Poison Ivy Evan Mandery,2025-03-18 Hailed as a staggering portrait of inequality in America Philip Dray *Poison Ivy* tells the bigger seedier story of how elite colleges create paths to admission available only to the wealthy despite rhetoric to the contrary In a lively and trenchant *Washington Monthly* account Evan Mandery a Harvard graduate and current professor at a public college that serves low and middle income students reveals how tacit agreements between exclusive Ivy plus schools and white affluent suburbs create widespread de facto segregation And as a college degree continues to be the surest route to upward mobility the inequality bred in our broken higher education system is now a principal driver of skyrocketing income inequality Mandery contrasts the lip service paid to opportunity by so many elite colleges and universities with schools that actually walk the walk Now in an accessible paperback format *Poison Ivy* is a no holds barred takedown *Forbes* that synthesizes fascinating insider information on everything from how students are evaluated unfair tax breaks and questionable fundraising practices to suburban rituals testing tutoring tuition schemes and more This bold provocative indictment of America s elite colleges shows us exactly what s at stake and what will be possible if we muster the collective will to transform it

Model Science Teacher Preparation Programs Jon Pedersen,Tetsuo Isozaki,Toshihde Hirano,2017-02-01 This volume will focus on a much need comparison of science teacher preparation from around the world In recent times last 5 years much has been written and communicated both in the popular press and within the annals of research oriented publications about the performance of students international in math and science Although not a new discussion or debate many countries are held as exemplars in how they educate their youth and subsequently how they educate their teachers Given this situation and given the fact that there is ample evidence to show that some countries youth perform better on tests such as the Program for International Student Assessment PISA and we know that teacher significantly contribute to the performance of students it is time that we look at the specific attributes of teacher preparation worldwide Although this volume will not look at every country that is in the comparator group for PISA and other measures we have contacted over 18 potential authors in the same number of countries in which there is ample evidence to show successes regarding student performance and quality teacher preparation programs The intent of the book is not just to report on the success of each nation Rather the intent is to ask authors to take a critical look at the process by which science teachers are educated and share with the reader both the positive and negative aspects of such preparation programs For all 15 contributed chapters the editors have analyzed each and from this constructed from the data an analysis and report in a final chapter on the exemplary qualities from various nations and make specific recommendations regarding science teacher preparation for the global community

Armed Conflict, Women and Climate Change Jody M. Prescott,2018-11-21 The gender

differentiated and more severe impacts of armed conflict upon women and girls are well recognised by the international community as demonstrated by UN Security Council Resolution UNSCR 1325 on Women Peace and Security and subsequent resolutions. Similarly the development community has identified gender differentiated impacts upon women and girls as a result of the effects of climate change. Current research and analysis has reached no consensus as to any causal relationship between climate change and armed conflict but certain studies suggest an indirect linkage between climate change effects such as food insecurity and armed conflict. Little research has been conducted on the possible compounding effects that armed conflict and climate change might have on at risk population groups such as women and girls. *Armed Conflict Women and Climate Change* explores the intersection of these three areas and allows the reader to better understand how military organisations across the world need to be sensitive to these relationships to be most effective in civilian centric operations in situations of humanitarian relief, peacekeeping and even armed conflict. This book examines strategy and military doctrine from NATO, the UK, US and Australia and explores key issues such as displacement, food and energy insecurity and male out migration as well as current efforts to incorporate gender considerations in military activities and operations. This innovative book will be of great interest to students and scholars of international relations, international development, international security, sustainability, gender studies and law.

The Shifting Global World of Youth and Education Mabel Ann Brown, 2017-08-15. *The Shifting Global World of Youth and Education* explores how increasing migration and population changes are having an unprecedented impact on global education. Given that the number of children of migrant background is growing internationally, there is a need for increasing awareness of the educational attainment and cultural integration of this population group. This book presents international perspectives on migration and youth and analyses what kinds of effects such demographic changes are having on educational systems around the world. The chapters in this volume provide a fascinating insight into how countries around the world are dealing with loss or growth in their young population as well as changes to their education systems. Written by specialist academics from the relevant country, the book covers Cuba, Lithuania, the United Kingdom, the United States, Finland, Greece, Germany, Austria, Hungary, Latvia, China, Australia, India, Italy and Poland. Taking into consideration the countries' social and political context, the chapters discuss educational issues surrounding curriculum, assessment and the opportunities available for the support of young people. Conclusions are drawn about what could be done in the future for the benefit of both the migrant and the existing populations. *The Shifting Global World of Youth and Education* will be of great interest to academics, researchers and postgraduate students in the disciplines of education, sociology, political sciences and social work. The book will also give secondary teachers, teaching assistants, social workers and youth workers the opportunity to reflect on their role within a national and international context.

Underrepresentation of Women in Science: International and Cross-Disciplinary Evidence and Debate Stephen J. Ceci, Wendy

M. Williams, Shulamit Kahn, 2018-04-20 There is no shortage of articles and books exploring women's underrepresentation in science. Everyone is interested: academics, politicians, parents, high school girls and boys, women in search of college majors, administrators working to accommodate women's educational interests; the list goes on. But one thing often missing is an evidence-based examination of the problem, uninfluenced by personal opinions, accounts of lived experiences, anecdotes, and the always encroaching inputs of popular culture. This is why this special issue of *Frontiers in Psychology* can make a difference. In it, a diverse group of authors and researchers with even more diverse viewpoints find themselves united by their empirical, objective approaches to understanding women's underrepresentation in science today. The questions considered within this special issue span academic disciplines, methods, levels of analysis, and nature of analysis; what these articles share is their scholarly, evidence-based approach to understanding a key issue of our time. *Children's drawings: Evidence-based research and practice* Matteo Angelo Fabris, Monica Shiakou, Claudio Longobardi, Christiane Lange-Küttner, 2023-08-24

The United States Catalog Mary Burnham, Carol Hurd, 1928 [Towards a Competence-Based View on Models and Modeling in Science Education](#) Annette Upmeyer zu Belzen, Dirk Krüger, Jan van Driel, 2020-01-01 The book takes a closer look at the theoretical and empirical basis for a competence-based view of models and modeling in science learning and science education research. Current thinking about models and modeling is reflected. The focus lies on the development of modeling competence in science education and on philosophical aspects including perspectives on nature of science. The book explores, interprets, and discusses models and modeling from the perspective of different theoretical frameworks and empirical results. The extent to which these frameworks can be integrated into a competence-based approach for science education is discussed. In addition, the book provides practical guidance by outlining evidence-based approaches to diagnosing and promoting modeling competence. The aim is to convey a strong understanding of models and modeling for professions such as teacher educators, science education researchers, teachers, and scientists. Different methods for the diagnosis and assessment of modeling competence are presented and discussed with regard to their potential and limitations. The book provides evidence-based ideas about how teachers can be supported in teaching with models and modeling, implementing a competence-based approach, and thus how students can develop their modeling competence. Based on the findings, research challenges for the future are identified. **Improving a Country's Education** Nuno Crato, 2020-11-23 This open access book compares and contrasts the results of international student assessments in ten countries. The OECD's Programme for International Student Assessment (PISA) released the results of its 2018 assessment in December 2019. This book reflects the debates that typically follow the release of these results and focuses on the causes of differences between countries. Such causes include continuous decline in one country, improvement combined with increasing internal inequalities in another country, or rapid improvement in spite of an outdated curriculum in yet another. In addition, the book discusses a number of general questions: Is knowledge outdated? Are computers taking over and replacing teachers? Are schools killing

creativity Are we adequately preparing the next generation Are schools failing to educate our kids The book starts out with a summary of PISA's evolution and PISA results and an explanation of the major factors that play a role in changes in countries' results The next ten chapters are devoted to ten specific countries offering a summary of data and an explanation of the major drivers for changes in education results for each one Each chapter includes a short description of the country's educational system as well as the impact of PISA and other ILSA studies on the country's educational policies The chapters also include a timeline of policy measures and main hallmarks of the country's educational evolution discussing the impact of these measures on its PISA results A final reference chapter explains what PISA is what it measures and how While highlighting the 2018 results the book also takes into consideration previous results as well as long term initiatives This book gathers the contribution of well known and respected experts in the field Specialists such as Eric Hanushek for the US Tim Oates for England Montse Gomendio for Spain Gunda Tire for Estonia and all other contributors draw on their vast experience and statistical analysis expertise to draw a set of rich country lessons and recommendations that are invaluable for all of those who care about improving a country's education system

Development Laura E. Levine, Joyce Munsch, 2016-12-01 In the Third Edition of the topically organized *Child Development: An Active Learning Approach* authors Laura E. Levine and Joyce A. Munsch invite students to take an active journey toward understanding the latest findings from the field of child development. Using robust pedagogical tools built into the chapter narratives, students are challenged to confront myths and misconceptions, participate in real-world activities with children and independently, and utilize video resources and research tools to pursue knowledge and develop critical thinking skills on their own. This new edition covers the latest findings on developmental neuroscience, positive youth development, the role of fathers and more, with topics of diversity and culture integrated throughout. More than a textbook, this one-of-a-kind resource will continue to serve students as they go on to graduate studies to work with children and adolescents professionally and to care for children of their own. *14th International Symposium on Process Systems Engineering* Yoshiyuki Yamashita, Manabu Kano, 2022-06-24 The 14th International Symposium on Process Systems Engineering Volume 49 brings together the international community of researchers and engineers interested in computing-based methods in process engineering. The conference highlights the contributions of the PSE community towards the sustainability of modern society and is based on the 2021 event held in Tokyo, Japan, July 1-23, 2021. It contains contributions from academia and industry establishing the core products of PSE, defining the new and changing scope of our results, and covering future challenges. Plenary and keynote lectures discuss real-world challenges: globalization, energy, environment, and health, and contribute to discussions on the widening scope of PSE versus the consolidation of the core topics of PSE. Highlights how the Process Systems Engineering community contributes to the sustainability of modern society. Establishes the core products of Process Systems Engineering. Defines the future challenges of Process Systems Engineering.
