Online Laboratories in Engineering and Technology Education Dominik May, Michael E. Auer, Alexander Kist, 2025-01-29 This comprehensive book divided into seven sections showcases groundbreaking research findings that blend new experiences from the COVID 19 pandemic with long term research on online laboratories and virtual experimentation Providing an adequate learning experience in the laboratory has long been a major challenge in science engineering and technology education Recent years have further revealed the complexities of offering distance or remotely accessible educational settings particularly for laboratory based courses In response many academic institutions have innovated by transitioning their laboratory classes into online laboratories or providing laboratory kits for at home use This unprecedented situation has sparked numerous new developments approaches and activities revolutionizing the field With contributions from leading researchers and practitioners across diverse disciplines this book delves into current trends addresses critical challenges and uncovers future opportunities for laboratory based education in the context of online learning Whether readers are educators seeking innovative teaching strategies researchers exploring the latest advancements or academic leaders looking to enhance remote learning experiences this book provides valuable insights and practical solutions It explores how online laboratories are transforming education and discovers the potential they hold for the future

Robotic Fabrication in Architecture, Art and Design 2016 Dagmar Reinhardt, Rob Saunders, Jane Burry, 2016-02-03 The book presents the proceedings of Rob Arch 2016 the third international conference on robotic fabrication in architecture art and design The work contains a wide range of contemporary topics from methodologies for incorporating dynamic material feedback into existing fabrication processes to novel interfaces for robotic programming to new processes for large scale automated construction The latent argument behind this research is that the term file to factory must not be a reductive celebration of expediency but instead a perpetual challenge to increase the quality of feedback between design matter and making

Computer-aided Technologies Razvan Udriou, 2016-12-07 The aim of this book is to present the latest applications trends and developments of computer aided technologies CAx Computer aided technologies are the core of product lifecycle management PLM and human lifecycle management HUM This book has seven chapters organized in two sections Computer Aided Technologies in Engineering and Computer Aided Technologies in Medicine The first section treats the different aspects of PLM including design simulations and analysis manufacturing production planning and quality assurance In the second part of the book are presented CAx applications in medicine focused on clinical decision diagnosis and biosensor design CAx plays a key role in a variety of engineering and medical applications bringing a lot of benefits in product life cycle extending and improving human life

Advanced, Contemporary Control Andrzej Bartoszewicz, Jacek Kabziński, Janusz Kacprzyk, 2020-06-24 This book presents the proceedings of the 20th Polish Control Conference A triennial event that was first held in 1958 the conference successfully combines its long tradition with

a modern approach to shed light on problems in control engineering automation robotics and a wide range of applications in these disciplines The book presents new theoretical results concerning the steering of dynamical systems as well as industrial case studies and worked solutions to real world problems in contemporary engineering It particularly focuses on the modelling identification analysis and design of automation systems however it also addresses the evaluation of their performance efficiency and reliability Other topics include fault tolerant control in robotics automated manufacturing mechatronics and industrial systems Moreover it discusses data processing and transfer issues covering a variety of methodologies including model predictive robust and adaptive techniques as well as algebraic and geometric methods and fractional order calculus approaches The book also examines essential application areas such as transportation and autonomous intelligent vehicle systems robotic arms mobile manipulators cyber physical systems electric drives and both surface and underwater marine vessels Lastly it explores biological and medical applications of the control theory inspired methods
