Weapons of Mass Migration Kelly M. Greenhill, 2011-06-23 At first glance the U S decision to escalate the war in Vietnam in the mid 1960s China's position on North Korea's nuclear program in the late 1990s and early 2000s and the EU resolution to lift what remained of the arms embargo against Libya in the mid 2000s would appear to share little in common Yet each of these seemingly unconnected and far reaching foreign policy decisions resulted at least in part from the exercise of a unique kind of coercion one predicated on the intentional creation manipulation and exploitation of real or threatened mass population movements In *Weapons of Mass Migration* Kelly M Greenhill offers the first systematic examination of this widely deployed but largely unrecognized instrument of state influence She shows both how often this unorthodox brand of coercion has been attempted more than fifty times in the last half century and how successful it has been well over half the time She also tackles the questions of who employs this policy tool to what ends and how and why it ever works Coercers aim to affect target states behavior by exploiting the existence of competing political interests and groups Greenhill argues and by manipulating the costs or risks imposed on target state populations This coercion by punishment strategy can be effected in two ways the first relies on straightforward threats to overwhelm a target's capacity to accommodate a refugee or migrant influx the second on a kind of norms enhanced political blackmail that exploits the existence of legal and normative commitments to those fleeing violence persecution or privation The theory is further illustrated and tested in a variety of case studies from Europe East Asia and North America To help potential targets better respond to and protect themselves against this kind of unconventional predation *Weapons of Mass Migration* also offers practicable policy recommendations for scholars government officials and anyone concerned about the true victims of this kind of coercion the displaced themselves

Xenophobia and Islamophobia in Europe Raymond Taras, 2012-06-20 European anti Muslim attitudes the voice of public protest against out of touch elites Are anti Muslim attitudes becoming the spectre that is haunting Europe Is Islamophobia as widespread and virulent as is made out Or do some EU societies appear more prejudiced than others To what extent are European fears about unmanaged immigration the basis for scapegoating Muslim communities And is there an anti elitist dimension to Europeans protest about rapid demographic change occurring in their countries This cross national analysis of Islamophobia looks at these questions in an innovative even handed way steering clear of politically correct cliches and stereotypes It cautions that Islamophobia is a serious threat to European values and norms and must be tackled by future immigration and integration policy

Law, Security and Migration Laura Planas Gifra, 2024-09-09 This book analyzes the impact of the increasing

securitization of migration within the international legal and political order Migration has increasingly become a security issue Examining this tendency towards the securitization of migration around the world this book argues that it is indicative of a shift in the international order towards geopolitical and security strategies and away from cooperation and multilateralism States are now more inclined to produce national legislation in the fields of countering terrorism migration and security than dealing with such global issues through international cooperation and international norm making As such this book demonstrates they tend to prioritize national rather than international interests in a radical shift away from the universal rights and liberal values that were dominant at the end of the 20th century to a model based on geopolitical interests The securitization of migration is a process that not only affects the rights of migrants but ushers in a new international legal and political order This book will be of considerable interest to scholars and professionals in the fields of international law international relations migration security and human rights Governing Migration Beyond the State

Andrew Geddes,2021-01-19 International migration has become a salient concern in global politics but there is also significant variation in governance responses By focusing on four key world regions Europe North America South America and Southeast Asia this book explores the underlying factors that shape governance responses Rather than focusing on the more visible outputs or outcomes of governance processes such as laws and policies this book opens the black box of migration governance to reveal how understandings and representations of the causes and effects of migration held by key governance actors in these four regions have powerful effects not only on governance outcomes but more broadly on the prospects for global migration governance By doing so the book shows how migration governance systems through their operation and effects can shape migration in its various forms and the lived experiences of migrants **Refugees**

immigrants Contemporary immigration systems are characterized by increasing complexity and expanding enforcement and frequently criticized for violating human rights and for causing death exclusion and exploitation The migrant crisis can also be understood as a crisis of hospitality for liberal democracies Through analysis of the immigration histories and political dynamics of Britain and the US the book explains how these two archetypal liberal states have both sought to create a hostile environment for unwanted immigrants The book provides a fresh and original perspective on the development of immigration systems showing how they have become subject to the politics of fear and greed and revealing how different traditions of hospitality have evolved survived and renewed

Migration and the Crisis of the Modern Nation State? Frank Jacob, Adam Luedtke, 2018-01-10 The anthology explores the interrelationship between migration and a supposedly existent crisis of the modern nation state The argument of such a crisis is mainly used by the New Right to stimulate nationalist feelings and provoke hate and aggression We in contrast to this perception argue that from a historical and current perspective migration is not endangering the nation state but rather changing the idea of a nation itself by redefining it In historical as well as current case studies the authors determine the political dangers of right wing demagogues while emphasizing the chances immigration is offering the progress of the nation state While it will be discussed how nationalism is impacting on the perception of migration we also want to emphasize how it is perceived by the people in the specific regions which are either confronted with migration or those which are not The authors for the volume come from different fields namely history and political sciences and are consequently able to offer the reader a broad insight into the historical roots and the current consequences nationalism had or has on the perception and the local as well as global policies towards migration The analysis of particular immigrant groups e g North Koreans in post war Korea South Asians in the Emirates Middle Eastern refugees in Europe Hispanics in the United States as well as a close reading of crisis related media newspapers and other media in Europe and the US will all in all establish a broad perspective due to which the reader will be able to compare and connect the national events to a larger global picture

The Exclusionary Politics of Asylum V. Squire, 2016-01-12 This critique of the securitization and criminalization of asylum seeking challenges the claim that asylum seekers threaten receiving states It analyzes recent policy developments in relation to their wider historical political and European contexts and argues that the UK response effectively renders asylum seekers as scapegoats

Irregular Immigration in Southern Europe Maurizio Ambrosini, 2018-01-05 Focusing on the dynamics of irregular immigration in Southern EU Member States this book analyses how the phenomenon is managed at national and local levels in different legal and political systems In doing so it answers vital policy questions regarding the continued existence of irregular migration pathways to legality and relations between unauthorized migrants and receiving societies The author argues that while the economic crisis and migrant flows coming from the South and East of the Mediterranean Sea have called this regime into question it is the needs of labour markets in Southern Europe and compliance with European Union rules that has had a more dominant effect The particular manner in which labour markets political actors social institutions and migrants networks intersect are shown to be distinctive features of the migration regime in this region Describing bordering and debordering practices from the island of Lampedusa to local communities in distant regions this book brings fresh insights to urgent areas of debate within the field It analyses why many irregular immigrants are socially accepted such
