Linkography Gabriela Goldschmidt, 2014-03-14 The description of a method for the notation and analysis of the creative process in design drawing on insights from design practice and cognitive psychology This book presents linkography a method for the notation and analysis of the design process Developed by Gabriela Goldschmidt in an attempt to clarify designing linkography documents how designers think generate ideas put them to the test and combine them into something meaningful With linkography Goldschmidt shows that there is a logic to the creative process that it is not as is often supposed pure magic Linkography draws on design practice protocol analysis and insights from cognitive psychology Goldschmidt argues that the generation of ideas and their inspection and adjustment evolves over a large number of small steps which she terms design moves These combine in a network of moves and the patterns of links in the networks manifest a good fit or congruence among the ideas Goldschmidt explains what parts of the design process can be observed and measured in a linkograph describing its features and notation conventions The most significant elements in a linkograph are critical moves which are particularly rich in links Goldschmidt presents studies that show the importance of critical moves in design thinking describes cases that demonstrate linkography's effectiveness in studying the creative process in design focusing on the good fit and offers thirteen linkographic studies conducted by other researchers that show the potential of linkography in design thinking research and beyond Linkography is the first book length treatment of an approach to design thinking that has already proved influential in the field

**Quantitative Methods for Studying Design Protocols** Jeff WT Kan, John S Gero, 2017-06-13 This book is aimed at researchers and students who would like to engage in and deepen their understanding of design cognition research The book presents new approaches for analyzing design thinking and proposes methods of measuring design processes These methods seek to quantify design issues and design processes that are defined based on notions from the Function Behavior Structure FBS design ontology and from linkography A linkograph is a network of linked design moves or segments FBS ontology concepts have been used in both design theory and design thinking research and have yielded numerous results Linkography is one of the most influential and elegant design cognition research methods In this book Kan and Gero provide novel and state of the art methods of analyzing design protocols that offer insights into design cognition by integrating segmentation with linkography by assigning FBS based codes to design moves or segments and treating links as FBS transformation processes They propose and test information entropy as a means to capture the information carried by a linkograph and correlate it with the design outcomes

Different Perspectives in Design Thinking Yvonne Eriksson, 2022-03-02 Globalization and digitalization are buzz words in contemporary society They affect both our private and our professional lives Society has become more diverse with easier access to information and to virtual platforms that gives us opportunity to be in touch with colleagues friends family etc at any time A complex environment is emerging wherein internet of things and big data are being integrated with products production systems healthcare and daily activity and play an important part in decision making This has an impact on future
