Grand Paris Vers Plan Marc:

The Making of Grand Paris Theresa Enright, 2023-09-19 A critical examination of metropolitan planning in Paris the Grand Paris initiative and the building of today's networked global city In 2007 the French government announced the Grand Paris initiative This ambitious project reimagined the Paris region as integrated balanced global sustainable and prosperous Metropolitan solidarity would unite divided populations a new transportation system the Grand Paris Express would connect the affluent city proper with the low income suburbs streamlined institutions would replace fragmented governance structures Grand Paris is more than a redevelopment plan it is a new paradigm for urbanism In this first English language examination of Grand Paris Theresa Enright offers a critical analysis of the early stages of the project considering whether it can achieve its twin goals of economic competitiveness and equality Enright argues that by orienting the city around growth and marketization Grand Paris reproduces the social and spatial hierarchies it sets out to address For example large expenditures for the Grand Paris Express are made not for the public good but to increase the attractiveness of the region to private investors setting off a real estate boom encouraging gentrification and leaving many residents still unable to get from here to there Enright describes Grand Paris as an example of what she calls grand urbanism large scale planning that relies on infrastructural megaprojects to reconfigure urban regions in pursuit of speculative redevelopment Democracy and equality suffer under processes of grand urbanism Given the logic of commodification on which Grand Paris is based these are likely to suffer as the project moves forward

Planning the Impossible Eirini Kasioumi, 2021-07-05 International airports have become an inherent part of many urban regions and key transport infrastructures for metropolitan economies Yet they are also a source of tensions often associated with the contrasting impacts of their operation Taking the example of Charles de Gaulle airport CDG in Paris the author analyzes the factors influencing urban development and the related spatial strategies Step by step she traces the history of the airport examines prominent conflicts and their management by planners and derives broader lessons Intended for town planners policy makers and urban designers the book makes an important contribution to understanding the challenges and assessing the effectiveness of planning approaches for airport regions

Alfred Bonnardot, 1852 , *In the Sun King's Cosmos* Claire Goldstein, 2025-02-15 Offering a new history of a formative cultural and political era through the cosmic phenomena that captured the public's imagination In the winters of 1664-65 and 1680-81 the French public was galvanized by two bright comets whose elliptical orbits could not be mapped with contemporary geometry and that thus seemed to appear in random and unpredictable locations Bookending the period during which Louis XIV's sun king mythology was created these comets defied the heliocentric order to which French politics and culture aspired As Claire Goldstein demonstrates literary texts cultural institutions and architecture inspired by comets

offer a different perspective on the relationship between sensory experience ideology and artistic form In the Sun King s Cosmos Comets and the Cultural Imagination of Seventeenth Century France presents an alternative view of a formative era in cultural and political history when distinctly modern forms of power and control were established through a regime of the spectacular Goldstein shows how comets allow us to see the seventeenth century in ways that complicate the narrative of a race toward rationalization classicism and modernity indexing instead a messy period in which the spectacular was sometimes also inscrutable
