Bush, 2018-02-05 A groundbreaking synthesis of climate change adaptation strategies for small island states globally A wide ranging comprehensive and multi disciplinary study this is the first book that focuses on the challenges posed by climate change impacts on the Small Island Developing States SIDS While most of the current literature on the subject deals with specific regions this book analyses the impacts of climate change across the Caribbean the Pacific Ocean and the African and Indian Ocean regions in order to identify and tackle the real issues faced by all the small island States As the global effects of climate change become increasingly evident and urgent it is clear that the impact on small islands is going to be particularly severe These island countries are especially vulnerable to rising sea levels hurricanes and cyclones frequent droughts and the disruption of agriculture fisheries and vital ecosystems On many small islands the migration of vulnerable communities to higher ground has already begun Food security is an increasingly pressing issue Hundreds of thousands of islanders are at risk Marine ecosystems are threatened by acidification and higher seawater temperatures leading to increased pressure on fisheries still an important source of food for many island communities The small island developing States emit only small amounts of carbon dioxide and other greenhouse gases Yet many SIDS governments are allocating scarce financial and human resources in an effort to further reduce their emissions This is a mistake Rather than focus on mitigation i e the reduction of greenhouse gas emissions *Climate Change Adaptation in Small Island Developing States* concentrates on adaptation The author assesses the immediate and future impacts of climate change on small islands and identifies a range of proven cost effective adaptation strategies The book Focuses on the challenges of climate change faced by all of the world s small island developing States Provides comprehensive coverage of the latest research into the most likely environment impacts Uses numerous case studies to describe proven practical and cost effective policies including disaster management strategies which can be developed and implemented by the SIDS Takes a unique multidisciplinary approach making it of particular interest to specialists in a variety of disciplines including both

earth sciences and life sciences This book is a valuable resource for all professionals and students studying climate change and its impacts It is also essential reading for government officials and the ministries of the 51 small island developing States as well as the signatories to the 2015 Paris climate agreement

Food Security in Small Island States John

Connell, Kristen Lowitt, 2019-06-25 This book provides a contemporary overview of the social ecological and economic vulnerabilities that produce food and nutrition insecurity in various small island contexts including both high islands and atolls from the Pacific to the Caribbean It examines the historical and contemporary circumstances that have accompanied the shift from subsistence production to the consumption of imported processed foods and drinks and the impact of this transition on nutrition and the rise of non communicable diseases It also assesses the challenges involved in reversing this trend and how more effective social and economic policies agricultural and fisheries strategies and governance arrangements could promote more resilient and sustainable small island food systems It offers both theoretical and practical perspectives and brings together a broad range of policy areas e g agriculture food commerce health planning and socio economic policy Given its scope the book offers a valuable resource for a range of disciplines in a number of regional contexts and for the growing number of scholars and practitioners working on and in small island states It will be of particular value as the first book to examine the diversity and commonalities of island states around the globe as they confront issues of food security

Climate change, drought and agriculture in Small Island Developing States Nisi, N., Barrett, S., Addison,

S., Salman, M., Giusti, S., Pék, E., 2024-08-05 Changes in agricultural and environmental practices can contribute to the emergence of agricultural drought conditions Unsustainable land use practices such as soil degradation deforestation and the destruction of wetlands can lead to decreased water availability and increased runoff Additionally certain agricultural practices like large scale irrigation and the cultivation of water intensive plant species can further deplete water resources leaving less water available for other purposes and diminishing groundwater levels In Small Island Developing States SIDS such challenges can easily become critical vulnerabilities Their remoteness and sensitive ecosystems enhance their exposure to natural hazards while their limited access to resources and high import costs often leave them with limited opportunities for economic diversification The report a result of the collaboration between FAO and IIED sheds light on the critical challenges of the agriculture sector in SIDS and provides insightful recommendations stemming from the broad consultations carried out in selected countries It identifies key areas for policy interventions and technical approaches and supports stakeholders in defining effective measures for drought risk resilience through improved land and water management

Global Action Programme on Food Security and Nutrition in Small Island Developing States Food and Agriculture

Organization of the United Nations, 2018-11-01 Most Small Island Developing States SIDS face a triple burden of malnutrition in which persistent levels of undernutrition and micronutrient deficiencies coexist with an increasing incidence of overweight and obesity A contribution to the 2030 Agenda for Sustainable Development the Global Action Programme on Food Security

and Nutrition provides a framework for SIDS to identify and implement priority actions to achieve food security and nutrition objectives These actions can improve nutrition and well being reduce poverty and inequalities and foster economic growth

Small Island Developing States Stefano Moncada,Lino Briguglio,Hilary Bambrick,Ilan Kelman,Catherine Iorns,Leonard Nurse,2021-10-19 This book explores how vulnerable and resilient communities from SIDS are affected by climate change proposes and where possible evaluates adaptation activities identifies factors capable of enhancing or inhibiting SIDS people s long term ability to deal with climate change and critiques the discourses vocabularies and constructions around SIDS dealing with climate change The contributions written by well established scholars as well as emerging authors and practitioners in the field include conceptual papers coherent methodological approaches and case studies from the communities based in the Caribbean Sea and the Indian Atlantic and Pacific Oceans In their introduction the editors contextualise the book within the current literature They emphasise the importance of stronger links between climate change science and policy in SIDS both to increase effectiveness of policy and also boost scholarly enquiry in the context of whose communities are often excluded by mainstream research This book is timely and appropriate given the recent commission by the Intergovernmental Panel on Climate Change IPCC of a Special Report that aims at addressing vulnerabilities especially in islands and coastal areas as well as the adaptation and policy development opportunities following the Paris Agreement Coupled with this there is also the need to support the policy community with further scientific evidence on climate change related issues in SIDS accompanying the first years of implementation of the United Nations

Land Degradation Neutrality in Small Island Developing States Food and Agriculture Organization of the United Nations , The Global Mechanism - United Nations Convention to Combat Desertification, 2020-04-01 Small Island Developing States SIDS are continuously under the threat from the adverse effects of climate change and land degradation impacts Land degradation directly increases CO2 emissions contributing to climate change and vice versa The LDN Target Setting

Programme TSP of the UNCCD has substantially contributed to land degradation receiving the policy attention and securing political commitments for addressing the obvious and immediate threats of climate change and natural disasters to SIDS. It has strengthened the availability and accessibility of data for assessing land degradation and enabled SIDS to set specific measurable science based targets. LDN provides the framework for the sustainable development of human settlements in SIDS through policy planning design and regulatory instruments.

A snapshot of the status and way forward for transforming agrifood systems in the Pacific Food and Agriculture Organization of the United Nations, 2023-04-24

Snapshot of the status and way forward for transforming agrifood systems in the Pacific. Identifying entry points and analysing trade offs for policymakers describes the impact of climate change on the agrifood systems of Pacific Island countries. The changing temperature, precipitation and sea level patterns have a significant impact on food production and trade, leading to food insecurity, malnutrition and non-communicable diseases particularly in vulnerable groups like women and youth. The report provides an overview of entry points for sustainable food system transformation such as traditional Pacific farming practices, crop diversification, agroforestry and community managed marine protection zones. The report also emphasizes the need for socioeconomic health and environmental impact assessments to manage these trade offs and to understand the potential revenue generation from taxes on unhealthy commodities which could be used to subsidize local food production and transport.
