Capua, R. De Rosa, G. Kereszturi, E. Le Pera, M. Rosi, S.F.L. Watt, 2023-04-18 Volcanoes and sedimentary systems are linked by  
a strong relationship The ascent and eruption of magma liberates large volumes of material through a variety of mechanisms  
to the surrounding environment with subsequent sediment input and transport influencing the evolution of that environment

rise to an increasing body of academic research over the past three decades Volcanic Processes in the Sedimentary Record  
When Volcanoes Meet the Environment collects innovative works exploring how volcanoes and sedimentary systems interact  
moving from the processes directly associated with eruptive behaviour to the most distal sedimentary offshoots where  
volcanogenic particles are accumulated during or after volcanic activity In doing this different volcanic and environmental  
settings are explored travelling through space and time showing how volcanoclastic detritus is produced and dispersed by  
volcanic volcano sedimentary and sedimentary mechanisms via processes affecting development of volcanic edifices  
themselves through to the most distal depocentres      *Bioelectromagnetic and Subtle Energy Medicine* Davis
