Islam Observed Religious Development In Morocco And Indonesia Phoenix S:

Islam observed Clifford Geertz,1975 Islam Observed Clifford Geertz,1971-08-15 In four brief chapters writes Clifford Geertz in his preface I have attempted both to lay out a general framework for the comparative analysis of religion and to apply it to a study of the development of a supposedly single creed Islam in two quite contrasting civilizations the Indonesian and the Moroccan Mr Geertz begins his argument by outlining the problem conceptually and providing an overview of the two countries He then traces the evolution of their classical religious styles which with disparate settings and unique histories produced strikingly different spiritual climates So in Morocco the Islamic conception of life came to mean activism moralism and intense individuality while in Indonesia the same concept emphasized aestheticism inwardness and the radical dissolution of personality In order to assess the significance of these interesting developments Mr Geertz sets forth a series of theoretical observations concerning the social role of religion Islamist Radicalisation in North Africa George Joffe,2012-06-12 In the current climate of political extremism and violence much attention has been directed towards radicalisation as the reasons behind such courses of action along with a conviction that those who are radicalised represent an irrational deviation from the conventionally accepted norms of social and political behaviour This book focuses on the current issues and analytical approaches to the phenomenon of radicalisation in North Africa Taking a comprehensive approach to the subject it looks at the processes that lead to radicalisation rather than the often violent outcomes At the same time chapters expand the discussion historically and conceptually beyond the preoccupations of recent years in order to develop a more holistic understanding of a complex individual and collective process that has represented a permanent challenge to dominant political social and on occasion economic norms With contributions from academics and policy makers within and outside the region the book is a comprehensive investigation of Islamist Radicalisation As such it will be of great interest to academics and students investigating North Africa and terrorism as well as specialists in radicalism and extremism *Power, Legitimacy and the Public Sphere* Amin Isaloo,2017-04-28 A ground breaking study of political transformations in non Western societies this book applies anthropological sociological and political concepts to the recent history of Iran to explore the role played by a ritual theatrical performance Ta ziyeh and its symbols on the construction of public mobilisations With particular attention to three formative phases the 1978 79 Islamic Revolution the 1980 88 Iran Iraq War and the 2009 Green Movement the author concentrates on the relations between symbols of the ritual performance and the public sphere to shed light on the ways in which the symbols of Ta ziyeh were used to claim political legitimacy Thus the book elucidates how symbols and images of a ritual performance can be utilised by tricksters such as political actors and fanatical religious leaders to take advantage of the prolongation of a state of transition within a society and so manipulate the public in order to mobilise crowds and movements to fulfil their own interests and concerns An insightful analysis of political mobilisation explained in terms of a set of interrelated master concepts such as liminality trickster and schismogenesis Power

Legitimacy and the Public Sphere integrates theoretical empirical and diagnostic perspectives in order to investigate and illustrate links between the public sphere and religious and cultural rituals As such it will appeal to scholars of sociology politics and anthropology with interests in social theory public mobilisations and political transformation Visions of Religion Stephen S. Bush, 2014 Winner of the Gustave O Arlt Award in the Humanities Three understandings of the nature of religion religion as experience symbolic meaning and power have dominated scholarly discussions in succession for the past hundred years Proponents of each of these three approaches have tended to downplay ignore or actively criticize the others But why should the three approaches be at odds Religion as it is practiced involves experiences meanings and power so students of religion should attend to all three Furthermore theorists of religion should have an account that carefully conceptualizes all three aspects without regarding any of them as more basic than the others Visions of Religion provides just such an account Stephen S Bush examines influential proponents of the three visions arguing that each approach offers substantial and lasting contributions to the study of religion although each requires revision Bush rehabilitates the concepts of experience and meaning two categories that are much maligned these days In doing so he shows the extent to which these categories are implicated in matters of social power As for power the book argues that the analysis of power requires attention to meaning and experience Visions of Religion accomplishes all this by articulating a social practical theory of religion that can account for all three aspects even as it incorporates them into a single theoretical framework

Redemptive Encounters Lawrence A. Babb, 1986 In this comparative study of three modern religious movements Lawrence A Babb argues that thematic continuities exist between traditional Hinduism and its widely divergent modern expressions *Religious Consciousness and Experience* Thomas N. Munson, 2012-12-06 It is one of the ironies of our times that as the practise of religion wanes a theoretical interest in it on the part of many anthropologists psychologists sociologists and philosophers waxes Among these only philosophers bring to their task a long history of theological and religious relations Hence their renewed interest has been hailed as a break down of isolationism heralding perhaps a new era of interdisciplinary peace To celebrate this new ecumenism a Chicago seminary consis tently with its purpose sponsored a colloquium to explore the future of philosophical theology If some of its participating professional philosophers initially felt a twinge of embarrassment over their presence at an ostensibly theological meeting they soon were at ease No one was called upon to define the topic or even to suggest its relationship to a philosophy of religion Conveniently everyone could roll up his sleeves and get to work on a job he personally felt needed doing Can we wonder that the lay observer appeared somewhat confused Was the purpose to analyze God talk or to find a place for God in a metaphysical scheme Or if not these something else It soon became evident that the participants in the colloquium ranged from the free swinger to the severely inhibited depending upon the role each assigned to dogma and creed **Un-Veiling Dichotomies** Giorgia Baldi, 2021-09-27 This book analyzes the implication of secular liberal values in Western and human rights law and its impact on Muslim women It

offers an innovative reading of the tension between the religious and secular spheres The author does not view the two as binary opposites Rather she believes they are twin categories that define specific forms of lives as well as a specific notion of womanhood This divergence from the usual dichotomy opens the doors for a reinterpretation of secularism in contemporary Europe This method also helps readers to view the study of religion vs secularism in a new light It allows for a better understanding of the challenges that contemporary Europe now faces regarding the accommodation of different religious identities For instance one entire section of the book concerns the practice of veiling and explores the contentious headscarf debate It features case studies from Germany France and the UK In addition the analysis combines a wide range of disciplines and employs an integrated comparative and inter disciplinary approach The author successfully brings together arguments from different fields with a comparative legal and political analysis of Western and Islamic law and politics This innovative study appeals to students and researchers while offering an important contribution to the debate over the role of religion in contemporary secular Europe and its impact on women s rights and gender equality

Religious Diversity

Today Jean-Guy A. Goulet,Liam D. Murphy,Anastasia Panagakos,2015-12-01 This insightful three volume set examines faith through the social and cultural perspective of anthropology sociology and religious studies shedding light on the role of religion in the human experience Why is human suffering and the existence of evil part of the human experience How does religious doctrine establish one s identity In what ways does religion interact with and shape the social order This thought provoking work ponders these questions and explores the concept of religion from various perspectives as a tool for self and community based spiritual awareness as a set of practices that translates faith into interaction with others and as a cornerstone of society for those who seek to harness or hinder its influence Written in accessible and inviting language each volume focuses on a particular dimension of religion The first book examines religious experience in the modern world and explores suffering in religious faiths the second volume centers around ritual and pilgrimage and the last book analyzes the controversial relationship between religion and societies The content features such thought provoking topics as death and green burials sexuality and sex trade and how and why evil manifests in the human experience

Meaning in Myth Thomas M. Casey, 1989-11-01 Why is one person a believer and another an atheist Why does one person demand facts for verification while another trusts feelings Why are some who hear voices declared psychotic while others are called saints The answers to these questions are not mere speculation or amusing distraction rather they are the essential components in developing curiosity open mindedness and tolerance for differences Meaning in Myth speaks to the various ways in which we all construct our myth or life story from our very personal ways of thinking evaluating judging and ignoring It is nothing less than an invitation to encounter other viewpoints other faiths and disbeliefs and ultimately ourselves
