 Royal, 2022-07-19 Winner of the 2024 AERA Outstanding Book Award Not Paved for Us chronicles a fifty year period in
 Philadelphia education and offers a critical look at how school reform efforts do and do not transform outcomes for Black
 students and educators This illuminating book offers an extensive expert analysis of a school system that bears the legacy
 hallmarks and consequences that lie at the intersection of race and education Urban education scholar Camika Royal deftly
 analyzes decades of efforts aimed at improving school performance within the School District of Philadelphia SDP in a brisk
 survey spanning every SDP superintendency from the 1960s through 2017 Royal interrogates the history of education and
 educational reforms recounting city state and federal interventions She covers SDP's connections with the Common School
 Movement and the advent of the Philadelphia Freedom Schools and she addresses federal policy shifts from school
 desegregation to the No Child Left Behind and Every Student Succeeds Acts Her survey provides sociopolitical context and
 rich groundwork for a nuanced examination of why many large urban districts struggle to implement reforms with fidelity
 and in ways that advance Black students academically and holistically In a bracing critique Royal bears witness to the ways
 in which positive public school reform has been obstructed through racism and racial capitalism but also via liberal ideals
 neoliberal practices and austerity tactics Royal shows how despite the well intended actions of larger entities the weight of
 school reform here as in other large urban districts has been borne by educators striving to meet the extensive needs of their
 students families and communities with only the slightest material financial and human resources She draws on the
 experiences of Black educators and community members and documents their contributions Not Paved for Us highlights the
 experiences of Black educators as they navigate the racial and cultural politics of urban school reform Ultimately Royal
 names dissects and challenges the presence of racism in school reform policies and practices while calling for an antiracist

Critical Conversations Tom Gilson, 2016-02-27 Christian parents need to be prepared to answer the myriad challenges teens might hear in today's increasingly pro homosexual culture Why shouldn't gays get married Who says gay sex is wrong Does the Bible actually say there's anything wrong with homosexuality Don't you care that kids are being bullied just for being themselves To start the discussion Gilson provides a brief history of the issues beginning with the sexual revolution of the 1960s He explains how and why cultural attitudes have reversed on this subject in such a short timespan leaving Christians scrambling for answers This is perhaps the most complicated and contentious issue Christians face in today's culture Most churches are poorly equipped to handle it parents are even less prepared The good news is that parents need not have pat answers ready before they dive into conversations with their teens and preteens on this difficult topic Learning together parents struggling through these issues alongside their kids and leading them to biblical answers has relational benefits Answers are important though so manageable nontechnical answers to common questions surrounding this issue are provided as well as a guide to further resources

Bounded Rationality in Decision Making Under Uncertainty: Towards Optimal Granularity Joe Lorkowski, Vladik Kreinovich, 2017-07-01 This book addresses an intriguing question are our decisions rational It explains seemingly irrational human decision making behavior by taking into account our limited ability to process information It also shows with several examples that optimization under granularity restriction leads to observed human decision making Drawing on the Nobel prize winning studies by Kahneman and Tversky researchers have found many examples of seemingly irrational decisions e.g. we overestimate the probability of rare events Our explanation is that since human abilities to process information are limited we operate not with the exact values of relevant quantities but with granules that contain these values We show that optimization under such granularity indeed leads to observed human behavior In particular for the first time we explain the mysterious empirical dependence of betting odds on actual probabilities This book can be recommended to all students interested in human decision making to researchers whose work involves human decisions and to practitioners who design and employ systems involving human decision making so that they can better utilize our ability to make decisions under uncertainty

One Size Does Not Fit All Indrek S. Wichman, 2017-12-31 Academic success requires talent ability which is not equally distributed among students Almost all American undergraduates hail from K-12 public schools based on the theory that everyone is academically educable This has led to the one size fits all system which has underserved the less academically inclined students a majority of the K-12 population The theory that every student is academically educable an unverified axiom of the current K-12 educational paradigm has not been subjected to serious scrutiny Consequently little progress has been made toward curricular revision except tweaks of the existing system currently the world's most expensive However testing classroom performance teacher assessment advances in human biology and most importantly family and

community experience suggest that it is possible to determine who is suited for an academic or a technical education Once that hurdle is crossed the question of how to best educate train prepare America s non academic youth can be thoughtfully practically and compassionately addressed
