Global South perspectives are encapsulated in struggles for basic economic, political and social transformation in an inequitable world and are not confined to the geographical South. Taking a critical perspective on Southern theories demonstrating why it is important to view the world from Southern perspectives and why such positions must be open to critical investigation, this book charts the impacts of these theories on approaches to multilingualism, language learning, language in education, literacy and diversity, language rights and language policy. It provides broad historical and geographical understandings of the movement towards a Southern perspective and draws on Indigenous and Southern ways of thinking that challenge mainstream viewpoints. It seeks to develop alternative understandings of applied linguistics, expand the intellectual repertoires of the discipline and challenge the complicities between applied linguistics, colonialism and capitalism. Written by two renowned scholars in the field, *Innovations and Challenges in Applied Linguistics from the Global South* is key reading for advanced students and researchers of applied linguistics, multilingualism, language and education, language policy and planning, and language and identity.

[The Intentional Dynamics of TESOL](#) Juup Stelma, Achilleas Kostoulas, 2021-04-19 This book presents intentional dynamics, which is a new perspective on TESOL contexts, activity and outcomes. The key innovation is a synthesis of complex systems and ecological theories as well as the concept of intentionality from the philosophy of mind to understand the psychological and social processes of TESOL. One aspect of intentional dynamics is the ordinary intentions of individuals to perform particular actions and of organisations to achieve planned outcomes. Another aspect is philosophically defined psychological and social forms of intentionality. Psychological intentionality is understood as what language learners and teachers and other stakeholders believe and emotions are about or directed at. Social intentionality is the aboutness expressed by TESOL materials, curricula and policies. The book explores how intentional dynamics both emerge from and give shape to TESOL activity and outlines what are the practical implications of intentional dynamics for TESOL learners, teachers, researchers, managers and policy makers.
