The Carbon Buster's Home Energy Handbook Godo Stoyke, 2006-11-01 Most people are unaware that environmental problems such as climate change can be easily avoided at a profit through the intelligent application of appropriate technology The Carbon

Buster's Home Energy Handbook describes how to achieve this goal in the residential field. The first book in North America to provide a detailed carbon accounting of a family's carbon emissions and how to reduce them, it systematically analyzes energy costs and evaluates which measures yield the highest returns for the environment and the pocketbook. It provides answers to questions such as: Which measure is more effective: putting solar panels on your roof or buying a hybrid car? Where do I need to invest first: in high efficiency shower heads or solar tubes? Is a 500 fridge that uses 800 kWh of power per year a good buy? The book allows individuals to quickly and accurately assess which products are a good deal and which aren't. It systematically analyzes residential carbon emissions and energy costs and prioritizes solutions based on highest carbon reductions and monetary returns, yielding results that are often surprising. The book enables readers to dramatically reduce their carbon emissions far below the levels targeted under the Kyoto Protocol. At the same time, readers implementing the recommendations will save an average of 15,000 in energy costs over the next five years.

The Chef's Garden FARMER LEE JONES, 2021-04-27 An approachable comprehensive guide to the modern world of vegetables from the leading grower of specialty vegetables in the country. Near the shores of Lake Erie is a family-owned farm with a humble origin story that has become the most renowned specialty vegetable grower in America. After losing their farm in the early 1980s, a chance encounter with a French-trained chef at their farmers market stand led the Jones family to remake their business and learn to grow unique ingredients that were considered exotic at the time, like microgreens and squash blossoms. They soon discovered chefs across the country were hungry for these prized ingredients. From Thomas Keller in Napa Valley to Daniel Boulud in New York City, today they provide exquisite vegetables for restaurants and home cooks across the country. The Chef's Garden grows and harvests with the notion that every part of the plant offers something unique for the plate. From a perfect tasting carrot to a tiny red royal turnip to a pencil lead thin cucumber still attached to its blossom, The Chef's Garden is constantly innovating to grow vegetables sustainably and with maximum flavor. It's a Willy Wonka factory for vegetables. In this guide and cookbook, The Chef's Garden, led by Farmer Lee Jones, shares with readers the wealth of knowledge they've amassed on how to select, prepare, and cook vegetables. Featuring more than 500 entries from herbs to edible flowers to varieties of commonly known and not so common produce, this book will be a new bible for farmers market shoppers and home cooks. With 100 recipes created by the head chef at The Chef's Garden Culinary Vegetable Institute, readers will learn innovative techniques to transform vegetables in their kitchens with dishes such as Ramp Top Pasta, Seared Rack of Brussels Sprouts, and Cornbread Stuffed Zucchini Blossoms, and even sweet concoctions like Onion Caramel and Beet Marshmallows. The future of cuisine is vegetables, and Jones and The Chef's Garden are on the forefront of this revolution.
