Imperatives And Commands Oxford Studies In Typology And Linguistic Theory:

Imperatives and Commands ,2010 This is the first cross linguistic study of imperatives and commands of other kinds across the world s languages It makes a significant and original contribution to the understanding of their morphological syntactic semantic and pragmatic characteristics The author discusses the role imperatives and commands play in human cognition and how they are deployed in different cultures and in doing so offers fresh insights on patterns of human interaction and communication Alexandra Aikhenvald examines the ways of framing commands or command strategies in languages that do not have special imperative forms She analyses the grammatical and semantic properties of positive and negative imperatives and shows how these correlate with categories such as tense information source and politeness She looks at the relation of command pragmatics to cultural practices assessing for example the basis for Margaret Mead s assumption that the harsher the people the more frequently they use imperatives Professor Aikhenvald covers a wide range of language families including many relatively neglected examples from North America Amazonia and New Guinea The book is accompanied by illustrations of some conventional command signs Written and presented with the author s characteristic clarity this book will be welcomed by linguists of all theoretical persuasions It will appeal to social and cultural anthropologists and cognitive and behavioural scientists

Development of Modality in First Language Acquisition Ursula Stephany,Ayhan Aksu-Koç,2021-03-08 This book deals with the development of modality from a crosslinguistic perspective and is closely related to two earlier volumes on the development of verb and nominal inflection in first language acquisition SOLA 21 and 30 both methodologically and theoretically Each of the fourteen contributions studies the early development of the form and function of expressions of deontic and dynamic agent oriented modality or epistemic and evidential propositional modality in one of fourteen languages belonging to different morphological types and language families seven Indo European and seven

non Indo European The analyses are mainly based on longitudinal observations of children in their 2nd and 3rd years of life in conversational interaction with their caregivers mostly the mothers Main issues addressed are the development of directives and modulations of information in terms of certainty and evidentiality also taking into account children's developing social pragmatic and cognitive skills One of the main findings is that agent oriented and propositional modality may develop in parallel depending on the typological characteristics of the language acquired The decisive factor is whether notions of propositional modality are grammaticized and obligatorily expressed in the language The findings are interpreted within non nativist theoretical frameworks Usage based theories Natural Morphology **The Art of Language** ,2022-05-02 This book contributes to opening up disciplinary knowledge and offering connections between different approaches to language in contemporary linguistics Rather than focusing on a particular single methodology or theoretical assumption the volume presents part of the wealth of linguistic knowledge as an intertwined project which combines numerous practices positionalities and perspectives The editors believe together with the contributors to this volume that it is a crucial and timely task to emphasize the relevance of linguistic knowledge on power hospitality social class marginalization mobility history secrecy the structures of discourse and the construction of meaning as knowledge that needs to be brought together as it is brought together in personal discussions conversations and encounters To work along traces of linguistic connectivity marginalized narratives in and on lesser studied often stigmatized language practices and to shed light on the tasks of linguistics in making diverse knowledges transparent this offers spaces for critical discussion on the ethics of linguistics its challenges contributions and tasks These are the approaches that are characteristic for the work of Alexandra Y Aikhenvald to whom this book is dedicated **Trends in Hindi Linguistics** Ghanshyam Sharma,Rajesh Bhatt,2018-09-10 Trends in Hindi Linguistics provides a snapshot of current developments in Hindi syntax and semantics and covers topics such as definiteness marking comparative constructions with differentials conjunct verbs participial relative clauses ellipsis scrambling infinitives and directive strategies Together these papers give a rich and in depth account of the vitality of current research on Hindi **Zhoutun** Chenlei Zhou,2022-06-07 This book presents a description of the grammar of Zhoutun an endangered Sinitic variety spoken by less than 1000 people in the Qinghai Province of northwest China With vocabulary predominantly from Chinese and Tibetan syntax Zhoutun is one of the Sinitic varieties most distant from Standard Chinese with unexpected typological features like for example case markers rigid SOV word order simplified tonal system negative copula as a disjunctive coordinator and locutor referential pronoun which is not found in Chinese and in many languages Zhoutun is also a representative variety of the Gansu Qinghai linguistic area in which Mongolic and Turkic languages coexist with Tibetan and Chinese dialects from a long time This book also describes the sociolinguistic and sociohistorical contexts of Zhoutun It should be of interest to specialists and students of language contact linguistic typology Chinese dialectology language geography anthropological linguistics sociolinguistics folklore studies and preservation of

endangered languages **The Fate of Mood and Modality in Language Death** Petar Kehayov, 2017-07-24 Research into the grammar of language death is often biased toward formal processes e.g. paradigmatic levelling. In this study the author changes the perspective and shows that the relative susceptibility of linguistic elements to loss, change and innovation in language death circumstances can be dependent on meaning and thus organized along semantic notions rather than along structure.

Adpositions Claude Hagège, 2010-04-29 Adpositions lie at the core of the grammar of most languages, their usefulness making them recurrent in everyday speech and writing. Based on an analysis of 350 languages, this pioneering study examines their morphological features, syntactic functions and semantic and cognitive properties.

The Paradigmatic Structure of Person Marking Michael Cysouw, 2009-01-29 This book explores person markers, the linguistic elements that provide points of reference to speech act participants. Michael Cysouw develops a new framework for the typology of person marking based on the rejection of the notion of plurality for its analysis. When a mother says 'Mummy is going to say goodnight now', 'Mummy' is the person marker in a way that in English is confined to 'motherese' but which is used more commonly in some other languages and may also be characteristic of much earlier forms. Dr Cysouw divides the person markers of 400 languages into paradigms. He considers how the structure of these person paradigms relates to their function. His investigation provides a clear account of how person markers work syntactically, pragmatically and semantically, as well as giving fresh insights into aspects of linguistic change, language relatedness and the interfaces between discourse, syntax and semantics. The combination of a typological and a comparative approach results in the first outline of a cognitive map of the paradigmatic structure of person marking.

Basic Linguistic Theory Volume 3 R. M. W. Dixon, 2012-05-25 Basic Linguistic Theory provides a fundamental characterization of the nature of human languages and a comprehensive guide to their description and analysis. In crystal clear prose R. M. W. Dixon describes how to go about doing linguistics. He shows how grammatical structures and rules may be worked out on the basis of inductive generalisations and explains the steps by which an attested grammar and lexicon can be built up from observed utterances. He describes how the grammars and vocabulary of one language may be compared to others of the same or different families, explains the methods involved in cross linguistic parametric analyses and shows how to interpret the results. Volume 3 introduces and examines key grammatical topics, each from a cross linguistic perspective. The subjects include number

systems negation reflexives and reciprocals passives causatives comparative constructions and questions The final chapter discusses the relation between linguistic explanation and the culture and world view of the linguist and speakers of the language he or she is describing The book ends with a guide to sources a consideration of the number of languages in the world a glossary and indexes of authors languages and subjects covering all three volumes Volume 1 addresses the methodology for recording analysing and comparing languages and includes chapters on analysis typology phonology the lexicon and field linguistics Volume 2 like the present work considers underlying principles of grammatical organization and has chapters devoted to the word nouns and verbs adjectives transitivity copula constructions pronouns and demonstratives possession relative clauses and complementation Basic Linguistic Theory is the triumphant outcome of a lifetime's thinking about every aspect and manifestation of language The volumes comprise a one stop introduction for undergraduate and graduate students of linguistics as well as for those in neighbouring disciplines such as psychology and anthropology

Journal of Linguistics, 2015 Transitivity, Valency, and Voice Denis Creissels, 2024-10-15 This book sets up a consistent theoretical and terminological framework for the study of the phenomena that are commonly subsumed under the terms transitivity valency and voice These three concepts are at the heart of the most basic aspects of clausal structure in any language however there is considerable cross linguistic variation in the constraints on how verbs combine with noun phrases that refer to participants in the event that they denote or to the circumstances of the event In this book Denis Creissels explores and accounts for the extent of this cross linguistic variation capturing its regularities and examining the historical phenomena that have resulted in the emergence of constructions and markers The novel framework developed in the book allows similar phenomena to be identified across typologically diverse languages and facilitates systematic comparison of the manifestations of these phenomena in the grammars of individual languages *A Systemic Functional Typology of MOOD* Dongqi Li, 2023-05-16 The grammatical category of sentence mood has been of central interest to many branches of linguistics including linguistic typology and systemic functional linguistics This book is a successful integration of the typological and systemic functional approaches to mood aiming to investigate the commonalities and variations across languages in both mood system and mood structure To this aim it establishes a geographically genetically and typologically representative sample of 60 languages and provides detailed systemic functional descriptions of the mood system and mood structure of these languages Based on such descriptions it makes cross linguistic comparisons of the mood system and mood structure of the languages in the sample Structurally it explores the cross linguistic commonalities and variations in i the realizations of some major functional elements in mood structure ii the realizations of mood options and iii the realizations of mood system Systemically it investigates how languages resemble and vary from each other in i the subtypes of major mood types ii the organization of mood system and iii the semantic dimensions along which mood system is elaborated further in delicacy Moreover building on the descriptions and comparisons it makes some generalizations about the structural and

systemic features of mood and proposes some tentative explanations for the commonalities and variations languages display in mood system and mood structure This book is an empirical and holistic approach to the typology of mood and contributes to a deeper understanding of the grammatical category It is of special interest to systemic functional linguists typologists grammarians and descriptive linguists

Basic Linguistic Theory Volume 1 R. M. W. Dixon, 2009-10-01 In Basic Linguistic Theory R M W Dixon provides a new and fundamental characterization of the nature of human languages and a comprehensive guide to their description and analysis In three clearly written and accessible volumes he describes how best to go about doing linguistics the most satisfactory and profitable ways to work and the pitfalls to avoid In the first volume he addresses the methodology for recording analysing and comparing languages He argues that grammatical structures and rules should be worked out inductively on the basis of evidence explaining in detail the steps by which an attested grammar and lexicon can build up from observed utterances He shows how the grammars and words of one language may be compared to others of the same or different families explains the methods involved in cross linguistic parametric analyses and describes how to interpret the results Volume 2 and volume 3 to be published in 2011 offer in depth tours of underlying principles of grammatical organization as well as many of the facts of grammatical variation The task of the linguist Professor Dixon writes is to explain the nature of human languages each viewed as an integrated system together with an explanation of why each language is the way it is allied to the further scientific pursuits of prediction and evaluation Basic Linguistic Theory is the triumphant outcome of a lifetime s thinking about every aspect and manifestation of language and immersion in linguistic fieldwork It is a one stop text for undergraduate and graduate students of linguistics as well as for those in neighbouring disciplines such as psychology and anthropology

Reference in Discourse A. A. Kibrik, 2011-09 This is the first full study of how people refer to entities in natural discourse It contributes to the understanding of both linguistic diversity and the cognitive underpinnings of language and it provides a framework for further research in both fields Andrej Kibrik focuses on the way specific entities are mentioned in natural discourse during which about every third word usually depends on referential choice He considers reference as an overt representation of underlying cognitive processes and combines a theoretically oriented cognitive approach with empirically based cross linguistic analysis He begins by introducing the cognitive approach to discourse analysis and by examining the relationship between discourse studies and linguistic typology He discusses reference as a linguistic phenomenon in connection with the traditional notions of deixis anaphora givenness and topicality and describes the way his theoretical approach is centered on notions of referent activation in working memory He argues that the speaker is responsible for the shape of discourse and that referential expressions should be understood as choices made by speakers rather than as puzzles to be solved by addressees Kibrik examines the cross linguistic aspects of reference and the typology of referential devices including referring expressions per se such as free and bound pronouns and referential aids that help to tell apart the concurrently activated entities This

discussion is based on the data from about 200 languages from around the world He then proposes a comprehensive model of referential choice in which he draws on concepts from cognitive linguistics psycholinguistics cognitive psychology and cognitive neuroscience and applies this to Russian and English He also draws together his empirical analyses in order to examine what light his analysis of discourse can shed on the way information is processed in working memory In the final part of the book Andrej Kibrik offers a wider perspective including deixis referential aspects of gesticulation and signed languages This pioneering work will interest linguists and cognitive scientists interested in discourse reference typology and the operations of working memory in linguistic communication Predicative Possession Leon Stassen, 2009-05-07 This pioneering work draws on data from over 400 languages from a wide range of language families to establish a typology of four basic types of predicative possession It examines their interdependence with other typologies and explores varieties of related grammaticalization processes The Emergence of Distinctive Features Jeff Mielke, 2008-03-13 The Emergence of Distinctive Features will be of essential interest to phonologists and typologists as well as to syntacticians cognitive scientists and scholars outside linguistics interested in the nature of language and its acquisition BOOK JACKET **Negation in Uralic Languages** Matti Miestamo, Anne Tamm, Beáta Wagner-Nagy, 2015-06-24 The grammaticalized expression of negation is a linguistic universal This volume deals with negation in the Uralic language family in a typological perspective As in no other major language family before a comprehensive typological questionnaire provides the basis for the chapters documenting negation in 17 languages Most of them are endangered The chapters highlight negative auxiliary verbs the special Uralic feature and their ways of combining with the rich inventory of other negators in different types of clauses as well as negative replies negative indefinites abessives caritives privatives scope polarity and emphatic negation Selected aspects of negation such as negative indefinites negation of non verbal predicates and information structure are discussed in more detail in five further chapters The book brings new typologically informed perspectives on negation in the Uralic family and it provides valuable data and insights for any linguist working on negation
