Governments and Communities is designed as the primary textbook for a quarter or semester long course in public budgeting and finance in an MPA programme. Many currently available texts for this course suffer from a combination of defects that include a focus on federal and state budgeting, a lack of a theoretical governance framework, an omission of important topics, and typically a lack of exercises and datasets for student use. Budgeting for Local Governments and Communities solves all of these problems. The book is exceptionally comprehensive and well written and represents the efforts of veteran authors with both teaching and real world experience.

- Polity Approach to Local Budgeting** presents an introduction to local budgeting as the central political activity that integrates the resources of the community into a unified whole.
- Budgeting is presented as governance work** rather than as a unique set of skills possessed by analysts and financial specialists.
