *The Castle of Otranto* in 1764 During this long while it has spread from England to the rest of Great Britain and across to the continent and off to America and Australia filling in the gaps more recently Most of it is in English but hardly all and it has adopted all styles from romanticism to modernism to postmodernism and even adjusted to feminist and queer literature and science fiction We have all read some Gothic tales or if not read then seen them in the cinema since they adapt well to film treatment and it would be hard to find anyone who has not heard of ghosts and vampires

let alone Count Dracula and Frankenstein On the other hand some of us are inveterate Gothic fans reading one book or story after the other The Historical Dictionary of Gothic Literature follows this long and winding path first in an extensive chronology and then a useful introduction which explains the nature of Gothic and shows how it has evolved Obviously the dictionary section has entries on major writers and some of the best known works but also on geographical variants like Irish Scottish or Russian Gothic and Female Gothic Queer Gothic and Science Fiction This is provided in over 200 often substantial and always intriguing entries More can be found in a detailed bibliography including general works but also more specialized ones on different styles and genres and also specific authors This book should certainly interest the fans but also more serious researchers

Familial Properties is the first full length history of Vietnamese gender relations in the precolonial period Author Nhung Tuyet Tran shows how despite the bias in law and practice of a patrilineal society based on primogeniture some women were able to manipulate the system to their own advantage Women succeeded in taking pragmatic advantage of socioeconomic turmoil during a time of war and chaos to acquire wealth and to some extent control what happened to their property Drawing from legal literary and religious sources written in the demotic script classical Chinese and European languages Tran argues that beginning in the fifteenth century state and local communities produced laws and morality codes limiting women's participation in social life Then in the seventeenth and eighteenth centuries economic and political turmoil led the three competing states the Mac Trinh and Nguyen to increase their military service demands producing labor shortages in the fields and markets of the countryside Women filled the vacuum left by their brothers husbands and fathers and as they worked the lands and tended the markets they accumulated monetary capital To protect that capital they circumvented local practice and state law guaranteeing patrilineal inheritance rights by soliciting the cooperation of male leaders In exchange for monetary and landed donations to the local community these women were elected to become spiritual patrons of the community whose souls would be forever preserved by collective offering By tracing how the women local leaders and court elites negotiated gender models to demarcate their authority Tran demonstrates that despite the Confucian ethos of the times survival strategies were able to subvert gender norms and create new cultural models Gender thus as a signifier of power relations was central to the relationship between state and local communities in early modern Vietnam Rich and detailed in its use of documentary evidence from a range of archives this work will be of great interest to scholars of Southeast Asian history and the comparative study of gender
