Islamic Art and Beyond Oleg Grabar, 2006 The articles selected for *Islamic Art and Beyond* the third in the set of four selections of articles by Oleg Grabar illustrate how the author's study of Islamic art led him in two directions for a further understanding of the arts One is how to define Islamic art and what impulses provided it with its own peculiar forms and dynamics of growth The other issue is that of the meanings to be given to forms like domes so characteristic of Islamic art or to terms like symbol signs or aesthetic values in the arts especially when one considers the contemporary world

Art and Architecture in the Islamic Tradition Mohammed Hamdouni Alami, 2013-12-20 What is art in the sense of the Islamic tradition Mohammed Hamdouni Alami argues that Islamic art has historically been excluded from Western notions of art that the Western aesthetic tradition s preoccupation with the human body and the ban on the representation of the human body in Islam has meant that Islamic and Western art have been perceived as inherently at odds However the move away from this anthropomorphic aesthetic in Western art movements such as modern abstract and constructivist painting have presented the opportunity for new ways of viewing and evaluating Islamic art and architecture This book questions the very idea of art predicated on the anthropocentric bias of classical art and the corollary exclusion of Islamic art from the status of art It addresses a central question in post classical aesthetic theory in as much as the advent of modern abstract and constructivist painting have shown that art can be other than the representation of the human body that art is not neutral aesthetic contemplation but it is fraught with power and violence and that the presupposition of classical art was not a universal truth but the assumption of a specific cultural and historical set of practices and vocabularies Based on close readings of classical Islamic literature philosophy poetry medicine and theology along with contemporary Western art theory the author uncovers

a specific Islamic theoretical vision of art and architecture based on poetic practice politics cosmology and desire In particular it traces the effects of decoration and architectural planning on the human soul as well as the centrality of the gaze in this poetic view in Arabic nazar while examining its surprising similarity to modern theories of the gaze Through this double gesture moving critically between two traditions the author brings Islamic thought and aesthetics back into the realm of visibility addressing the lack of recognition in comparison with other historical periods and traditions This is an important step toward a critical analysis of the contemporary debate around the revival of Islamic architectural identity a debate intricately embedded within opposing Islamic political and social projects throughout the world *The Art and Architecture of Islam 1250-1800* Sheila S. Blair, Jonathan M. Bloom, 1996-09-25 They discuss for example how the universal caliphs of the first six centuries gave way to regional rulers and how in this new world order Iranian forms techniques and motifs played a dominant role in the artistic life of most of the Muslim world the one exception was the Maghrib an area protected from the full brunt of the Mongol invasions where traditional models continued to inspire artists and patrons By the sixteenth century say the authors the eastern Mediterranean under the Ottomans and the area of northern India under the Mughals had become more powerful and the Iranian models of early Ottoman and Mughal art gradually gave way to distinct regional and imperial styles **A Companion to Islamic Art and Architecture, 2 Volume Set** Finbarr Barry Flood, Gulru
