The Future of Liberal Education Timothy Burns, Peter Lawler, 2016-04-14 Liberal Education once the whole of American Higher Education

has been displaced by technical training and career oriented majors But it has also suffered from the decline in genuine liberal learning found in humanities disciplines owing to specialization politicization and the adoption of new literary and psychological theories The social sciences too have arguably abandoned the kind of relentless and sometimes disturbing questioning that used to constitute the core of education In this compelling volume thirteen college educators describe in sparkling prose what liberal education is its place in a liberal democracy the very serious challenges it faces in the 21st century even from some of its alleged friends and why it is important to sustain and expand liberal education s place in American colleges and universities Proponents and critics of liberal education alike will benefit from these insightful essays This book was originally published as a special issue of Perspectives on Political Science

The Business of Cyber Peter Fagan, 2024-02-23 This book examines the cybersecurity phenomenon looking at the folklore the hype and the behaviour of its practitioners A central theme is that the management of cybersecurity needs to be owned by the people running the organisation rather than by the cybersecurity team who frequently don t have management as a core skill In order to effect that change managers need to have the background and detail to challenge what they are being told enabling them to engage in a way that will result in more appropriate outcomes for the business This book provides that background and detail It debunks a number of cyber myths and calls out basic errors in the accepted thinking on cyber The content is strongly rooted in available research and presented in an accessible manner with a number of business related case studies Each chapter in the book takes a theme such as end user behaviours and compares the available evidence with what the industry would like to have its customers believe The conclusion is that there is definitely a problem and we certainly need cyber defences Just not the ones the industry is currently selling
