Essential Aspects of Immunometabolism in Health and Disease Niels Olsen Saraiva Camara, Jose C Alves-Filho, Pedro Manoel Mendes de Moraes-Vieira, Vinicius

Andrade-Oliveira,2021-10-21 Immunometabolism has emerged as an intersectional crossroad between metabolism and immune response Over the past decade it has become clear that most if not all immune cell functions are not separated from cellular metabolism Although seminal works have addressed the metabolic fate of immune cells during differentiation and function the physiological status of a given tissue is also dependent on the cell metabolism The dialogue between immune cells and their microenvironment can also modulate cellular metabolism which can trigger the onset and progression of a multitude of inflammation mediated diseases Thus uncovering the specific characteristics of the metabolism in different immune cells types and in different conditions can shed light into the molecular mechanisms of disease and help develop new drugs and therapeutic strategies to treat immune diseases The edited volume Essentials aspects of Immunometabolism will give the readers a broad view on how metabolic pathways can influence many types of immune cells during activation differentiation and function in health and disease Of note the structure of the book was created thinking not only on the experienced immunologist but also on undergraduate and graduate students physicians and all members of the scientific community interested in this exciting field of research **Biotechnology of Plasma Proteins** Roger L.

Endless Immunity Marc Daëron, 2025-07-18 This book takes the reader on an inspiring journey into the immune system challenging long held beliefs about immunity It examines the immune system under historical philosophical and biological perspectives It proposes a new way of understanding immunity that goes beyond the binary opposition between self and non self Indeed we the livings are chimeras Mammals birds reptiles or fish insects spiders or mollusks plants or algae we are all made up of a community of living beings who share their lives in the same meta organism If we live together it is because we need each other to live and if we can live together it is because an immune system makes it possible by adapting us to them and by adapting them to us From this mutual adaptation a new kind of immunity emerges dynamic relational never acquired an endless immunity Immunity that this system makes possible is not

perfect far from it it is a compromise which does not always prevent disease sometimes it even causes it Disease is the cost of immunity Because what the immune system enables is much more essential than the defense of the organism it is the very existence of the meta organism that we are Immunity is more than a protection it is a condition of existence With its didactic structure and accessible style this book is an essential resource for anyone interested in understanding immunity and the immune system It offers different levels of complexity from which the reader can choose depending on his or her background without compromising the main message of the text With a Foreword by Alfred I Tauber
