

## Components of a Miter Saw

FIGURE 1

### ASSEMBLY

#### Attaching the Extension Supports and Miter Lock Handle

1. Insert the ends of the Extension

Supports into the holes in the sides of the Base. Tighten the Wing Screws to hold the Extensions in place. The upper edge of the Extensions will be level with the surface of the saw. This provides a wider base for the work material to rest on.

2. Thread the Miter Lock Handle into the opening of the miter handle until securely in place.

#### Attaching the Dust Collection Bag

3. The Dust Collection Bag slips over the Dust Outlet behind the Blade Housing Assembly. Sawdust created by cutting is captured in the bag.

### MOUNTING THE SAW

The Miter Saw must be mounted on a support before use. This may be a commercially available support or home made saw table. There are bolt holes provided in each of the four legs of the base. These should be firmly mounted using bolts (not included) to your saw stand or saw table (not included). This will help prevent tipping or movement of the saw, preventing injury. Also, the use of a saw table will make it easier to efficiently handle work materials and make more accurate cuts
