Imagine Architecture Artistic Visions Of The Urban Realm:

Imagine Architecture Lukas Feireiss, Robert Klanten, 2014 Visual culture influences architecture and vice versa Imagine Architecture compiles contemporary perspectives on this exchange from those working in creative fields including installation sculpture illustration photography and design Contemporary developments in the visual arts are often reflected in urban landscapes Imagine Architecture explores the ways in which visual culture develops in public spaces and how it shapes those spaces This book focuses on the fruitful exchange between visual culture and architecture and follows up on the themes introduced in our previous release Beyond Architecture It compiles experimental projects and creative perspectives from the fields of illustration painting collage sculpture photography installation and design A young generation of creatives sees the urban landscape as the starting point for their work When these Illustrated by sculptors or photographers engage with architecture their art overrules conventional doctrines on the use of space They use buildings as a medium for their ideas breaking norms and triggering new tensions Whether they make sculptures that are created within the context of a given structure or street art whose forms and colors impact its surrounding architecture all of the featured projects interpret and reflect their spatial settings in compelling ways In the process these visionary concepts are playfully expanding the definition of architecture Their creativity has the potential to breathe new life into public spaces and promote the evolution of our cities Imagine Architecture showcases spirited artwork that experiments with architecture and pushes its boundaries As a contemporary survey of visual culture the book is not only a must read for architects but also for anyone who sees architecture as a source of inspiration and an opportunity to project their creativity *Legacy* Lukas Feireiss, 2018 Generational dialogues between 40 world renowned creatives exploring how the creative legacy of previous generations is being reinterpreted over time Description What is this phenomenon we call legacy This intangible inheritance that we eventually leave for our posterity Is it the creative and intellectual heritage that one generation passes on to the next Conceived by Lukas Feireiss the book at hand tries to probe this open question by engaging in critical dialogue different generations of creatives connectors and thinkers alike In some cases between inherent legacy of parent and child in many cases between mentor and students or simply between friends The more than 40 illustrious contributors to this dialogue derive from an array of fields of knowledge and experience Their stories often provide very personal insights into their work and life They also reveal a broader perspective on the overall realms of art design architecture music literature photography and curation in the 20th and 21st century With contributions by Olafur Eliasson and Einar Thorsteinn Lukas Feireiss and Ai Weiwei Charlie and Rem Koolhaas Francesca Gavin and Kerry James Marshall Sophie Lovell and Dieter Rams Hans Ulrich Obrist and Yona Friedman Shumon Basar and Ken Adam Carson Chan and Phyllis Lambert Rachel and Daniel Libeskind Andres Ramirez and Denise Scott Brown Aric Chen and Arata Isozaki Ahmir Questlove Thompson and George Clinton and many more El jardín de los delirios Ramón del Castillo, 2021-11-22 Una crítica a las fantasías del naturalismo h pster

Desde pequeños nos transmiten una forma de situarnos en el espacio la naturaleza puede considerarse el lugar de aventuras picas o el escenario del aburrimiento absoluto puede ser un lugar para huir de la vida urbana pero también algo peligroso que evitar La naturaleza se ha ido convirtiendo en un objeto de adoración pero el ecologismo no requiere del culto la principal razón por la que se promueve el cuidado del medioambiente es egoísta La humanidad maneja la naturaleza a su antojo ha creado una planta electrónica a la que cuidar como un Tamagotchi vende islas artificiales con la forma de los continentes y sus países y en Nueva York ya existe también el Lowline el primer parque subterráneo del mundo

Drawing Futures Bob

Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas

Berlin - Visionen einer zukünftigen Urbanität Christine Scherzinger,2017-03-15 Können Kunst und Kreativität zu einem Mittel werden um Widersprüche im System Stadt aufzudecken und eigene Formen der Zukunftsbetrachtungen zu entwickeln Christine Scherzinger fragt aus Sicht einer kritischen geographischen Stadtforschung nach Visionen einer zukünftigen Urbanität In detaillierten auf Berlin bezogenen Fallstudien analysiert sie künstlerische Positionen in einem reflexiven transdisziplinären Prozess und lotet die Grenzen der Veränderbarkeit zwischen performativen künstlerischen Interventionen und Zeichnungen aus Die Studie lässt Bild und Möglichkeitenräume entstehen die Impulse für eine andere Stadtgestaltung geben und den Menschen wieder in den Fokus rücken

The Artist and Political Vision Benjamin R. Barber,Michael J. Gargas McGrath, Art and politics are often regarded as denizens of different realms but few artists have been comfortable with the notion of a purely aesthetic definition of art The artist has a public and thus political vision of the world interpreted by his art no less than the statesman and the legislator have a creative vision of the world they wish to make The sixteen original essays in this volume bear eloquent witness to this interpenetration of art and politics Each confronts the intersection of the aesthetic and the social each is concerned with the interface of poetic vision and political vision of reflection and action They take art in the broadest sense

ranging over poets dramatists novelists essayists and filmmakers Their focus is on art and its political dilemmas not simply on the artist They consider the issues raised for politics and culture by alienation violence modernization technology democracy progress and revolution And they debate the capacity of art to stimulate social change and incite revolution the temptations of social control of culture and of political censorship the uncertain relationship between art and history the impact of economic structure on artistic creation and of economic class on artistic product the common ground between art and legislation and between creativity and control

Visions of the City David Pinder, 2013-11-12 Visions of the City is a dramatic history of utopian urbanism in the twentieth century It explores radical demands for new spaces and ways of living and considers their effects on planning architecture and struggles to shape urban landscapes The author critically examines influential utopian approaches to urbanism in western Europe associated with such figures as Ebenezer Howard and Le Corbusier uncovering the political interests desires and anxieties that lay behind their ideal cities He also investigates avant garde perspectives from the time that challenged these conceptions of cities especially from within surrealism At the heart of this richly illustrated book is an encounter with the explosive ideas of the situationists Tracing the subversive practices of this avant garde group and its associates from their explorations of Paris during the 1950s to their alternative visions based on nomadic life and play David Pinder convincingly explains the significance of their revolutionary attempts to transform urban spaces and everyday life He addresses in particular Constant's New Babylon finding within his proposals a still powerful provocation to imagine cities otherwise The book not only recovers vital moments from past hopes and dreams of modern urbanism It also contests current claims about the end of utopia arguing that reconsidering earlier projects can play a critical role in developing utopian perspectives today Through the study of utopian visions it aims to rekindle elements of utopianism itself A superb critical exploration of the underside of utopian thought over the last hundred years and its continuing relevance in the here and now for thinking about possible urban worlds The treatment of the Situationists and their milieu is a revelation David Harvey Distinguished Professor of Anthropology City University of New York Graduate School

Cosmopolitanism in Mexican Visual Culture María Fernández, 2014-01-06 Since the colonial era Mexican art has emerged from an ongoing process of negotiation between the local and the global which frequently involves invention synthesis and transformation of diverse discursive and artistic traditions In this pathfinding book María Fernández uses the concept of cosmopolitanism to explore this important aspect of Mexican art in which visual culture and power relations unite the local and the global the national and the international the universal and the particular She argues that in Mexico as in other colonized regions colonization constructed power dynamics and forms of violence that persisted in the independent nation state Accordingly Fernández

presents not only the visual qualities of objects but also the discourses ideas desires and practices that are fundamental to the very existence of visual objects Fern ndez organizes episodes in the history of Mexican art and architecture ranging from the seventeenth century to the end of the twentieth century around the consistent but unacknowledged historical theme of cosmopolitanism allowing readers to discern relationships among various historical periods and works that are new and yet simultaneously dependent on their predecessors She uses case studies of art and architecture produced in response to government commissions to demonstrate that established visual forms and meanings in Mexican art reflect and inform desires expectations memories and ways of being in the world in short that visual culture and cosmopolitanism are fundamental to processes of subjectification and identity
