Walter Keene Ferguson, 2014-11-07 Conservation and development of natural resources are issues of critical importance throughout the world These issues have been matters of public concern in Texas since legislators first adopted the state sponsored geological survey as a means of extending government funds to private citizens who would help develop and advertise the mineral and agricultural wealth of Texas Walter Keene Ferguson examines the relation of politics to geological exploration during a critical period in Texas history the first half century of statehood Although Texas shared its frontier experience with many other areas it could not rely on federal aid in the form of land grants because the state government controlled the destiny of the public domain at all times Acrimonious debate between farmers and urbanites of East Texas and pioneer ranchers of arid West Texas rendered the disposition of public lands even more difficult As tools for developing and advertising resources the geological and agricultural surveys of 1858 and 1867 fulfilled the demands of expectant capitalism made by politicians speculators and railroad entrepreneurs Reconnaissance geologists publicized the wealth of Texas Drought in 1886 and popular agitation against squandering of state land caused the emergence of a new concept of the geological survey as an instrument of land reform and public assistance Lobbying by reformers and scientific organizations led to the formation of the Dumble Survey in 1888 and the University of Texas Mineral Survey in 1901 Stratigraphic analysis of the individualities of Texas geology helped the state realize its full economic potential and led to legislation to protect public mineral land from exploitation The youthful oil industry finally removed geological exploration from the political arena As part of the University a permanent Bureau of Economic Geology was established in 1909 to extend the benefits of scientific research to private citizens and state organizations on a nonpartisan

basis Ferguson's analysis of geological surveys in Texas contributes to an understanding not only of the geology and history of the state but of the urgent problem of evaluating the natural resources of underdeveloped regions **The Irrigation Age**, 1895 Days of Vintage, Years of Vision Midge Sherwood, 1987 The life of James De Barth Shorb of the San Marino Ranch today the site of the world famous Huntington Library is the story of a family including his father in law Benjamin D Wilson charter mayor of Los Angeles and his brother in law George Smith Patton founding mayor of San Marino and father of General Patton of World War II They planted vineyards and built cities to establish Southern California a state in itself for one brief moment in the history of the American frontier West *Nebraska Legislative Year Book for the ...
