Isotope Geochemistry A Derivative Of The Treatise On Geochemistry:

Isotope Geochemistry Heinrich D Holland, Karl K. Turekian, 2010-09-27 After the discovery that elements were commonly composed of isotopes there developed a range of studies of the variability of isotopic compositions in Earth materials which was able to add to our understanding of Earth processes and history This collection of chapters from the Treatise on Geochemistry describes the range of isotopic studies The chapters are grouped into the following categories light stable isotopes radiogenic tracers noble gases and radioactive tracers The first three groups depend on mass spectrometric measurements The section on radioactive tracers employs both radioactive counting techniques and the newly developed accelerator mass spectrometric techniques Comprehensive interdisciplinary and authoritative content selected by leading subject experts Robust illustrations figures and tables Affordably priced sampling of content from the full Treatise on Geochemistry

From Crust to Core Simon Mitton, 2020-12-17 Carbon plays a fundamental role on Earth It forms the chemical backbone for all essential organic molecules produced by living organisms Carbon based fuels supply most of society's energy and atmospheric carbon dioxide has a huge impact on Earth's climate This book provides a complete history of the emergence and development of the new interdisciplinary field of deep carbon science It traces four centuries of history during which the inner workings of the dynamic Earth were discovered and documents extraordinary scientific revolutions that changed our understanding of carbon on Earth forever carbon's origin in exploding stars the discovery of the internal heat source driving the Earth's carbon cycle and the tectonic revolution Written with an engaging narrative style and covering the scientific endeavours of more than a hundred pioneers of deep geoscience this is a fascinating book for students and researchers working in Earth system science and deep carbon research
