

The background of the book cover is a stylized, painterly illustration. On the left, a man's face is shown in profile, looking towards the right. He has dark hair and a slight smile. He is wearing a light-colored, possibly white, shirt with a dark collar. Behind him, there are several dark, rounded shapes that look like hats or pieces of clothing, and a large, textured red area that could be a piece of fabric or a wall. The overall style is reminiscent of early 20th-century art.

Like a Brother Neil Goodwin, 2015-11-15 When the anthropologist Grenville Goodwin died in 1940 at the age of 32 he had published several papers and one book *Myths and Tales of the White Mountain Apache* and had already achieved a stature that has only continued to grow His posthumous landmark monograph *The Social Organization of the Western Apache* was hailed by anthropologist Edward Spicer as one of the most detailed and best documented studies of Indian social organization Yet although he was highly regarded by colleagues within the profession Goodwin himself was largely self taught with neither formal training nor academic degrees This volume is the latest in series of books derived from his unpublished papers It helps broaden our understanding of Goodwin s life and work It includes selections from his field notes diaries and letters along with those of his wife Jan and other family members Assembled by Goodwin s son Neil who never knew his father these writings are gathered in thematic chapters that extend Neil Goodwin s earlier work *The Apache Diaries* and shed light on Grenville Goodwin s deepening understanding of the Apache people and their culture and of the wrenching problems which reservation life forced on them In two of the chapters Neil tells how he retraced his father s search for the Sierra Madre Apache re discovering abandoned Apache campsites and conveying even more personally than his father s diaries what was for both father and son the adventure of a lifetime Other chapters trace Goodwin s interest in children of the Sierra Madre Apaches who were captured in Mexican raids on these camps during the early decades of the twentieth century The full stories of the lives of three of these children are for the first time pieced together from newly gathered research Grenville was quiet self effacing and rarely revealed his inner life but one chapter affords a closer look a portrait of his marriage to Neil s mother Jan Her diary entries juxtaposed with her vivid poetry and her paintings and drawings illuminate her relationship with Grenville and throw his elusive personality into deeper relief than his own writings do Here too are letters from Goodwin s Apache friends that paint a powerful and poignant portrait of their daily lives and of their relationship with him Goodwin s daily diary excerpts relate his own experiences on the San Carlos Apache reservation from 1928 to 1936 what was happening at the store how the cattle were doing who was in jail and thousands of other details that give readers a sharp sense of what the reservation was like in the 1930s As these writings also show Goodwin was powerfully drawn to Apache spirituality and became steeped in their sacred knowledge His simple description of a day in the life of an Apache family captures the expression of this spirituality in the rhythms of everyday life whether greeting the rising sun curing an injury plowing the earth or simply being good to one s family More than half a century after his death Grenville Goodwin continues to be regarded as one of the most enigmatic and romantic figures in American anthropology *Like a Brother* gives us a fuller understanding of the man and his work as it broadens our knowledge of Apache history and culture

Sanctuaries of Earth, Stone, and Light Gloria Fraser Giffords, 2007-12-06 Over nearly three centuries Jesuit Franciscan and Dominican missionaries built a network of churches throughout the new world of New Spain Since the early twentieth

century scholars have studied the colonial architecture of southern New Spain but they have largely ignored the architecture of the north. However, as this book clearly demonstrates, the colonial architecture of Northern New Spain, an area that encompasses most of the southwestern United States and much of northern Mexico, is strikingly beautiful and rich with meaning. After more than two decades of research both in the field and in archives around the world, Gloria Fraser Giffords has authored the definitive book on this architecture. Giffords has a remarkable eye for detail and for images both grand and diminutive. Because so many of the buildings she examines have been destroyed, she sleuthed through historical records in several countries and she discovered that the architecture and material culture of northern New Spain reveal the influences of five continents. As she examines objects as large as churches or as small as ornamental ceramic tile, she illuminates the sometimes subtle, sometimes striking influences of the religious, social, and artistic traditions of Europe from the beginning of the Christian era through the nineteenth century, of the Muslim countries ringing the Mediterranean from the seventh through the fifteenth centuries, and of Northern New Spain's indigenous peoples whose art influenced the designs of occupying Europeans. *Sanctuaries of Earth, Stone, and Light* is a pathbreaking book featuring 200 stunning photographs and over 300 illustrations ranging from ceremonial garments to detailed floor plans of the churches.

Plant Life of a Desert Archipelago Richard Stephen Felger, Benjamin Theodore Wilder, Humberto Romero-Morales, 2013-01-31. The desert islands of the Gulf of California are among the world's best preserved archipelagos. The diverse and unique flora, from the cardón forests of Cholludo to the agave-dominated slopes of San Esteban, remain much as they were centuries ago when the Comcaac Seri people were the only human presence in the region. Almost 400 plant species exist here, with each island manifesting a unique composition of vegetation and flora. For thousands of years, climatic and biological forces have sculpted a set of unparalleled desert worlds. *Plant Life of a Desert Archipelago* is the first in-depth coverage of the plants on islands in the Gulf of California found in between the coasts of Baja California and Sonora. The work is the culmination of decades of study by botanist Richard Felger and recent investigations by Benjamin Wilder in collaboration with Sr. Humberto Romero Morales, one of the most knowledgeable Seris concerning the region's flora. Their collective effort weaves together careful and accurate botanical science with the rich cultural and stunning physical setting of this island realm. The researchers surveyed, collected, and studied thousands of plants seen here in meticulous illustrations and stunning color photographs, providing the most precise species accounts of the islands ever made. To access remote parts of the islands, the authors worked directly with the Comcaac, an indigenous community who have lived off marine and terrestrial life in this coastal desert region for centuries. Invaluable information regarding indigenous names and distributions is an intrinsic part of this work. The flora descriptions are extraordinarily detailed and painstakingly crafted for field biologists, conservationists, students, and others who are interested in learning about the natural wealth of the Gulf of California desert regions or islands in general. You are sure to be captivated by this rich and fascinating volume.

Amphibians, Reptiles, and Their Habitats at Sabino Canyon David

Wentworth Lazaroff, Philip C. Rosen, Charles H. Lowe, 2025-06-10 Even in paradise one needs to be mindful of what's underfoot The Sabino Canyon Recreation Area is a desert oasis in the Santa Catalina Mountains north of Tucson a rich repository of wildlife and a favorite destination for Tucsonans and visitors for more than a century This book presents annotated and illustrated descriptions of the amphibians and reptiles found at Sabino Canyon and an overview of their natural environment Representing a study spanning nearly twenty five years it documents their present and past distribution and examines environmental and herpetofaunal change due to physical biological and human impact on species and habitats In this first publication to describe Sabino Canyon's biota in scientific detail three expert authors pool their knowledge to provide a detailed discussion of ecological change especially as a consequence of drought flooding the introduction of exotic species and direct human impact Suburbia has arrived on the canyon's doorstep and human visitation has soared inalterably affecting the area Of particular concern breeding habitats for amphibians were profoundly altered by flash flooding in Sabino's streams following the 2003 Aspen Fire which ravaged large parts of the Santa Catalina Mountains The book contains richly detailed accounts of the 57 species found at Sabino 25 snakes 17 lizards 8 toads and frogs 6 turtles and 1 salamander emphasizing their local ecology and the behavior likely to be witnessed by visitors Physical descriptions and numerous photographs many in color facilitate identification Up to date distribution maps provide an essential baseline against which future researchers can measure change Amphibians Reptiles and Their Habitats at Sabino Canyon is essential for anyone who seeks to understand this desert oasis how it has changed and how it may change in the future Written with minimal technical jargon to make it as useful to students and visitors as it will be to scientists and resource managers it makes a vital contribution to our understanding of creatures underfoot whose habitat we seek to share *Picturing Arizona* Katherine G. Morrissey, Kirsten Jensen, 2005-10-01 As cultural documents as works of art and as historical records photographs of 1930s Arizona tell a remarkable story They capture enduring visions of the Depression that linger in cultural memory dust storms Okies on their way to California breadlines and ramshackle tent cities They also reflect a more particular experience and a unique perspective This book places the work of local Arizonans alongside that of federal photographers both to illuminate the impact of the Depression on the state's distinctive racial and natural landscapes and to show the influence of differing cultural agendas on the photographic record The more than one hundred images by well known photographers such as Dorothea Lange and Laura Gilpin as well as by an array of less familiar photographers represent a variety of purposes and perspectives from public to personal political to promotional Six essays and three photo essays bring together prominent authorities in history the arts and other fields who provide diverse perspectives on this period in Arizona and American history Viewed together the words and images capture a Depression era Arizona bustling with activity as federally funded construction projects and seasonal agricultural jobs brought migrants and newcomers to the state They convey the celebrations and the struggles of commercial photographers archaeologists city folks farmers tourists native peoples and

others in these hard times As the economic strains of the decade reverberated through the state local photographers documented the lives of Arizona residents including those frequently overlooked by historians As this book persuasively shows photographs can conceal as much as they reveal A young Mexican American girl stands in front of a backdrop that hides the outhouse behind her a deeply moving image for what it suggests about the efforts of her family to conceal their economic circumstances Yet this image is a perfect metaphor for all the photographs in this book stories remain hidden but when viewers begin to question what they cannot see pictures resonate more loudly than ever before This book is a history of Arizona written from the photographic record offering a point of view that may differ from the written record From the images and the insights of the authors we can gain a new appreciation of how one state and its indomitable people weathered our nation's toughest times

The Ópatas David Yetman, 2010-11-15 In 1600 they were the largest most technologically advanced indigenous group in northwest Mexico but today though their descendants presumably live on in Sonora almost no one claims descent from the patas The patas seem to have disappeared as an ethnic group their languages forgotten except for the names of the towns plants and geography of the Opater a where they lived Why did the patas disappear from the historical record while their neighbors survived David Yetman a leading ethnobotanist who has traveled extensively in Sonora

consulted more than two hundred archival sources to answer this question The result is an accessible ethnohistory of the patas one that embraces historical complexity with an eye toward Opatan strategies of resistance and assimilation Yetman s account takes us through the Opatans initial encounters with the conquistadors their resettlement in Jesuit missions clashes with Apaches their recruitment as miners and several failed rebellions and ultimately arrives at an explanation for their disappearance Yetman s account is bolstered by conversations with present day residents of the Opatan and includes a valuable appendix on the languages of the Opatan by linguistic anthropologist David Shaul One of the few studies devoted exclusively to this indigenous group The patas In Search of a Sonoran People marks a significant contribution to the literature on the history of the greater Southwest

Field Man Julian D. Hayden, 2016-10-01 *Field Man* is the captivating memoir of renowned southwestern archaeologist Julian Dodge Hayden a man who held no professional degree or faculty position but who camped and argued with a who's who of the discipline including Emil Haury Malcolm Rogers Paul Ezell and Norman Tindale This is the personal story of a blue collar scholar who bucked the conventional thinking on the antiquity of man in the New World who brought a formidable pragmatism and hand sense to the identification of stone tools and who is remembered as the leading authority on the prehistory of the Sierra Pinacate in northwestern Mexico But *Field Man* is also an evocative recollection of a bygone time and place a time when archaeological trips to the Southwest were expeditions when a man might run a Civilian Conservation Corps crew by day and study the artifacts of ancient peoples by night when one could honeymoon by a still full Gila River and when a Model T pickup needed extra transmissions to tackle the back roads of Arizona To say that Julian Hayden led an eventful life would be an understatement He accompanied his father a Harvard trained archaeologist on influential excavations became a crew chief in his own right taught himself silversmithing married a city girl helped build the Yuma Air

Field worked as a civilian safety officer and was a friend and mentor to countless students. He also crossed paths with leading figures in other fields: Barry Goldwater and even Frank Lloyd Wright turn up in this wide-ranging narrative of a desert rat who was at once a throwback and as he only half-jokingly suggests ahead of his time. Field Man is the product of years of interviews with Hayden conducted by his colleagues and friends Bill Broyles and Diane Boyer. It is introduced by noted southwestern anthropologist J. Jefferson Reid and contains an epilogue by Steve Hayden, one of Julian's sons.

Last Water on the Devil's Highway Bill Broyles, Gayle Harrison Hartmann, Thomas E. Sheridan, Gary Paul Nabhan, Mary Charlotte Thurtle, 2014-02-06. The Devil's Highway, El Camino del Diablo, crosses hundreds of miles and thousands of years of Arizona and Southwest history. This heritage trail follows a torturous route along the U.S.-Mexico border through a lonely landscape of cactus, desert flats, drifting sand dunes, ancient lava flows, and searing summer heat. The most famous waterhole along the way is Tinajas Altas, or High Tanks, a series of natural rock basins that are among the few reliable sources of water in this notoriously parched region. Now an expert cast of authors describes, narrates, and explains the human and natural history of this special place in a thorough and readable account. Addressing the latest archaeological and historical findings, they reveal why Tinajas Altas was so important and how it related to other waterholes in the arid borderlands. Readers can feel like pioneers following in the footsteps of early Native Americans, Spanish priests and soldiers, gold seekers, and borderland explorers, tourists, and scholars. Combining authoritative writing with a rich array of more than 180 illustrations and maps, as well as detailed appendixes providing up-to-date information on the wildlife and plants that live in the area, Last Water on the Devil's Highway allows readers to uncover the secrets of this fascinating place, revealing why it still attracts intrepid tourists and campers today.
